Professional Summary

- Visionary, Results-driven, Innovative Technical Leader, Self-Motivated and strong drive to succeed in a collaborative small or large size environments with Masters Degrees in Computer Science and Applications with overall **22+ years** of hands-on experience working as **Director- Software Development, Agile Software Development Manager, Technical Lead, Architect, and Principal Software Developer.**
- Significant experience guiding business through scope and requirements definition for multi-million dollar projects that involve application development/QA/Business Process Improvement/IT Operation resources.
- Senior leadership in establishing IT strategy, goals, and priorities for large and small companies. Key strengths include hands-on and leading architecture, design, development, and deployment of large and complex products by making appropriate changes as needed along the way, by creating a culture and work ethic that is needed to groom and mentor teams which will maximize efficiency and team performance in the organization.
- Oversight of software engineering practices and metrics across the entire organization. Working with development leaders across the business to ensure a consistent set of best practices and processes. Manage and mentor globally distributed engineering teams, ensuring the most effective roles and team structure to respond to ever-changing business needs.
- Manage software development lifecycle in an agile delivery environment focusing on continuous delivery at pace while maintaining the quality and performance of software products and services.
- Establish effective measures that allow teams to continuously improve across software delivery, software quality and operational costs, drive operational excellence including performance and resiliency, monitoring and metrics and incident response.
- Exceptional technical background in Software Engineering with my continuous keep up with the latest industry trends and track record of hiring and maintaining top talent with the continuous enforcement of my leadership skills of being a compassionate yet assertive and vision oriented leader.
- Work effectively and efficiently across multiple teams and organizations building strong mutual partnerships with Project Management, Operations & Support, Design, Research, Sales and other engineering teams and leaders
- People and Project Management - Identify and recruit talents to ensure effective mix. Building and maintaining motivated team. Manage and Encourage new ideas from staff to foster improvements through innovations. Hiring/Firing.

Specialties Include

Strong Technical Leader, Integrating, Managing, Leading software projects with teams spanning across multiple continents involving complex technical aspects and communication at various levels of management; vast experience in managing multiple projects from legacy platforms to new web based applications; Agile Software Development Manager, Technical Delivery/Team Lead ,Architect, Software development and System Analysis; Software System design; Agile project management; Scrum master; Customer facing roles during product/feature deployment phases; Interviewing, hiring, firing; Team building and Team mentoring.

TECHNICAL SKILLS

Programming Methodologies	: REST,SOAP, MVC architecture, Agile programming, OOAD, SOA
Web Programming Languages	: ASP,JavaScript, VB Script, HTML, DHTML, XML, XSLT
Languages/Framework	: C#, C++, C, Tcl/Tk , COBOL, Java(SE, EE), JavaScript, JSP, JQuery, Bootstrap, Angular.js, Knockout.js, Ext JS, Google Guice, MQSeries, PHP, Laravel, SOA, Jersey library, Rest Assured, Visual Basic, Perl, Shell Scripting, XML, XSL , Node.JS, Python
Operating Systems	: Windows, Linux, Solaris, OS2
Enterprise APIs	: Servlets(2.0), JSP, JDBC.
RDBMS	: SQL Server, Sybase, Oracle, PL/SQL , Postgress SQL, MySQL

Web Servers	: IIS 6, NES 4.0 and Java Web Server 2.0
Application Servers	: IBM WebSphere
Microsoft Technologies	: Visula Studio.NET Framework (2010), ASP.NET 4.0, ADO.NET, AJAX, WCF, MVC, LinQ, Sharepoint, EF 4.0
Version control Tools	: Microsoft Team Foundation System(TFS), Visual Source safe(VSS), Perforce, Visual Source Safe, Clear Case, Apache Maven, Jenkins, uDeploy
Other Tools	: Rational rose, Crystal Reports (11), JIRA(PM Tool), Rally, IBM Watson
UI Tools	: Telerik, DevExpress, Erwin, Eclipse, IntelliJ, SOAP UI, Jnui & Jasmine (Unit Test), Karma(Test Runner), Protractor (E2E regression teting), Log Mining(Splunk), Logging(Log4j), ColdFusion
Cloud Technologies	: Amazon Web Services (AWS)
SDLC	: Agile methodology, Scrum framework, Traditional waterfall, Continuous Integration and Test Driven Development
Design/Process	: OOAD, Design Patterns, UML

Honors and Awards

Women in Technology Leadership Award: In recognition of excellence in Leadership in Technology with traits of **GRIT, Perseverance** and **Service Mentality**.
ECS Ltd., July 2019

Engineering Lead Excellence Award: In Recognition on the outstanding achievement in Leading IxLoad-LTE Access project from design to deployment.
IXIA, Dec 2014

Hackathon Award: In recognition of passion and hard work on the Hackathon Idea and implementation – Visual Representation of LTE UEs State and Location.
IXIA, July 2013

Engineering Star Award: In Recognition of outstanding achievement in Product Development and Design of IxLoad eNB project.
IXIA, November 2011

Technical Excellence: In Recognition of integrating key DCT Components with Ixia core framework during merging of Catapult components with Ixia Components to design integrated product.
IXIA, Sep 2010

Engineering Award: In Recognition of outstanding support and efforts on Test bench Program.
IXIA, April 2009

Engineering Excellence Award: In Recognition of outstanding technical contribution to OS2 wrap project.
IBM Global Services, Dec 1998

EDUCATION

Masters in Computer Applications and Technology
Bachelors in Computer Science (Major), Applied Mathematics (Major), Physics (Minor), Life Sciences (Minor)

PROFESSIONAL EXPERIENCE

ECS Limited, Raleigh NC

September 2016 – Till Date

Director, Software Development:

Heads, plans, oversees, and coordinates the operations of Software Development and Product departments managing managers, leads and architects. Heading Software Development department consisting for multiple agile software development teams, Business Analyst team and QA Teams working towards the goal, and operating objectives of delivering software projects within timeframe and budget. ECS has 70+ offices across USA. Heavily involved in migrating 30+ year old ECS legacy desktop applications panned across different offices into integrated web based platform. As a Director of Software Development department, works in overseeing the SDLC and enforce its execution using agile methodologies. Started my team with development team of 3 developers and grown it to about 20+ developers with an overall of 50+ members IT team.

- Monitors all aspects of the Software Development Lifecycle and Production Support, ensuring high level of technical delivery of applications including new functional releases, maintenance and product integrations during acquisitions.

- Partner with Senior Leadership in ECS, like business, key stakeholders and ECS Board of Directors in setting expectations and produce quality releases.
- Work with ECS user community in building relationship where they feel comfortable sharing user perspective to applications developed.
- Involve in estimating, planning and executing the Projects and Products as required.
- Involve in Architecting and monitoring development of our next generation software solutions with Continuous integration and delivery.
- Mentor, inspire and influence the department in delivering technology enabled business solutions that meets business needs.
- Promote and defend technical vision to ECS board of executives.
- Promote and Participate in the improvement of internal development processes.
- Empower the staff to encourage new ideas and to be accountable and responsible for their own actions and decisions.
- Seek diverse ideas and perspectives from a variety of sources to create better solutions, products, and services.

Environment: Technology stack: ASP. Net, MVC, Web API, C#, Swagger, EF 6, AutoMapper, JS, Angular JS, Node.JS, Nunit/Jasmine, Delphi 7, Jenkins, TPL, ColdFusion **Other tools:** TFS, GIT, BitBucket, Visual Studio 2017, Visual Studio Code, Confluence, SwaggerDiff, Splunk, Accurev, SQL Server, AWS cloud and SaaS environment, Microservices, Agile methodologies (SCRUM and Kanban)

Fidelity Investments, Morrisville NC

January 2014 – September 2016

Sr. Software Development Manager:

Software Development Manager, managing Multi-Million dollar High Network Investment products with responsibilities including –

- Managing Cross organizational delivery teams for the entire Product lifecycle. Responsible for Budget, Resource management, team formation from scratch and End to End delivery of the Portfolio interfacing with multiple technologies and organizations.
- Managing, Leading and mentoring development & QA teams through challenging technologies, architecture and multiple development cycles.
- Hands-on Design, Development, debugging of multilayered software.
- Acting Scrum Master of my development & QA Teams as needed.
- As a delivery lead acted as single point of bridge between Engineering, Architecture, and Product Management and Business groups.
- Interviewing and Recruitment, Team building, Team mentoring and personal management. Making Hiring and firing decisions.

Environment: Bootstrap, Angular.js, Java script, HTML5, Java, Jersey library, Rest Assured, Log4J, Junit, Jasmine, Karma, Protractor, Sonar, Jenkins, Git/Stash, Web Services(SOAP, Restful), Data Serialization frameworks, SOA.

Ixia Communication, Morrisville NC

January 2000 - December 2014

Software Development Manager/Software Development Leader/ Solution Architect

Leading with hands-on Architect for a multi-disciplined team of Software and QA engineers spanning across 3 countries and 5 geographical locations delivering LTE and LTE-Advanced wireless test solutions for the service provider and network equipment manufacturer (NEMs) market. World-wide markets are served including the Americas, Asia, Europe and the Middle East. Over the span on 14 years with IXIA was involved with multiple successful releases of multiple products developed and released on time with quality under my leadership.

Responsibilities include:

- Leading and Software Development and Deployment at customer sites.
- Driver of all aspects of the product development life cycle including feature definition along with Product Management, project planning and execution, System architecture, software design and software development (including embedded, GUI, Middleware applications and Database), QA, technical documentation and customer deployment and customer support.
- During various acquisitions, leading integration of different tools and products. As an Architect of these integrations, was involved in interacting with different teams of these multiple products to understand these products, technologies involved and then identifying integration end points of each of the products.
- Training and leading my team on these multiple product lines. Leading this team to come up with a design of integrated solution.
- Hands-on Design and Development of the different product lines.
- Scrum Master of my team. Involved in running daily scrums, unblocking daily roadblocks, defining and re-defining sprints as per the product requirement flows, forming sprint teams and identifying tasks for each of the engineering.
- As Delivery lead was single point of contact between Engineering - Product Management, QA and deployment teams.

Environment: C, C++, Ruby, Python, C#, Java (SE, EE), Eclipse, JavaScript, PHP, MySQL, Perl scripting, VS 2014/2013, HTML5, Linux, Solaris, Windows, Apache webserver, Laravel, MVC design patterns, JSP, Bootstrap, Angular.JS, Knockout.js, Ext JS, JQuery, SaaS Environment, Google Guice

Swift Technologies

May 1999 – January 2000

Principal Software Consultant

As a consultant worked on multiple projects at different client sites.

- Web/ecommerce applications to support Healthcare and Retail clients.
- As IT **Software contractor** at **IBM**, was involved in project OS2 project to provide a 32-bit API for native programs, by converting 16-bit code and drivers. It also included a new OOUI (object-oriented user interface) called the "Workplace Shell".

Responsibilities Include:

- Leading Design and Development of different software applications projects from various clients.
- Hiring and training Engineering resources within organization and managing offshore and onshore teams.
- Handling communications with multiple teams across globe at the client sites for formalizing requirements and communicating back to product development and finance within Swift Technologies

Environment: C, C++, C#, J2EE, Java, .Net, ASP, JavaScript, Oracle, HTML, Visual Basic. OS2, Windows, Solaris, SQL Server

IBM Global Services

October 1996 – May 1999

Software Development Lead:

Leading design and development of Kernel Debugging on OS2 Wrap Operating system with multiple projects involved in releasing OS2 Wrap 3 and Wrap4.

Environment: C, Java, OS2, DB2, Linux,
