Professional Summary: Results-driven **Senior IT Auditor** with 3+ years of experience performing IT audits, SOX IT control testing, and operational risk assessments. Demonstrated ability to evaluate IT General Controls (ITGC), cybersecurity risks, and process efficiency while partnering with cross-functional teams. Proficient in data analytics, GRC tools (e.g., Archer, Workiva), and emerging technologies like RPA and AI to drive audit quality and efficiency. Adept at identifying control gaps, delivering practical recommendations, and ensuring compliance with internal policies, regulatory requirements, and industry standards.

Core Competencies: IT General Controls (ITGC), SOX IT Compliance Testing, Cybersecurity Controls Assessment, Risk & Control Matrix (RCM) Evaluation, GRC Tools (Workiva, Archer), Data Analytics (Excel, Power BI), RPA / Automation Awareness, Control Design & Effectiveness Review, Audit Documentation & Reporting, Regulatory Compliance (FFIEC, NIST, ISO 27001), Internal/External Audit Coordination, Effective Communication & Stakeholder Management.

Certification & Education:

Certified Information Systems Auditor (CISA) from ISACA

Cyber Threat Management from Cisco Networking Academy

B.Sc. Accounting from Lagos State University

Professional Experience

TX-Health and Human Services -OIG, Austin, TX

Senior Auditor Oct 2023 to Present

- Collaborates with the VP of Internal Audit to identify IT-related risks and assess the design and effectiveness of related controls across systems and processes.
- Executes IT audit engagements to evaluate the effectiveness of risk management, internal controls, and governance processes, ensuring alignment with the Company's IT objectives and regulatory expectations.
- Independently prepares and maintains appropriate documentation of the investigation performed
- Used TeamMate and Power BI to develop data-driven risk assessments and dashboard reporting.
- Developed and implemented internal controls to identify suspicious and prevent illegal activities significant to Medicare providers' interface applications.
- Validated remediation plans and conducted follow-up audits to ensure effective resolution of audit findings.
- Perform control walkthroughs, gather evidence, and ensure audit documentation is complete and well-supported.
- Partner with IT, Compliance, and business units to communicate risks and control gaps.
- Assist external auditors with statutory audits by providing documentation and walkthrough support.
- Leverage tools like Power BI and Excel for data analysis and trend reporting.
- Participate in internal meetings to assess audit team effectiveness and provide feedback to improve audit methodologies.
- Stay current on emerging risks, technologies, and changes in IT regulatory requirements.

Johnson Financial Group (Jefferson Wells), Racine, WI

Senior IT Auditor (Contract) Apr 2021 to Oct 2023.

- Planned and executed ITGC, SOX, and FDICIA audits across enterprise banking systems and third-party service providers.
- Execute IT audits, walkthroughs, and SOX 404 IT control testing in alignment with IIA and ISACA standards.
- Develop audit programs, assess risk areas, and document findings with actionable recommendations.

- Evaluate the design and operational effectiveness of IT General Controls, including access management, change management, backup/recovery, and system security.
- Collaborated with IT Risk management to review suspicious internal bank activity, control, and prevention of losses related to organizational risk.
- Led segregation of duties (SoD) testing, vulnerability assessments, and ERP access reviews (SAP, Oracle).
- Analyzes audit testing results to assess the adequacy and effectiveness of internal controls and provides well-supported conclusions on residual risk exposure.
- Develops and maintains detailed audit workpapers following the Quality Assurance and Improvement Program (QAIP), ensuring sufficient, appropriate evidence supports audit findings and conclusions.
- Automated audit routines using ACL to identify exceptions and improve coverage across high-risk areas and protection of assets.
- Performed security examination assessment on financial application and collaborated with compliance and cybersecurity teams to align controls with regulatory mandates, which led to a decrease in compliance risk to 9%.

Synergy Technologies, Cheverly, MD

IT Auditor Aug 2019 to Apr 2021.

- Performed IT audits across public and private sector clients aligned with HIPAA, PCI DSS, and COBIT standards.
- Conducted SLA 7/15 compliance checks across Facebook, Instagram, and Real-Life to verify proper handling of linked and unlinked data across integrated applications on the privacy dashboard.
- Prepares clear, concise, and professionally written audit reports and deliverables that communicate IT risk and control deficiencies to various levels of management and governance.
- Supports the organization's anti-fraud initiatives by participating in investigations and identifying IT-related fraud risks and control gaps.
- Adheres to the Institute of Internal Auditors' (IIA) International Standards for the Professional Practice of Internal Auditing and upholds the Internal Audit Code of Ethics.
- Reviewed IT infrastructure, including network devices, endpoint security, backup systems, and user access provisioning.
- Participate in ongoing professional development to maintain technical expertise in IT auditing, compliance, risk management, and relevant business operations.
- Reviewed inventory management software and MS Office applications and principles.
- Identified gaps in change management and incident response procedures, recommending practical mitigation steps that boosted and increased security posture by 15%.
- Prepared audit deliverables for executive-level presentations, contributing to informed risk decisions.

State of Wisconsin – Department of Children and Families, Milwaukee, WI

Compliance Auditor Aug 2017 to Jul 2019

- Conducted internal compliance reviews for childcare programs and subsidy allocations.
- Evaluated internal controls, detected fraudulent activity, and developed process improvement strategies.
- Coordinates with management to obtain responses to audit findings and conducts follow-up testing to verify the timely and effective remediation of identified issues.
- Liaised with legal and program stakeholders during investigations and appeal hearings.
