Jesse Johnson, MBA

Executive in Federal Policy | Government Affairs, Regulatory Compliance, Energy Transition Strategy | MBA – Finance & Energy
Houston, Texas, United States

Summary

With over 17 years of leadership in federal policy, intergovernmental affairs, and energy transition strategy, I bring a track record of shaping high-impact initiatives that sit at the intersection of public service, innovation, and sustainable economic growth. I specialize in advancing strategic outcomes across regulatory systems, labor markets, and the evolving energy landscape.

As a senior policy leader at the U.S. Department of Labor, I have advised governors, state legislators, and senior federal executives on large-scale workforce transitions, disaster recovery policy, and clean energy adaptation. I've led national efforts to implement complex legislation across 50 states and territories, built coalitions across government and industry, and directly supported major programs tied to the Inflation Reduction Act, Infrastructure Investment and Jobs Act, and disaster unemployment frameworks.

With an MBA in Finance and a specialization in energy markets, I offer a rare blend of policy fluency and business acumen. I understand how to navigate and translate government systems into actionable strategies that serve communities, mitigate risk, and unlock opportunity. Whether shaping economic recovery plans or designing policy engagement strategies, I prioritize clarity, integrity, and measurable impact.

Key Competencies:

- Federal Policy Strategy and Government Relations
- Energy Transition and Workforce Policy
- Disaster Recovery, Unemployment Insurance, and Federal Grants
- Legislative and Regulatory Analysis
- Economic Development and Resilience Policy
- Public Sector Advisory and Interagency Collaboration
- Executive Communications and Strategic Planning

- Cross-Sector Stakeholder Engagement and Thought Leadership

What drives me is the opportunity to influence outcomes that matter — helping organizations interpret and implement policy in ways that are equitable, effective, and future-ready. I believe in policy as a tool for innovation, and leadership as a platform for lasting change.

I am currently exploring senior roles where I can contribute my expertise to mission-driven organizations, public-private partnerships, or advisory practices committed to energy, economic development, and strategic government affairs.

Experience

U.S. Department of Labor
Senior Policy Analyst/Regional Disaster Unemployment Assistance
Lead

May 2015 - Present (10 years 7 months)

Houston, Texas, United States

Serve as a principal policy advisor within the U.S. Department of Labor, driving high-priority labor and economic initiatives with direct implications for national policy, regulatory compliance, and intergovernmental coordination. Provide executive-level guidance on the strategic implementation of statutory mandates, including those under the Trade Act, Inflation Reduction Act, and Infrastructure Investment and Jobs Act.

Lead the Department's efforts on workforce transitions in the energy sector, advising on the economic impact of fossil fuel decline and clean energy investment. Act as Energy Policy Lead for the Office of Trade Adjustment Assistance, coordinating across federal agencies and state governments to inform policy design that strengthens regional competitiveness and labor resilience.

Build and manage relationships with senior state officials, governors' offices, and interagency stakeholders across 52 jurisdictions. Interpret complex regulatory frameworks and advise on statutory alignment to ensure effective and lawful implementation at the state level.

Key contributions include:

Developed national policy guidance adopted by all states to ensure consistency in program delivery, funding accountability, and compliance with 20 CFR 618

Directed strategic partnerships with FEMA and internal agencies to streamline the federal disaster response, improving access to unemployment relief and economic recovery services

Responded to over 1,000 high-level policy consultations annually, serving as the Department's central point of contact on technical and regulatory interpretation

Delivered executive briefings and policy memos that informed senior leadership decision-making on trade-related job loss, energy transition, and regional labor market disruption

Mentored new analysts and led internal knowledge-sharing initiatives that improved response time, coordination, and stakeholder engagement

GET Global Energy Transition
Member of the Board of Advisors
April 2023 - Present (2 years 8 months)
Houston, Texas, United States

Drawing on my extensive federal experience, I am committed to advancing the mission of GET—dedicated to supporting displaced workers from the oil and gas industry in navigating the complexities of the energy transition. My role involves identifying and harnessing transferable skills, guiding these workers towards reemployment and unlocking new opportunities in the dynamic landscape of renewable energy and sustainability. By strategically leveraging my background in policy and regulation, I aim to bridge the gap between traditional energy sectors and emerging green technologies, facilitating a smooth transition for individuals impacted by industry shifts. This commitment not only aids in the immediate reemployment of skilled workers but also contributes to the broader goal of fostering a resilient, future-ready workforce equipped to thrive in the changing energy ecosystem.

U.S. Department of Labor
Program Analyst
2008 - 2015 (7 years)
Washington DC-Baltimore Area

In my role within the Office of Trade Adjustment Assistance's Investigations Unit, I focused on investigating Trade Adjustment Assistance (TAA) petitions for workers from the Automotive, Manufacturing, and Energy sectors. Tasked with ensuring those affected by changes in international trade received the necessary support and benefits, I analyzed confidential financial data from companies to document the impacts of foreign trade adjustments on labor and domestic business profitability.

My work involved detailed research and analysis to certify and validate petitions, requiring the gathering of additional information when necessary. A significant achievement was my appointment as the primary contact for Delphi Technologies in response to major international trade disruptions. Through this role, I led the investigation of 25 petitions, directly contributing to over 1000 workers receiving professional retraining and unemployment benefits, highlighting my dedication to facilitating workforce resilience and adaptation.

EXCEED Corporation

Program Analyst

2007 - 2008 (1 year)

Washington D.C. Metro Area

As a Program Analyst supporting the Office of Trade Adjustment Assistance (OTAA), I conducted in-depth investigations to assess worker eligibility for Trade Adjustment Assistance (TAA) benefits under Federal Regulation Title 20, Part 618. My work directly contributed to retraining and unemployment benefits for U.S. workers impacted by shifts in international trade.

Key Achievements:

Completed 197 investigations, supporting benefit delivery to 13,816 displaced workers across multiple industries affected by globalization.

Drafted and submitted Business Confidential Data Requests (BCDRs) and conducted independent research to validate claims and determine petition eligibility.

Interpreted and applied federal regulatory guidance to ensure accurate, timely, and compliant adjudication of petitions.

Collaborated with the lead Project Manager and federal staff to deliver detailed case findings that informed national TAA benefit decisions.

This role laid the foundation for my long-term work in federal workforce policy, data-driven decision-making, and economic transition support.
