

Marcos Assis

Senior .NET Developer (Fullstack) - Contract - Remote @ Triparc, Toronto, CA

Email: g9o-9kz-axc@mail.dice.com

Summary

Previous	Senior .NET Developer (Backend) - Contract - Remote @ Insight Global, Atlanta, USA
Preferred	Software Engineer
Location	Jardim Florença, SP, BR
Desired Work Settings	Remote or On-Site or Hybrid
Willing to Relocate	Yes
Work Authorization(s):	Now or in the future will require visa sponsorship for employment in the United States.
Employment Type	Full-time
Total Experience	4 years
Education	High School @ Data Processing Technician Bachelors @ Bachelor s Degree in System Information
Profile Source	Dice
Profile Downloaded	Friday, September 26, 2025

MARCOS ANTONIO DE ASSIS

Senior .NET Backend Developer

<https://www.linkedin.com/in/assismarcos/>

PROFILE

Senior Software Developer with over 20 years of comprehensive experience spanning various sectors, including commercial and industrial enterprises, government, gaming, financial services, and luxury travel. Adept at developing complex back-end solutions and system integrations, focusing on Microsoft technologies such as .NET Framework, .NET Core, and ASP.NET Core as the primary stack. Holds a Bachelor's Degree in Systems Information, combining academic knowledge with extensive real-world application.

Proven expertise in designing and enhancing scalable software systems that support business growth and deliver superior customer experiences. Skilled at collaborating with cross-functional teams in startups, mid-sized firms, and large corporations to identify challenges, implement effective solutions, and drive innovation. Recognised for reliability, technical leadership, and a consistent commitment to quality and performance improvement. Significant achievements include leading the development of integration projects that streamlined operations and improved service delivery, contributing to higher client satisfaction and operational efficiency.

SKILLS

- C#, .NET 4.x, .NET Core, ASP.NET Web API, ASP.NET Core, Javascript, JQuery, HTML, CSS;
- RESTful API, SOAP Web Services;
- CQRS pattern, Microservices, Event Driven Architecture, Distributed Applications;
- Windows Services, Windows Forms applications;
- Oracle, DB2, MySQL, PostgreSQL, SQL Server, SQLite, MongoDB, Redis;
- LINQ, Entity Framework, NHibernate, Dapper, ADO.NET;
- DI frameworks (Ninject, Castle Windsor, ASP.NET container, and others);
- Unit test tools like NUnit, MSTest, xUnit, Moq, Wiremock.NET;
- Azure Service Bus, Azure Key Vault, Azure Blob Storage, Azure Kubernetes, NServiceBus, RabbitMQ, Hangfire;
- Git, GitHub, BitBucket, GitLab, VSTS, TFS, Azure DevOps;
- Visual Studio 2019, 2022, JetBrains Rider, Jira, Trello, IBM RTC, Azure Board;
- Waterfall, Scrum, and Agile methodologies;
- Domain-Driven Design, TDD, BDD (basic), Clean Code, Clean Architecture, Design Patterns;
- Broad experience in several Delphi versions;
- Some experience in C ANSI and ETL tools development;
- Rancher, Elastic Search, Kibana;
- Linux distributions such as Red Hat, RHEL, SUSE, OpenSUSE, Fedora, and Ubuntu.

WORK EXPERIENCE

Senior .NET Developer / TripArc - Toronto, CA - Remote 01/2025 – Now

- Working as a full-stack .NET/Angular Developer implementing new features and fixing general issues.

Senior .NET Developer / Insight Global - Atlanta, USA - Remote 08/2024 – 12/2024

- Allocated at Daifuku North America (<https://www.daifukuia.com/innovation-center-usa>) on behalf of Insight Global;
- Worked as a backend developer implementing new integration services to exchange information between SAP and internal applications through REST APIs and SOAP Web Services;

Senior .NET Developer / Integritas Solutions Inc - Texas, USA - Remote 03/2024 – 08/2024

- Worked as a full-stack developer implementing new features and fixing general issues;
- Coded with C# (.NET Framework and .NET Core) using MS SQL Server as a relational database;
- Implemented new stored procedures as requested by the new features and fixing the existing ones;
- Worked on the front side using Javascript, JQuery, HTML, CSS, and Telerik UI (Kendo UI) components to implement user-friendly features.
- Main application performance improvement by designing and implementing Azure Functions to process parking lot reservations and payments on Azure;
- Application performance improvement by 45% through code refactoring and use of design patterns
- General application troubleshooting

Senior .NET Developer / BairesDev - San Francisco, USA - Remote 08/2021 - 12/2023

- Worked on a project to migrate a monolithic application to microservices, applying patterns like CQRS and cutting the deployment time by about 60% using CI/CD tools;
- Direct participation in the microservices definition and architectural decisions, guiding other developers;
- Use of NServiceBus along with Azure ServiceBus to manage queues and messages. Some experience with other Azure services like Azure Blob Storage, Azure Key Vault, Azure Kubernetes;
- Worked on a Payment Gateways project integrating different types of payment providers;
- Responsible for code review, providing technical guidance and constructive feedback to other developers to ensure the code quality, maintainability, and readability;
- Developed frameworks, shared libraries, and reusable components for different applications;
- Coding with C# (.NET 5.0) as the primary language and using MS SQL Server as a relational database and MongoDB as a NoSQL database;
- Unit and integration tests implementation – increased the test coverage from zero to 85%;
- Experience with CI/CD pipelines (Azure DevOps);
- Contributed documentation of processes and task specifications.

Senior .NET Developer / Softplan - Florianópolis, Santa Catarina, Brazil - Remote 11/2020 - 08/2021

- Development of REST APIs to deal with enormous quantities of information in systems for the Public Ministry and the Brazilian Supreme Court, using .NET Core, ASP.NET Core, Kubernetes, and AWS;
- Analysis of complex technical issues in the microservices or APIs;
- Responsible for reviewing code from other developers and helping other team members;
- Coding, with C# as the primary language, on four types of database engines: Oracle, DB2, PostgreSQL, and MS SQL Server;
- Use of tools such as Visual Studio 2019, JetBrains Rider, Gitlab, IBM RTC, RabbitMQ;
- Worked on application performance improvements as well as SQL queries.

Senior .NET Developer / Objective Solutions - Maringá, Paraná, Brazil - Remote 12/2019 - 10/2020

- Outsourced to Objective Solutions on a project for a public transportation company from New York, USA;
- Built several kinds of applications using .NET and .NET Core (REST API, Windows Services, Windows Forms), C# as language, and using database engines such as MS SQL Server, MySQL, SQLite, Entity Framework, and ADO.NET;
- Worked on a small project and developed a .NET Core REST API to run on Windows and Ubuntu Server;
- Use of tools like Bitbucket, Jira, Gitkraken, Fork, RabbitMQ, Postman, and Visual Studio as main IDE;
- Dealt with a huge amount of socket messages between vehicles and the monitoring system;
- Improved existing systems and fixed issues on said systems;
- Provided technical leadership to teammates and responsible for several code reviews;

Senior Analyst / Boa Vista SCPC - Barueri, São Paulo, Brazil - Remote 05/2018 - 12/2019

- Migrated legacy applications created in Delphi to .NET Core and ASP.NET Core, using C# as language, databases such as MS SQL Server, as well as MySQL, Dapper, and Entity Framework;
- Use of tools such as Gitlab, Hangfire, Postman, Insomnia, and Visual Studio as primary IDE;
- Created REST APIs to provide information to CRM systems like Oracle Sales Cloud;
- Developed integration between Oracle Sales Cloud, Oracle RightNow, and IBM Mainframes;
- Created ETL tools to collect copious amounts of data from several sources and concentrate it in a data warehouse for analysis;
- Responsible for the definition of the APIs, as well as the best way to provide information to several areas and systems;
- Provided technical leadership to teammates;

Senior Developer / Fábrica de Códigos - Marília, São Paulo, Brazil - On site 07/2017 - 05/2018

- Acted as a technical leader on a migration project from legacy Delphi applications to REST API applications, using .NET Framework, ASP.NET Web API, C# as language, and PostgreSQL as the primary database engine;
- Used tools like VSTS, Postman, and Visual Studio as primary IDE;
- Provided technical leadership to other team members;
- Responsible for code reviews and some scrum ceremonies;

Data Engineer / Hoplon Infotainment - Florianópolis, Santa Catarina, Brazil - On site 06/2016 - 07/2017

- Hoplon is a Brazilian game company creating games for PC, Xbox, and PlayStation;
- Worked as a Data Engineer, developing ETL tools to collect and process raw data from log files generated by its game in addition to comments regarding said games on social networks;
- Dealt with an enormous amount of data extracted from log files;
- Responsible for developing new ETL tools, as well as the improvement of legacy tools, using .NET Framework, C# as the language, MySQL and MS SQL Server as database engine;
- Use of tools such as VSTS and Visual Studio as primary IDE;
- Responsible for the organization and availability of all data collected and processed;
- Provided information to Data Scientists, Studio Managers, and Game Designers;
- Responsible for some code reviews;
- Interaction with other developer teams (back-end services, web pages, game developers) to support tackling specific issues in the game.

Senior .NET Developer / ONCLICK Sistemas - Marília, São Paulo, Brazil - On site 01/2016 - 05/2016

- Development of integration with Brazilian tax systems, mainly with electronic invoices (NFe/NFSe);
- Bug fixing in different applications;
- The main technologies used at this job were .NET/C#, Delphi 2010, Firebird SQL, MS SQL Server

Senior .NET Developer / Bredas Sistemas - Marília, São Paulo, Brazil - On site 01/2015 - 12/2015

- Worked as a researcher in the innovation area, where I was responsible for the evaluation of new technologies and tools that were used in the evolution of the company's applications;
- Development of new products utilizing the .NET Framework 4.5 (C#), Entity Framework 6, NHibernate 4, Microsoft SQL Server, and MySQL as database servers, along with Team Foundation Server 2013 as the code management tool;
- Development of Single-Page Applications (SPAs) with AngularJS on the frontend and ASP.NET Web API on the backend;
- Utilization of Dependency Injection frameworks, such as Castle Windsor, Ninject, and Unity;
- Projects created using security standards (authentication and authorization) based on the OAuth 2.0 specification.

Senior Delphi Developer / Softplan - Florianópolis, Santa Catarina, Brazil – On site 05/2014 - 12/2014

- I worked at the Justice Unit, developing integration between the first- and second-level systems, making corrections and improvements to these systems, as well as the integration routines between them;
- These solutions have been and are currently used in most of the national territory by the Courts of Justice and Public Ministries, with thousands of users;
- The main tools used in addition to Delphi were Microsoft SQL Server databases, Oracle, and DB2, as well as Team Foundation Server for code control and versioning, and Code Collaborator for code revisions and agile methodologies, specifically SAFe (Scaled Agile Framework), which encompasses several agile methodologies tailored for large organizations;
- Some development techniques, such as Clean Code and Unit Tests, were also employed in the coding process.

Senior Delphi Developer / Freelancer - Marília, São Paulo, Brazil – Remote 10/2013 - 04/2014

- Improvement of applications developed mainly in Delphi 5, 7, 2006, 2010, as these applications are destined to branches of diverse activities like Retail (ERP), Human Resources (Payroll), and large governmental legal systems.

Senior Developer / ONCLICK Sistemas - Marília, São Paulo, Brazil – On site 01/2008 - 10/2013

- Collaboration on the development of automation systems for commercial and industrial enterprises (ERP) using Object-Oriented Programming (OOP) with the Pascal language and the .NET Framework 4.0, along with MS SQL Server and Firebird SQL, utilizing NHibernate and Entity Framework Code First. Development of integrations between Win32 applications, Team Foundation Server, and Microsoft Dynamics CRM 2011 Online with .NET 4.0 (C#);
- Creation of several WCF Services and Windows Services to provide communication between new and legacy systems;
- Development of applications to integrate our ERP system with the government's tax system, specifically the Brazilian Electronic Invoice (NFe) and NFSe;
- Utilization of Design Patterns, Test-Driven Development (TDD), and Domain-Driven Design (DDD).
- Collaborating with the .NET architectural team to develop new products and enhance existing ones through refactoring and applying good software development practices.

Senior Developer/Tech Lead / Inso Sistemas - Garça, São Paulo, Brazil – On site 05/2001 - 12/2007

- I worked as a senior developer, with my primary responsibility being the initial implementation of a web-based legal system.
- All required components for that application were implemented using Flagship (a xBase/Clipper dialect), and the data access providers also used Flagship and ANSI C
- All applications, libraries, and data providers were required to run on Linux, including Red Hat, RHEL, SUSE, OpenSUSE, Fedora, and other Linux distributions.
- The primary target of this application was insurance and banking companies, such as Itaú, Unibanco, Mapfre, and Louis Dreyfus Commodities, as well as small, medium, and large law firms across the country.

Programmer / HG Civil Construction - Marília, São Paulo, Brazil – On site 06/2000 - 05/2001

- Worked on administrative systems implementation using Clipper 5.2 and Clipper 5.3.
- Management of local network and local servers (Windows NT 4), backup servers, and user training.

EDUCATION

2004 - 2007 **Bachelor’s Degree in System Information**
FAEF - Faculdade de Ensino Superior e Formação Integral, Garça, São Paulo, Brazil

1995 - 1997 **Data Processing Technician**
Paula Souza Center (ETEC), Garça, São Paulo, Brazil

CERTIFICATIONS

2024 **Cambly Certificate of Accomplishment (184 hours of English conversation)**
Cambly Inc. (No expiration date, see on LinkedIn)

2020 **Scrum Fundamentals Certified (SFC)**
SCRUMstudy - Accreditation Body from Scrum Agile (No expiration date, see on LinkedIn)

LANGUAGES

Portuguese - Native Speaker
English - Advanced
