

RASHMIDHAR V

Sr. Business Systems Analyst

E-Mail ID: rashmidharv.c2cc@gmail.com

Direct Ph: 201-510-7991

Professional Summary:

Business Systems Analyst with about 8 years of experience working primarily in **Banking, Mortgage, and Finance** domains using several **Software Development Life Cycle (SDLC)** methodologies including traditional **Waterfall, Waterfall-Agile** Hybrid to modern Agile frameworks like **Scrum, Kanban** and **Scaled Agile Framework (SAFe)** along with extensive knowledge in **Scrumban, Extreme Programming (XP), Spiral** and **Rational Unified Process (RUP)** and sound expertise in performing **Business requirements elicitation, Business Intelligence Analysis** and **liaising** among business and technical stakeholders.

- ❖ Extensive knowledge in **Anti Money Laundering Process, Small Business Loans, and Delinquencies, Identity Access Management, Identity Access Governance, Risk-Based Access.**
- ❖ Fair knowledge of the Banking sector's regulatory and compliance acts relating to the fraudulent practices like **Bank Secrecy Act, SOX, Suspicious Activity Report, Currency Transaction Report, Patriot Act, Know Your Customer, Enhanced Due Diligence, GAAP, Bank Regulations Act, Bank Holding Company Act, and AML** laws, regulations, and procedures.
- ❖ Knowledge of **Mortgage Loan Origination Systems, Loan Servicing, Payment Card Industry Data Security Standards (PCI DSS), and PA DSS** requirements and compliances.
- ❖ Worked along with **ITIL** specialist to create, deliver and Support along with driving the stakeholder value by following the **ITIL** framework to create management standards and improve service practices.
- ❖ Working with the PM in determining the deliverables produced like Project Plan, Project Scope Statement, and identifying management tools like **SWOT Analysis, Work Breakdown Structure (WBS), Critical Path Analysis, Earned Value Management (EVM)** and making a **RACI chart** along with performing **GAP Analysis, Cost-Benefit and Impact Analysis.**
- ❖ Analyzing and disposing of the risk assessments prompted, along with fine-tuning the parameters required for **Risk Assessments** resulting in successful implementation and continuous development of the project along with the team.
- ❖ Seasoned in a wide variety of requirements elicitation techniques such as **Document Analysis, Surveys, Interviews, Brainstorming, Introspection, Prototyping, Observations, Interface Analysis, Reverse Engineering** and **Requirements Workshops** and experience conducting **Joint Application Development (JAD)** sessions.
- ❖ Transformed Business requirements into functional requirements and focused on **documentation** while creating artifacts such as **Business Requirements Document (BRD), Use Case Specifications, Functional Requirements Document (FRD), and System Requirements Specifications (SRS)** and having a broad knowledge on deliverables at various stages.
- ❖ Experience in organizing **Backlog Grooming, Sprint Planning, Release Planning, Daily Scrum, Sprint Demo, Sprint Review Meetings** and handling **requirements churns, negotiating** with development teams.
- ❖ Efficient in breaking **EPICS** and writing **User Stories** and Acceptance Criteria along with the **INVEST** criteria in mind.
- ❖ Experienced with a wide variety of Agile Estimation, Prioritization techniques like **MoSCoW, Planning Poker** and **KANO models**, the 100 Point Method, and the Walking skeleton, and horizontal and vertical slicing techniques.
- ❖ Experience in Organizational Change Management and Conflict Resolution at various stages of the Project lifecycle.
- ❖ Acclimatized to **Business Process Modeling and Notation (BPMN), Workflow** diagrams along with Behavioral **Unified Modeling Language diagrams (UML)** such as **Activity, Use Case Diagrams** and Interaction UML diagrams such as the **Sequence, Timing** diagrams and Process Maps by leveraging on various modeling tools like the **MS Visio, Lucid Chart, and Balsamiq Mockups** for creating low and high fidelity mockups and wireframes.
- ❖ Extensive subject knowledge in **Data Modeling** including creation of both **conceptual & logical** models, **E-R Modeling, Data Mapping, Data Migration, Profiling, Integration** and thorough knowledge of **DBMS, and RDBMS** concepts.
- ❖ Leveraged **Informatica Power Center (IPC)** for extraction, transformation, and loading (ETL) process, data mapping and transformations along with monitoring the workflow for Data Integration.

- ❖ Solid understanding of Enterprise Data Warehouse system (**EDWH**) along with Dimensional Modeling using **Facts, Dimensions, Star** and **Snowflake** Schemas & performing various operations like **Slicing, Dicing, Roll Up, Drill Down**, and **Pivot** on **OLAP** cubes of **MOLAP, ROLAP**.
- ❖ Tracking the requirements along the project by creating a **Requirements Traceability Matrix (RTM)**, and collaborating with the QA team in writing Test Cases, Test Plans, Bug Reports and Test Reports.
- ❖ Leveraged tools like **JIRA, JIRA Zephyr** for Issue tracking, User Stories, Test Cases and **Traceability Matrix**.
- ❖ Work experience in using **Adobe Experience Manager (AEM)** for digital asset management and web content management.
- ❖ Skilled in **Business Intelligence** and Data Mining tools like **Python, Power BI, Tableau**, and **R Studio**, for **visualization**.
- ❖ Leveraged **collaboration and interactive tools** like **Confluence** and **SharePoint** to improvise team's communication.
- ❖ Profound knowledge of the **Service-Oriented Architecture (SOA)**, Client-server Architecture, **Application Programming Interfaces (API)**, the Simple Object Access Protocol (SOAP), **Representational State Transfer (REST)**, **eXtensible Markup Language (XML)**, **JavaScript Object Notation (JSON)**, the Web Service Design Language (WSDL).
- ❖ Closely worked with the team while developing new APIs and enhancing existing APIs along with preparing **API technical and testing documentation** leveraging **Postman** and **SoapUI**.
- ❖ Exceptionally good in writing SQL queries **Data Manipulation Language (DML)**, **Data Definition Language (DDL)**, and the **Data Control Language (DCL)** for requirements research analysis, data analysis, data validation, and system testing.
- ❖ Worked closely with Business in developing **BCP (Business continuity planning)** by defining processes and procedures.
- ❖ Was involved in **risk management** which included **BCP's** and **DRP's** and documenting them for various scenarios.
- ❖ Skilled with Six Sigma, Lean methods, and applying them to improve various business processes.

Technical Skills:

Modeling Tools	MS Visio, Balsamiq Mockups, Lucid Chart.
BI/Reporting/ Visualization Tools:	Tableau, Power BI, Alytrex, R studio, SSRS, MS Office Suite, Excel, Vlookups, PivotTables, VBA.
API Testing/Documentation Tools:	Postman, SoapUI.
Version Control Tools:	Microsoft TFS, CVS, GIT.
Statistical Tools:	SAS, Minitab, Excel, R Studio.
DWH ETL Tools:	Informatica Power Center, SSIS.
Database Management Tools:	Microsoft SQL Server, MySQL, Oracle RDBMS.
Project Management Tools:	Jira, MF QC/ALM, Confluence, MS Project, MS SharePoint, Rational RequisitePro, Rational ClearQuest
Testing Tools	Selenium, MF UFT
Languages and Others:	Python, XML, HTML, MATLAB, SQL, C/C++, MS Office (Word, Excel, PowerPoint, Access), Jupyter Notebook(Python).

PROFESSIONAL EXPERIENCE

State Street Bank, Boston, Massachusetts

August 2019- Present

Sr. Business Systems Analyst

Project:

The scope of the project was to build an efficient web-based **AML Case Management Tool** to overcome the redundancies poised by the existing Case Management tool which had limited scalability and performance capabilities. The project aimed at reducing the error rates of **SAR, CTR** filings, manpower, time involved, and also auto filing of initial **SAR** reports when the cases were productive alerts (true positives). The tool was integrated with seamless features like **Alerts Module, Reports Management Module, and Case Investigation Module** which was achieved by developing Automation, Graph analytics along with enhanced UI/UX, Real-time Reporting, Analytics and Auto Fillings of SARs with **FinCEN**.

Roles and Responsibilities:

- ❖ Scrupulously involved with **AML** Investigators, Analysts, and Auditors in identifying the **process flows** and improving the **workflow** to develop a Case Management Tool.
- ❖ Maintained compliances by studying and ensuring that the organization's regulations, policies, procedures comply with work including **Bank Secrecy Act(BSA), Anti Money laundering (AML), Know your Customer(KYC), Enhanced Due Diligence(EDD), Customer Due Diligence(CDD),SOX Compliance and Customer Identification Program(CIP)**.
- ❖ Focused on the **SAR** auto-filing process and **continuous improvement** of core metrics through **automation** and **workflow**
- ❖ Followed **ITIL 4's** 9 guiding principles along with focusing on feedback and managing risks, standards and governance.
- ❖ Performed **GAP Analysis** reviewing the existing **As-Is** process and recommending possible areas of improvements in the future **To-Be** system.
- ❖ Made sure there was **Process Alignment** between Business Process Objectives and performance measures with organizational objectives and strategies to avoid conflicts and uncoordinated activities.
- ❖ Facilitated **JAD sessions, interviews** with **SMEs & PO** to better understand requirements of **AML Process** starting from false positives and alerts to filing the **SAR reports**.
- ❖ Conducted **market research** on features that could add weightage in the future and can be used by the **AML Investigators**.
- ❖ Wrote **user Stories**, set **acceptance criteria** and checked if they passed the criteria of **INVEST** rule.
- ❖ Held Knowledge Transfer sessions between the team and also leveraged **JIRA** for project planning, scheduling and **drafting epics, stories, sprint burn up, burn down charts, expectation charts** and **status reporting** while using the **KANBAN** board for the visual flow of the process.
- ❖ Created **UML diagrams for Use Case, Sequence, Activity diagrams, Process flow diagrams** by leveraging **MS Visio**.
- ❖ Created **Data Mapping artifacts** for the source and target data fields that are being populated automatically by the system like alerts, tables, **SARs, CTRs**, lists, transaction reports, **KYC** information, and also applying **transformation logic** where required and was responsible for assessing the cross impacts as a part of project support.
- ❖ Executed **SQL queries** by leveraging **MySQL** on large data sets for **exploratory analysis, research analysis**, and extracting data and **ad-hoc reporting** using **SSRS**.
- ❖ Used **Balsamiq mockups** for making high and low fidelity **wireframes** and **mockups** for features like **Link Analysis** and **visualization tools** being implemented in the application.
- ❖ Assisted in **SOA** by determining along with the team how the best requirements and Business Rules can be crafted and grouped for maximum efficiency and visibility during **SOA**.
- ❖ Instigated communication using **Rest** with data type **JSON** and then documented **API** and **web service** requests and responses using **Postman**.
- ❖ Acted as a through leader for data-informed initiatives and piloted the team's direction overall.
- ❖ Knowledge in **Agile** techniques such as **Test-Driven Development(TDD), Continuous Integration** and assisted QA Team in testing the application during **Smoke Testing, Black Box Testing, Regression and User Acceptance Testing** and improving, altering, running **Test Scripts** using **Jira-Zephyr**, created training and testing material and documenting.
- ❖ Used **Confluence** as a collaboration tool for Knowledge sharing, Artifacts sharing, and as a communication tool.
- ❖ Used **Excel VBA** for creating Macros and automating Excel tasks like Project Status Reporting.

- ❖ Leveraged **Tableau, V-lookups and Pivot Tables, VBA** for ad-hoc reporting, automating Project Status and get insights from data for business needs.
- ❖ Performed **Business Impact Analysis** for determining and evaluating the effects of an interruption and to assess a **disaster's impact** over time to establish **recovery strategies, priorities** and requirements based on criticality.
- ❖ Worked along with the business leaders and management in determining the **system recovery priorities, dependencies** and artifact them along with **prioritizing the recovery efforts**.
- ❖ Documented an **ERT team** and their roles and responsibilities as they handle the **disaster recovery**.

Environment: Agile (Scrum), JIRA v7.0, MS Visio, Balsamiq Mockups, Tableau 10.0, Postman v4.1.1, MySQL.

**Silicon Valley Bank, Santa Clara, California
2019**

February 2018 - July

Sr. Business/Data Systems Analyst

Project:

The project aimed at **collating, testing and migrating** data for the **Loan Processing** Infrastructure from **Data lake** and create a new **Data Warehouse** by performing **data mapping**, creating **mapplets** along with **ELT** operations, developing **data transformation logic, normalizing** the data and loading them in **data marts** to support business which was aiming at improving **efficiency** and reducing the overall Loan processing costs.

Roles and Responsibilities:

- ❖ Worked with the team during the **source data exploration** to identify the source and group data like credit worthiness, financial solvency, mortgage transactions data along with understanding the **data structure, its interrelationships**.
- ❖ Identified the **GAP** between source and target data by performing **GAP Analysis** and also identifying the source of the missing data that was needed there by lessening the inherent **risks** and increasing the overall value thus increasing **ROI**.
- ❖ Performed **data assessment** to check for inconsistency, integrity of the data along with **data profiling** and **data validation**.
- ❖ Leveraged on **MS Access** to **collate data** from various sources and analyze them along with improving the quality.
- ❖ Worked in **SAFe** (Scaled Agile Framework) with scrum framework at team level utilizing **Kanban Visualization Board**.
- ❖ Organized **interviews, JAD sessions** for capturing the end attributes of **target data** like transactions, customer information, Debt to Income Ratios, Risk Scores.
- ❖ Captured and converted all requirements and analyzed **key points (KPI), pain points** and recommended optimum solution.
- ❖ Created a **Data Mapping specification artifact** by comparing **existing source system Data marts** to attributes of **target systems** and defining the transition rules by collaborating with the **SMEs**.
- ❖ Formulated the **Data Migration** approach by assisting **DB architects** in modeling **Bus Architecture**, preparing **ER** diagrams and **Schema** diagrams by leveraging **Lucid Chart** to comprehend data warehouse and relationship among tables.
- ❖ Collaborated with **Data Engineers** to **configure** storage with a **separate data mart** to receive data associated with borrower and co-borrowers from application, performed and documented it.
- ❖ Analyzed requirements in terms of the **dimensional data elements** and **measurable facts, grains** and also created **Proof of Concept (POC's)** for **ELT process**.
- ❖ Assisted in performing **Data Normalization** process to reduce **anomalies**, eliminate **data redundancy**.
- ❖ Actively involved in the **ETL** process using **Informatica Power Center** by assisting developers in designing **transformation logic**, preparing workflow sessions, and monitoring the process results.
- ❖ Leveraged **Informatica Workspace** like **Source Analyzer, Target Designer, Mapping Designer, Mapplet Designer, Transformation Developer** for transforming data from source to target.
- ❖ Actively involved in **testing** the **migration solution** in **small subsets** by ensuring the **mappings, transformations** and **data cleansing** routines are working.
- ❖ Responsible to review and approve any **changes to master data** in **production** along with making **audit trail** and **logs**.
- ❖ Integrated **OLTP** to the **OLAP** by using **SSIS/SSAS** as an **ETL tool** and used **SSRS** as a **reporting tool**.

- ❖ Used **Excel VBA** for Dashboard reporting purposes, data collection and prep up data for data analysis by creating Macros.
- ❖ Leveraged **SQL queries** for **ad-hoc reporting**, **source data exploration** and **research analysis**.
- ❖ Knowledge on **Continuous Integration Continuous Delivery Pipeline (CICD)** and worked along with **Dev Ops**.
- ❖ Validated **data quality** and **integrity** by assisting in operations like **drill down**, **roll up**, **slice** for **OLAP cubes** generated by **OLAP queries**.
- ❖ Assisted in creating a **Data backup plan artifact** for disaster recovery to ensure data is available to restore systems during emergency and non-emergency situations.
- ❖ Worked with the business in creating a **recovery and response action plan** to document the steps on recovery procedures to restore systems and data to ensure **business continuity**.
- ❖ Assisted in implementing various testing methods for **Disaster recovery** for multiple scenarios and documenting them.

Environment: Agile (SAFe) 4.0, Informatica Power Exchange, MS Access, Tableau, PostgreSQL, Lucid Chart, JIRAv7.0, Redshift, RDS, AWS Services.

MasterCard, O'Fallon, Missouri

January 2017 – December 2017

Business Systems Analyst

Project:

End-to-end Development and Implementation of a new **Payment Control and Budget Planner** feature for **small business cards**. Payment Control feature comprising **Auto pay**, **Payment Due Date**, **Geographical Area**, **Merchant type**, **Employee Access** and **Time or Day of the Week** was built to help small business. Budget Planner allows users to monitor and control expenses by deciding where, when and how the money is being used, thus avoiding overspending.

Roles and Responsibilities:

- ❖ Generated **questionnaires** with an exhaustive list of control questions based on **operational risk callouts**.
- ❖ Strong knowledge of **payment processors** and **PCI DSS**, **PA DSS**, **KYC compliance** involved with the project.
- ❖ Identified, measured and monitored **risks** involved within the technologies that enable **Mobile Financial Services (MFS)**.
- ❖ Created comprehensive **Detailed Finding Reports (DFR's)** to document findings within each **risk assessment** and **ROI**.
- ❖ Working to gather Requirements for migrating of Content from Portal to **Adobe AEM** and functionalities including Multi-site management and multi-channel management and **Digital Asset Management**.
- ❖ Provided functional and technical guidance in the form of demos and walk-through of **AEM Asset Management**, **Workflow**, **Portal Administration** and **Integration capabilities**.
- ❖ Worked with **Product Owners** to author the content in the **content management tool (AEM)**.
- ❖ Identified **GAP's** in the existing **As-Is** application and recommended possible areas of improvement in the **To-Be** system.
- ❖ Engaged with the **SMEs** to include or **de-scope** channels based on their existing **operations/functionalities**.
- ❖ Worked in a **Scrum Framework** facilitating **Requirements Elicitation**, **elaboration**, deriving **user stories** along with performing **Stakeholder Analysis**, **Feasibility study** and **Use case Narratives**.
- ❖ Helped Product Owner (PO) break down **Epics** and **Features** into **User Stories** using **Slicing techniques** and developing **MVP**. Worked with the Development team in proposing, negotiating **Definition of Done** and **Acceptance criteria** for **Potentially Shippable Product Increment (PSPI)**.
- ❖ Leveraged on **Jira** developing **user stories**, **backlog grooming**, **status reporting**, **burnup**, **burndown charts** and used **Confluence** for **collaboration**, **updating**, **document sharing** and **communication**.
- ❖ Took part in **scrum ceremonies** which included **Release Planning**, **Sprint Execution**, **Daily standups**, **Sprint Planning**, and **Sprint Retrospective meetings** with the team.
- ❖ Elaborated the **acceptance criteria** for **user stories** and assisted in Solution support to the scrum team.
- ❖ Leveraged **Power BI** for **ad-hoc reporting**, **visualizations** and **dashboards** to present to the stakeholders.
- ❖ Collaborated with the QA Team in developing and altering **the test cases**, **test plans**, **test scenarios** based on the requirements by the business and technical specifications in **UAT** using **MF UFT** along with test case automation.

- ❖ Maintained and backed different versions of documentation with **Concurrent Version Systems (CVS)** for future uses.

Environment: Agile (Scrum), JIRA7.0, MF UFT, MSVISIO, Confluence, MSSQL, Balsamiq Mockups, MS OfficeSuite, Power BI, AEM (Adobe Experience Manager), ZenDesk.

YES Bank, Bangalore, Karnataka

January 2016 - December 2016

Business Analyst

Project:

The project was deploying an **IAM tool** that involved in setting up the company's internal employee's **Identities, access requests, and approval processes** and shape the IAM program.

Roles and Responsibilities:

- ❖ Good understanding of leading **IAM concepts, lifecycle, process architecture** such as **Least Privilege, Privileged Access, Roles and Data Mining, Segregation of Duty (SOD), and Role-Based Access Control (RBAC)**.
- ❖ Coordinated with business stakeholders to identify the **Segregation of Duties (SOD)** and enforce that policy.
- ❖ Basic understanding of compliance and audit requirements for business governance like **SOX, PCI DSS, GBLA**.
- ❖ Execution of **role lifecycle processes like role definition, approval, retirement, role recertification, role maintenance**.
- ❖ Proficient in requirements elicitation, **test plans, scenarios, defect tracking**, and **any requirements churn**.
- ❖ Transformed business requirements into functional design specifications like **BRD, FRD, SRS** artifacts and created architecture diagrams, end to end process flow diagrams and sequence diagrams.
- ❖ Handled **Change requirements, Impact Analysis** followed by proper documentation for **Change and Impact Analysis**.
- ❖ Profound knowledge of **enterprise directory** like **Active Directory** and also about **LDAP**.
- ❖ Tracked and maintained stakeholder requests and changes using the **Requirements Traceability Matrix**.
- ❖ Leveraged on **SQL** for research analysis, ad-hoc reporting and a good understanding of **RDBMS** concepts.
- ❖ Ability to read, create and modify **UML** diagrams leveraging on **MS VISIO** and also review process flows for gaps.
- ❖ Heavily involved in **API** testing and created **API** documentation along with experience in XML message creation (SOAP).
- ❖ Leveraged on **Rational Requisite Pro** for requirements management and **Clear Quest** for bug tracking system.
- ❖ Built **complex business process workflows** and diagrams to depict business and system processes leveraging **MS VISIO**.
- ❖ Managed the **UAT process** by performing **smoke testing, test case validation** and obtaining **business approvals**.

Environment: Waterfall Scrum Hybrid, MySQL, MS VISIO, Rational Requisite Pro, Rational ClearQuest, Confluence.

**HSBC, Hyderabad, Telangana
2015**

February 2014 - December

Business Data Analyst

Project:

The project was an enhancement of the **Portfolio Management System** so that customers could access their accounts, evaluate their investments by **enhancing the Portfolio Dashboard**. This would enable **Performance Overview**, search for **stocks**, and a snapshot of **current trends** along with supporting **Asset Management, reporting, and tracking** for existing investors.

Roles and Responsibilities:

- ❖ **Elicited requirements** for **Portfolio System** which included **trend analysis, forecasting returns** and interfaces for **risk management**.
- ❖ Facilitated **JAD sessions** with the business users, developers and administrators along with **interviews** with stakeholders and performed **document analysis**.

- ❖ Predicted **portfolio's returns** using **Monte Carlo Simulation**.
- ❖ Created **data models** and **conducted normalization** and **de-normalization** of data to fit **OLTP** and **OLAP** frameworks.
- ❖ Leveraged on **Tableau** for creating **ad-hoc reports, visualizations** and **dashboards** and **KPI** reports.
- ❖ Assisted the QA team in writing **test cases, test reports, test scenarios** and taking part in **UAT testing** and tracked defects using **HP QC ALM**.
- ❖ Created **ER diagrams** and **UML Activity, Use Case Diagrams** by leveraging on **MS VISIO**.

Environment: Agile (Scrum), Python, R, Tableau, MySQL, JIRA, MS VISIO, HP QC ALM, MS Office Suite.

HSBC Hyderabad, Telangana

January 2012 to January 2014

Data Analyst

Project:

The project was to build and test a **reporting system** for the Institution which could help the management in supporting their decisions for their **Portfolio Management System**.

Roles and Responsibilities:

- ❖ Managed **metadata** and **modeled data marts** of different **transaction repositories, investments** and **finance**.
- ❖ Leveraged **Tableau** reports utilizing **Data Blending, multi-level hierarchy, Table Calculations, Parameters, Graphs**.
- ❖ Designed, developed and implemented **Power BI Dashboards, Scorecards & KPI Reports** of no of transactions.
- ❖ Project Lead accountable for providing strategic and tactical leadership to ensure full project **life cycle design, development, and implementation of database solutions**.
- ❖ Performed **due-diligence** with the existing data in the **data warehouse**, generated **ad-hoc SQL queries** and **transformation** rules to compare and evaluate the **prediction models**.
- ❖ Leveraged **Python** for **data manipulation, loading** and **extraction** using python libraries such as **Matplotlib, NumPy, SciPy, and Pandas** for **data analysis**.

Environment: Waterfall, Python, MATLAB, Tableau, MySQL, Excel, MS Office Suite.

Education: Bachelor of Engineering at Osmania University, Hyderabad, Telangana.
