EXPERIENCE

Program Director (Remote) May 2009 - Present
Resources for Improving Birth and Health Outcomes (RIBHO), USA/International
Oversee the development and implementations of community health and social service intervention programs for chronic disease prevention, food recovery and security, feeding program, community wide medical healthcare camps, secondary school student health promotion club engagement

Congregations for COVID-19 Prevention and Community Emergency Preparedness Response

March 2020 – Present

Resources for Improving Birth and Health Outcomes, USA/International

Emergency Response Intervention Consultancy (Remote)

In this new job, I have remotely engaged with 25 professionals and provided program development expertise in the following assignments:

- Conducting a rapid assessment and response to food insecurity and other social determinants of health during COVID-19, in over 700 households (April 2020 to Present)
- Developing, launching, and supporting the implementation of a mental health hotline averaging about 2750 calls in 5 weeks (April 2020 to Present)
- Working with 10 local congregations and 4 community based organizations engaged in caring ministries to prepare and facilitate safe and effective interventions during the COVID-19 pandemic (March 2020 to Present)

Epidemiologist (Remote)

- Overseeing emerging public health programs and or practices, including data collection, data management, statistical analysis
- Health care planning, surveillance, and community health improvement (physical health monitoring and planning care for all home-based care patients, and their care takers).
- Investigating COVID-19 disease risk factors, and mode of transmission related behaviors in the general population.
- Developing, planning, administering and supporting community health worker adherence to infectious disease prevention health safety standards
- Providing expertise in the design and implementation of faith-based community organization emergency preparedness plans, protocols and policies
- Providing expertise in the design, management and evaluation of study protocols and health status questionnaires, sample selection and analysis for COVID-19 community awareness, food insecurity and other social determinants of health.
- Consulting with and advise physicians, educators, researchers, faith-based leaders, government health officials and others regarding medical applications of sciences in COVID-19 related biology and treatment, and social sciences related to its spread and prevention.
- Providing telephonic and electronic technical consultation to public health professionals, healthcare providers and the general public on the epidemiology of infectious disease outbreak investigations
- Coordinating data collection with local health partners
- Collaborating in active public health and emergency preparedness and provide appropriate prevention, control and health promotion measures
- Creating, maintaining, and distributing databases using applications such as SPSS, Excel, Access and EpiInfo.

Team Lead, Community Health Intervention Research Projects

April, 2011- Ongoing

Resources for Improving Birth and Health Outcomes, USA/Uganda

- Assisting Community Based Organization leaders with data focused analytical thinking for improved planning, monitoring, evaluation, and reporting of nutrition, chronic disease and mental health programs.
- Designing, developing, training and supporting data collection tool use, providing data analysis training and use at all stages of the development programming cycle.
- Acquiring, processing, managing, and analyzing data from a range of sources for improved decision making.
- Leading and conducting trainings to improve the skill sets of field staff in the areas of data collection, management and analysis through statistical software packages Excel and SPSS
