

Narendra Kumar

.NET Developer @ Deloitte (The Pennsylvania Department Of Human Services)

Email: 6xo-pdl-04o@mail.dice.com

Phone: 9713532576

Summary

Previous	.NET Developer @ H & R Block
Preferred	Net Developer
Location	Irving, TX, US
Desired Work Settings	No Preference
Willing to Relocate	Yes
Work Authorization(s):	Authorized to work in the United States on a full-time basis. Now or in the future will require visa sponsorship for employment in the United States.
Employment Type	Full-time Contract - Corp-to-Corp Contract to Hire - Corp-to-Corp
Total Experience	6 years
Education	Masters @ University of Central Missouri
Profile Source	Dice
Profile Downloaded	Monday, September 29, 2025

SUMMARY

Full Stack .NET Developer with 8+ years of experience, proficient in ASP.NET MVC 5 and .NET (4.0/4.5). Skilled in front-end development (HTML5, CSS3, Angular) and back-end development (C#, ASP.NET, ADO.NET). Expertise in deploying applications on AWS and Azure, optimizing RESTful APIs, and utilizing SDLC methodologies such as Waterfall and Agile.

SKILLS

Web Technologies	NET 4.0/4.5, ASP.NET MVC 5, AJAX, HTML5, JSP, JavaScript, CSS3, XML, XSD, AJAX, Angular, ASP.Net Core 3.0, 3.1, 6.0, Restful API
Languages	C#, VB.NET, DHTML, CSS, ADO.Net, ASP.NET, LINQ, PHP, Typescript, Node JS.
Other Frameworks	Web Services, AJAX, MVC 5, Microservices, J-Query.
IDEs	Visual Studio , NetBeans, IntelliJ IDEA, Eclipse
Web Server	Apache Tomcat, IIS 7.5, 8.5, WebLogic, Jetty
Cloud & Deployment:	AWS, Microsoft Azure, Docker
Databases	MYSQL, Oracle, SQL Server 2012/2016/2017, PL/SQL, MongoDB
Tools	Microsoft Visual Studio, VSS (Visual Source Safe), DevX Tools, VSTS, Team Foundation Server, Microsoft Stream Insight, Squirrel
Testing tools	JMeter, Junit, NUnit, MSTest
Reporting tools:	Crystal Reports, SQL Server 2017, SQL Server Reporting Services, SSIS, SQL
Version Control/Tracking Tools	GitHub, SVN, P4V, Bitbucket, Jira, Team Foundation Server (TFS)
Operating Systems	Windows, LINUX, Mac iOS.

EXPERIENCE

Deloitte (The Pennsylvania Department of Human Services), Mechanicsburg, PA | .Net Developer Sep 2023 – Current

- Developed and maintained advanced web applications for managing claim processing and authorizations management systems, utilizing ASP.NET Core, C#, and Angular.
- Engineered responsive, user-friendly interfaces for claim processing portals using Bootstrap, HTML5, CSS3, and JavaScript, significantly enhancing user experience.
- Created dynamic, maintainable front-end interfaces with Angular and TypeScript, ensuring a smooth, consistent user experience across all devices.
- Implemented secure authentication and authorization mechanisms in line with OWASP best practices, improving security and protecting sensitive user data from vulnerabilities.
- Deployed applications to Azure, utilizing Docker for containerization and setting up CI/CD pipelines to automate deployments.
- Implemented error handling, validation, and user notifications in the WPF application to improve data accuracy and application stability.
- Conducted unit testing and UI automation tests for WPF components using NUnit and UI testing frameworks, achieving higher test coverage and faster release cycles.
- Achieved 95% unit test coverage using NUnit and xUnit, significantly reducing post-deployment issues and improving overall software quality.
- Participated actively in Agile-Scrum ceremonies, driving continuous improvement and consistently delivering high-quality features on time.

Environment: ASP.NET Core 6.0, C#, Angular, TypeScript, Bootstrap, Azure, Docker, NUnit, xUnit, RESTful APIs, OWASP Security Standards, WPF, MVVM

H & R Block, Kansas, KS | Full Stack Dot Net Developer Mar 2022 – Sep 2023

- Worked on the modernization of Tax application infrastructure at H & R Block, employing ASP.NET MVC and C# to drive functionality enhancements.
- Used .NET XML objects like Xml Document, XmlNode, XPath to capture, modify & render the data for Tax reports.
- Developed common libraries to be used by the reports using C#.
- Involved in transacting the data from Oracle Database using ADO.NET, ASP.NET
- Made code changes to the Tax application using C#, Jscript and ASP.NET for several change requests.
- Used Aspose.Cells, as a third-party tool to generate MS Excel reports for Upgrades module.
- Designed and implemented complex MVVM (Model-View-ViewModel) architecture in WPF to ensure maintainability, testability, and separation of concerns within the Connexus UI.

- Integrated WPF UI with backend .NET services (C#) to enable real-time data binding and seamless communication between UI elements and business logic layers.
- Implemented RESTful APIs to enhance system scalability and foster seamless interoperability with external platforms.
- Developed strongly typed views in ASP.NET MVC based on requirements.
- Created Business Logic Layer and Data Access Layers to implement the MVC architecture.
- Implemented client-side validations using jQuery and ASP.NET MVC validations at the controller level.
- Leveraged jQuery for page scripting, AJAX calls, and JSON for passing objects between Controller and View.
- Utilized N-Hibernate as an ORM to query and persist .NET objects to the Oracle 11g database.
- Developed secure enterprise-level WCF services exposed on various endpoint bindings and consumed existing web services and WCF services for ETL purposes.
- Developed a system services SOA application platform for use by all web applications utilizing Windows Communication Foundation (WCF) services.
- Involved in designing the database schema and creating data models for new modules and updating existing ones.
- Helped develop user manuals, program documentation, training manuals, and operational procedures.
- Developed HTML views with CSS3.
- Created and maintained stored procedures, tables, views, and indexes in the Oracle 11g database as needed.

Environment: ASP.NET MVC 5, C#, Oracle 11g, ADO.NET, WCF, Aspose.Cells, jQuery, AJAX, N-Hibernate, RESTful APIs, JavaScript, XML, SQL Server

Accenture, India | Application Development Analyst

Jan 2019 - Dec 2021

- Managed the development effort using ASP.NET MVC and C# to modernize a manufacturing ERP system at Accenture.
- Used Amazon RDS for managed database ensuring availability & scalability while reducing administrative overhead.
- Employed ADO.NET datasets and data adapters to retrieve and manipulate data in a disconnected manner, enhancing scalability and performance.
- Used SQL Server Analysis Services (SSAS) for multidimensional data analysis and OLAP cube creation.
- Integrated Angular Material components for consistent and visually appealing UI design, ensuring a cohesive user experience across the application.
- Implemented client-side business logic and interactivity using JavaScript, enhancing the user experience and responsiveness of the ERP system.
- Worked with PL/SQL and Oracle to test, fix bugs for several procedures and queries used for report generation.
- Generated data migration & transformation using SSIS and implemented Unit Testing and System Testing using NUnit.
- Implemented Ajax requests using XML HTTP Request or fetch API to fetch data from backend APIs asynchronously, enabling real-time updates and dynamic content loading.

Environment: ASP.NET MVC 5, C#, Angular, Amazon RDS, SQL Server, Oracle, PL/SQL, SSIS, NUnit, JavaScript, Angular Material

STech, India | Software Engineer

Jan 2017 - Dec 2018

- Developed WCF services for accessing data and implemented reports using them.
- Coding and debugging using ASP.NET and C#.
- Developed web forms using ASP.NET server controls and validated client side using JavaScript.
- Developed stored procedures, user-defined functions, and triggers using SQL Server 2005.
- Collaborated with front-end developers to integrate Angular with ASP.NET for seamless data binding and better performance.
- Optimized SQL queries and improved stored procedures for faster data access, resulting a improvement in database performance.
- Wrote XUnit test cases for a few existing modules and then for all the new requirements.
- Used Visual Studio Team Foundation Server for version control, work item tracking, build management, planning, and project governance and performance analysis.
- Worked on SQL queries, stored procedure, functions, triggers and SQL scheduled jobs using Microsoft SQL.

Environment: ASP.NET 4.5, C#, WCF, AngularJS, SQL Server 2005, XUnit, Visual Studio, TFS, JavaScript

EDUCATION

- Master of Science in Computer Information Systems and Information Technology –2022- University of Central Missouri, Warrensburg, Missouri, USA
- Bachelor of Technology in Electronics Communication and Engineering – 2018- JNTUH, Hyderabad, INDIA

CERTIFICATION

- AWS Certified Solutions Architect – Associate
- Google – Associate Cloud Engineer
- Microsoft Certified - Azure Developer Associate
