

DINESH REDDY

dineshjavadev19@gmail.com • Durham, NC

SUMMARY

- Programming experience in the software development life cycle (SDLC) process including requirements gathering and analysis, design, system/technical specifications, development of interface and implementation of Distributed, Client/Server E-Commerce application using Java/J2EE and RDBMS.
- Proficient with Software development methodologies like Agile and Waterfall.
- Proficient in Java technologies like JSP, Java Servlets, Java Beans, Models, Struts, Spring API, Hibernate, XML, JMS, JNDI, Web service.
- Extensive Design, implement and test services experience in a Micro Service-oriented architecture and has implemented the REST based Microservices using the Spring Boot, Spring Data with JPA (Java Persistence API).
- Hands on experience in creating components using React.js
- Good experience in creating components documentation using react.js
- Experience in working with Cloud technologies like AWS and Cloud computing infrastructure such as Amazon Dynamo DB, Amazon SQS and Redshift.
- Good knowledge in Configuring, Monitoring and automating Confidential as well as involved in deploying the content cloud platform on Confidential using EC2, S3, SQS, SNS and EBS.
- Proficient in developing GUI using CSS, HTML, Java Script, JSF/Prime Faces, JQuery, Bootstrap JS, React JS, Angular 1/2/4, NodeJS and Python
- Developed web-based enterprise applications using Core Java (Multi-threading, Inheritance), J2EE, Servlets, JSP, JSF, JDBC, Hibernate, Web Services (SOAP and REST), MVC Framework (Struts, Spring API MVC) and SQL.
- Strong background in Java/J2EE environments. Worked extensively on J2EE for developing Web and Distributed Applications by using JDBC, JSP, Servlets, Hibernate, XML, Struts and Web Services. Well experienced in MVC architecture and Struts framework.
- Expertise in application and web servers such as Apache Tomcat, IBM WebSphere, JBOSS and Oracle Web logic.
- Knowledge of Object Oriented Design (OOD) and Analysis (OOA) based on Unified Modeling Language (UML) architecture using Rational Unified Process.
- Proficient in implementing various Java design patterns like MVC, Session Facade, Data Access Object (DAO), Factory, Singleton, Data Transfer Object, and Front Controller.
- Extensively worked with Eclipse debugger on debugging.
- Experienced with JAX-RS specification like Jersey to Implement REST based applications.
- Proficient in XML technologies like XML, DTD, XSD, XSLT, JAXB and JAXP (DOM & SAX).
- Experience in implementing client-server business applications using Microservices, Designed and developed Microservices business components using Spring API Boot.
- Strong knowledge in JAVA Messaging Service (JMS) and equivalent tools like TIBCO messaging service
- Experience working with Databases like MySQL, Oracle.
- Developed Ant, Maven scripts to build and deploy J2EE applications.
- Expertise in designing and developing with automated testing using Junit, Selenium.
- Knowledge on pulling dependencies from different repositories.

- Expertise in version control tools like SVN, CVS, GITHUB, and Atlassian products like bitbucket, confluence.
- Expertise in using IDE Tools like Eclipse, Net Beans, IBM Rational Application Developer (RAD) for Java/J2EE application development.
- Good knowledge on cloud environments like AWS and its services like EC2, Dynamo and SQS.
- Good understanding of Business workflow, Business logic and Business methods for further implementation of user requirement in a distributed application environment.

SKILLS

- **Languages :** C, C++, JAVA JDK 6/7/8, J2EE, HTML, SQL, PL/SQL and python
- **Operating systems:** Mac, Linux, UNIX, Windows 10/8/7/Vista/XP
- **Java/J2EE Technologies:** Servlets, JSP, JSTL, JDBC, JMS, JNDI, RMI, EJB, AWT, Applets, Multi-threading, Java
- **Java Frameworks:** Spring MVC, Struts 2.0, JSF
- **Application/Web Servers:** WebLogic, IBM WebSphere, JBoss, Tomcat
- **ORM Frameworks:** Hibernate, JPA, Ibatis
- **Web Technologies:** JSP, JavaScript, JQuery, AJAX, XML, XSLT, XHTML, DHTML, CSS, SASS, LESS, HTML, AngularJS, React JS, Ext JS, backbone JS.
- **Spring Framework:** Spring IOC, Spring Batch, Spring Boot, Spring Security, Spring MVC
- **Database Server:** MySQL, Oracle, DB2, SQL Server, MongoDB, Cassandra
- **IDE :** Eclipse, RAD, WSAD, NetBeans, IntelliJ
- **Web Services:** REST, SOAP, JAX-WS, JAX-RPC, JAX-RS, WSDL, AXIS
- **Version Control:** GIT, CVS, SVN
- **Build Tools:** ANT, Maven, Gradle, Grunt, Gulp
- **Methodologies:** Agile, Scrum, Water-Fall, Rapid Application Development
- **Modeling Tools:** Microsoft Visio, Rational Rose
- **AWS :** EC2, S3, EBS, CLI, Route53, Dynamo DB, RDS, VPC, ELB, IAM
- **Testing:** Junit, Jasmine, Karma, Selenium, Jenkins, Docker
- **Tools:** Apache Camel, ESB, cucumber

EXPERIENCE

Sr. Java Full Stack Developer

Client: BCBS | NC | Aug 2019-Current

- Proficient in various technologies like Core Java (Multi-threading, collections), JSP, Servlets, JMS, JDBC, SOA, XML, XSD, DOM, SAX, XSLT, Web Services, JSF.
- Experience in Cloud Computing Infrastructure using Amazon Web Services like Amazon IAM, EC2, EBS, VPC, S3, Lambda, RDS, Route 53, Dynamo DB, Auto Scaling, ELB, Cloud Watch and SQS.
- Expert in HTML5/CSS3 development and have experience React.js, angular.js, Responsive design.
- Used various bootstrap components like accordion, date picker, time picker, alert, buttons, modal and also react-bootstrap components.
- Strong technical skills in the areas of web applications using HTML5, CSS3, JavaScript, AJAX, JQuery, JSON, AngularJS 2, Angular JS 4, and ReactJS.
- Extensive experience with JavaScript frameworks like AngularJS 2, Angular JS 4 and familiar with other frameworks/libraries such as Node.JS
- Using Node Package Manager (NPM) to install the necessary packages from my application using Node.JS.

- Strong knowledge of building and architecting Single Page Applications (SPAs) using various frameworks like AngularJS 2, Node.js, and Bootstrap.
- Experience in implementing the various services using Microservices architecture in which the services working dependently, implemented Spring Boot Microservices to divide the application into various sub modules.
- Proficient in working on java related Frameworks like Struts 1.x/2.x, Hibernate, JPA, iBatis, and spring (IOC, DI, Spring ORM, Spring JDBC, Spring AOP, Spring Transaction, Spring Batch, and Spring Security).
- Experience in development of Enterprise Java Beans including Stateful Session Beans, Stateless Session Beans and Message Driven Beans.
- Good working knowledge on data bases like MySQL, Oracle, Sybase, and DB2.
- Design and implement the data modernization project pipeline using AWS
- Create a Java Lambda that watches an AWS S3 bucket, and triggers a SOAP request when a new file has been detected
- Create a Lambda job to move files from AWS S3 to Glacier.
- Creating S3 buckets, Utilized S3 bucket and Glacier for storage and backup on AWS.
- Create a Lambda that triggers a REST call to trigger the logical validation errors email process model in Appian.
- Create a Lambda that triggers a REST call to trigger the duplicate and valid values error email process model in Appian.
- Create a Lambda that triggers a REST call to trigger the invalid column format error email process model in Appian.
- Involved in Scrum meetings.
-

Environment: Java, J2EE, Java Script, JSP, HTML, CSS, XML, SOAP, Hibernate, MySQL DB, Spring API Boot, spring boot, PL/SQL, Log4j, JQuery, Angular JS, React JS Eclipse, IBM Web Sphere Application server.

Sr. Java Full Stack Developer

Client: UPS | Atlanta, GA | Jan 2018-July 2019

- Provided Enhancement to the existing application in the system as per business requirements. Identifying all technical and other problems related to the change requests.
- Responsible for the Requirements Analysis for development of design artifacts such as sequence, collaboration and class diagrams. Technical and process documentation and making sure the documentation is up to date.
- Designed and developed various Web forms using HTML, CSS, Bootstrap and JavaScript, ReactJS.
- Developed UI screens for major module using ReactJS, HTML5, CSS, Bootstrap and JavaScript.
- Expertise in using ReactJS and RESTful web services and implemented connection pooling for database access.
- Involved in developing conversion of Mainframe application to Web application.
- Created documentation for all the components which is included in React-Bootstrap page.
- Developed web tier using JSP, HTML and JavaScript. Client validations using JavaScript, JQuery and Java classes for business layer.
- Develop various screens for the front end using React JS and used various predefined components from NPM (Node Package Manager) and React Redux library
- Architected, designed and implemented a SPA (Single Page Application) in AngularJS2, Node Js which consume JSON from a Spring API MVC, using Spring API Security to secure the Application
- Developed Web Services using Rest, WSDL, JAX-WS to develop client classes.
- Developed the necessary helper classes, EJB Session Beans, Message driven beans for implementing Business Logic.

- Developed Driving Record PDF using iText
- Created Batch Processes, runs every day to produce Driving Records from Mainframe.
- Developed Unit and Integration testing of the application using JUnit Framework to ensure Quality Assurance.
- Developed Maven Scripts to build WAR/EAR files for the application.
- Deployed the application on JBoss.
- Experience on middleware technologies like JIRA and its tools like bitbucket
- Provided production and maintenance support for the client.
- Created Project Implementation Plan for production releases and support production release checkouts.

Environment: Java, EJB, JSP, Struts, Servlets, JDBC, Hibernate, JUnit, JBoss6.1, Maven, MQ Series, SQL, JQuery, JavaScript, React JS, HTML, CSS, XML, XSD, XSLT, WSDL, iText, Windows, UNIX.

Java Full Stack Developer

Client: Verizon | NJ | Jan 2017-Dec 2017

- Responsible for analysis, design, development and integration of UI components with backend J2EE.
- Used Spring API bean factories and dependency injection mechanisms.
- Developed persistence module using JPA and Spring API Jdbc Template.
- Designed, developed and tested business tier using JDK1.6 and Spring API.
- Developed External style sheets (CSS) to bring rich look to the application.
- Involved in coding webpages using JSP and servlets.
- Used JDBC to Communicate with Database.
- Deployed the application on Glassfish application server.
- Retrieve data from server and display in the application.
- Designed and developed front-end using Servlets, JSP, DHTML, Java Script, AngularJS, NodeJS and AJAX.
- Used Data Binding properties to bind the data which is retrieved from J2EE server
- Implemented Flex Layout and Navigation, Asynch Event Handling – Popup Dialogs, Menus and Skinning.
- Designed and Developed Stored Procedures, Triggers in Oracle to cater the needs for the entire application. Developed complex SQL queries for extracting data from the database.
- Utilized Design patterns MVC, VO, DAO, Factory, Singleton
- Maintained a separate DAO layer for CRUD operations.
- Used SVN for source control repository
- Developed Unit Test Cases with JUnit.
- Built test harness module with JUnit, Mockito for creating unit tests and integrated with Ant build.
- Involved in Module Testing and Integration Testing.
- Involved in unit testing and integration testing
- Used Log4j for logging to trace the errors.

Environment: Java, J2EE, HTML, MVC, JavaScript, JSP, Servlets, Spring API, CSS, UML, XML, Eclipse 3.4, CVS, Log4j, Apache Ant, Apache Maven, Macromedia Dreamweaver 8, Oracle 10g, SQL

Java Developer

Client: Bank of America | HYD, IN | Jan 2012-July 2016

- Involved in requirement gathering, technical design, and exploration of various technologies, prototyping, benchmarking, and documentation and authoring technical specifications.

- Prototyping and development of modules like personal profile, registration, creating web service for the modules for the unified web application.
- Prepared test cases for the Application for System and integration testing
- Involved in bug fixing and documentation of Lessons Learnt and Best practices.
- Integrate with Oracle 10g database through JDBC
- Established and monitored the process for quality management
- Facilitated communication within the project team.
- Integrated the 2 applications through SOAP web services and utilized the functionality of the jar and war files.
- Studied the in-house project that is developed on Struts MVC framework.
- Designed and developed Service layer and Web-Tier using Struts framework.
- Involved in designing and implementation of MVC design pattern using Struts framework for Web-tier.
- Implemented entire application in Spring API MVC design framework.
- Extensively used various J2EE design patterns like Factory, Singleton, Data Access Objects, Data Transfer Objects, Business Delegate and Session Façade in the project, which facilitates clean distribution of roles and responsibilities across various layers of processing.
- Built SOAP Web services interface implemented in Java using Apache Axis and SOAP.
- Involved in the development of presentation layer and GUI framework in JSP, HTML and client-side validations were done using JavaScript.
- Used Spring API-Hibernate to integrate with Oracle database.
- Involved in production support, assigning production issues and enhancements
- Understanding the requirements and Product functionalities
- Analyzing Requirements and Designing the Functionality of the product

Environment: Core Java, HTML 4.0, Struts, JavaScript 1.5, JSP 1.2, Servlet 2.3, Spring API 3.0, Eclipse, Tomcat, JavaScript, HTML, Servlets, CSS, XML, JSP, SOAP, Oracle 10g.

EDUCATION AND TRAINING

Bachelors in Technology: Electronics and Communication Engineering

Jawaharlal Nehru Technological University | Hyderabad, India

Masters: Computer Science

SUNY Polytechnic Institute | Utica NY
