Dear Hiring Manager,

I am writing to express my strong interest in a position within your organization that leverages my 25 years of experience in Program and Project Management, Supply Chain, Procurement, and Materials Management across the Aerospace & Defense, Telecommunications, and Power Generation industries. I am confident that my background working with veteran teams and leading initiatives in fast-paced, high-stakes environments would allow me to contribute immediate value to your team.

Throughout my career, I've demonstrated a consistent ability to drive operational excellence, align cross-functional teams, and ensure the timely delivery of projects using both Agile/Scrum and Waterfall methodologies. I am a certified Scrum Master with hands-on experience managing enterprise-level projects utilizing tools such as SAP, JIRA, Oracle, MS Project, and Power BI. My ability to learn and integrate new systems quickly, paired with my analytical mindset and strong interpersonal communication, has been a key factor in my success.

Some of my core strengths include:

- Strategic supply chain management and material planning
- Leading cross-functional teams to execute complex projects
- ERP/MRP optimization and inventory control
- Stakeholder engagement and vendor management
- Risk and opportunity assessment across project lifecycles

I am particularly drawn to organizations that prioritize innovation, process improvement, and team collaboration; values I not only share but practice daily. I take pride in my self-starter mentality and my ability to remain adaptable under pressure, while maintaining the integrity and discipline necessary to support long-term success.

I would welcome the opportunity to discuss how my background and skills align with your team's goals. Thank you for your time and consideration. I look forward to the possibility of speaking with you further.

Sincerely,

Bryan Jerard Sanchez

- Responsible for planning, executing, monitoring, and closing projects within AT&T's Alliance Channel support team.
- Collaborating with cross-functional teams within BCDR and AT&T, manage resources ,and ensure successful delivery of projects in alignment with business goals and client expectations.
- Manage & track projects/ milestones via WIP trackers during post-sales support of BCDR Solutions sales requests for contracts, orders, installation, and custom pricing requests.
- Project Planning and Initiation: Develop comprehensive project plans, including scope, objectives, timelines, and resource requirements. Collaborate with stakeholders to define project goals and objectives.
- Client Relationship Management: Establish and maintain strong relationships with clients. Understand client requirements and expectations. Ensure client satisfaction by delivering projects on time and within scope.
- Help schedule and attend TTU and/or LAN migrations as needed; (ADI; AVPN; Bvoip) Provide pertinent technical information to customer post service installation as applicable; Provide post installation verification documents to customer as applicable & schedule post-project completion call with customer to advise of lifecycle support process

Fleet Manager | Aggreko

09/19 – 04/22

Oversee the sourcing, transportation, and scheduling of Aggreko temporary power generation, air, and temperature control equipment as well as service coordination and inventory control management serving the South Texas Region.

- Administration of mobilization and de-mobilization/ delivery of equipment and material to all new and existing project sites across defined territories, ensure submission of necessary documentation and update relevant systems and databases including ERP/ SAP and implementing Power BI
- Logistics planning, controlling, and implementing processes like regional fleet management, utilization, and allocation.

- Inventory management and forecast demand planning/ procurement & milestones which addresses capacity levels and production decisions in support of business goals.
- Assisted sales and PMO with contracts, RFP/ RFI particularly with suppliers and or third party rental companies.
- Conducted daily meetings with internal and external teams, clients and all stakeholders

Corpus Christi Army Depot, Corpus Christi, TX

2/2009 – 09/19

Supported the Dept. of Defense TELS (Technical, Engineering, Logistics and Supply) Army Contract with **various OEM's** over the course of 10 years. These contracts were ended and re-awarded over a 15-year period.

- **Supply Chain Analyst AH-64/ CH-47 | The Boeing Company**

08/17 – 09/19

-Responsible for coordinating, supporting, and ensuring completion of all supply-chain, logistics, material management, and production/ material demand planning/ procurement objectives for AH-64 Apache and CH-47 Chinook Helicopters for Army client. This included BOM changes and updates as well as RFP/ RFI tasks within DoD and Boeing suppliers.

-Works directly with program and production control managers, internal stakeholders, and client representatives to ensure deliverables fall within the applicable scope and budget.

-Collaborate with several departments, assesses risks, prioritizes objectives, delegates and executes work activity to ensure project tasks/ milestones effectively executed through completion. Launched and managed Boeing's Bin Stock (Vidmar – Common Hardware) program throughout depot utilizing Boeing GOLD and DoD ERP/ SAP systems for historical material demand, forecast planning & procurement remaining in compliant under DFARS regarding Department of Defense (DoD) contracts for Boeing's AH-64 Apache and CH-47 Chinook programs from 2009-2019

- **Program Manager | Sikorsky (Lockheed Martin)**

8/13-8/17

-Ensured scheduled production requirements and component production output expectations were met. Supported client material integration team, analyzed client material requirements to ensure availability with minimal on hand inventory.

-Executed entries, adjustments, forecasting, and tracking of incoming materials via (ERP/ SAP).

-Facilitated production meetings with all stakeholders, updated material forecast demand planning/ procurement, BOM updates and changes, RFP's/ RFI's and produced weekly pre-ops charts, and tracked expected milestone completions and material movement ensuring compliance under DFARS regarding department of Defense (DoD) contracts for procurement material, BOE and parts.

-Analyzed critical information requirements, root cause updates, shipping reports, long lead parts analysis, and provided reports to senior management.

- **Supply Chain- MRP Rep | L3 Aerospace**

02/09 – 08/13

-Executed daily material management/ material delivery functions for the Corpus Christi Army Depot via Kanban Methodology & eventually implemented Scrum PM; Managed Industrial Product-Support Program (IPV): ordering parts, checking aircraft status, communicating with production team leads and mechanics.

-I worked mainly with Excel spreadsheets for parts and inventory purposes and accepted a role to lead a small teams of 6-10 for the transporting and safe delivery of outgoing material, parts, components, subassemblies, assemblies, components, bench stock hardware kits, etc from an assigned work center or by picking up material at a designated supply distribution point.

-Later in my time with L3 I began planning and prioritizing production of aircraft components, bench stock common hardware kits, and transmission WSR's (Workstation Requirements – BOM itemization) based on shop and monthly scheduled needs along with material demand, BOE, and procurement/ forecast planning/ DFARS compliant. Systems utilized within L3, DoD, DLA involved SAP, Haystack, and Boeing GOLD.

- **Business Accounts Wireline | AT&T SWBT**

04/01 – 02/09

Managed and grew sales territory by driving existing customer sales and acquiring new customers through business development activities. Implemented customer programs designed to maximize client profitability. Collaborated with customers, management, internal departments, external vendors to ensure excellent customer experience.

- Increased sales of AT&T products, services, systems, and solutions.
- Built and maintained customer relationships,
- Performed strategic account planning and customer service.
- New business prospecting and cold-calling.
- Resolved customer disputes, accounts receivable discrepancies, and took accountability for producing desired results.
- Handled customer requests, scheduled new work orders, collected data, planned equipment maintenance, and verified outage reporting.
- Managed product migration, contract renewals, and maintained contract expiration inventories.
- Demonstrated a broad and strong working knowledge of AT&T's entire product and service line.

EDUCATION
