

JAXA TRIVEDI
IT BUSINESS ANALYST
(972) 656-9168 - Jaxat622@gmail.com

PROFESSIONAL SUMMARY

- An IT professional with over 7 years of experience in the areas of Business Analysis, JAD sessions, stakeholder interviews, Business Process Management, risk analysis/management, data analysis, UAT, and Project management
 - Expertise in multiple Software Development Life Cycle - Waterfall, Hybrid, Rational Unified Process, and Agile methodology.
 - Efficient in writing Business Requirements Documents (BRD), System Requirements Document (SRD), Use Case Specifications, Functional Specifications, and Technical Specifications across the Deliverables of a project.
 - Have good exposure to QNXT for claim processing.
 - Strong knowledge working on all the environments of QNXT which includes the Test Environment, Development Environment and Production Environment
 - Extensive Experience in UML and Process modeling using Use Case Diagrams, Process Flow Diagram, System Context Diagram, Activity Diagrams, and Sequence Diagrams.
 - Experienced in conducting Joint Application Development (JAD) sessions through interviews and workshops with subject matter experts and business users.
 - Experienced in conducting GAP analysis, User Acceptance Testing (UAT), Risk Analysis and mitigation plan, Cost benefit analysis and ROI analysis.
 - Performed AS-IS and TO-BE business process flow for clear translation of Functional to system requirement specification.
 - Support the Test Team and the rest of the Development Team in compliance related issues while working with them in the development phases of the projects.
 - Experienced in various MS Windows platforms, OS, Office Suite, etc.
 - Excellent knowledge of Health Insurance Portability and Accountability Act (HIPAA) transaction, code set rules such as EDI 837, 835, 834, 270, 271, and 277.
 - Extensive knowledge of Medical Management Information Systems (MMIS), Medicaid, Medicare, Procedural and Diagnostic codes, and Claims Processes.
 - Strong knowledge of Health Insurance Portability & Accountability Act (HIPAA) standards, Electronic Data Interchange (EDI), Implementation and knowledge of HIPAA code sets.
 - Strong knowledge of Health Insurance Plans, managed care concepts (Medicaid and Medicare) and experienced in determining the membership eligibility, billing experience within life and disability in health plans.
 - Excellent knowledge of HIPAA standards, EDI (Electronic data interchange)
 - Quick learner, detailed-oriented team player with good communication, analytical, leadership, interpersonal, and problem-solving skills.
 - Experience in multi-tasking such as managing numerous simultaneous projects with great attention to detail.
 - Experience in solution assessment, validation and applying critical thinking for problem solving approach.
-

PROFESSIONAL EXPERIENCE

HealthAxis Group - Lubbock, TX
Business Analyst

March 2018 to Present

The project was related to Build Provider Agreements for Medicaid/Medicare/DME/SNF types along with to build Benefit Plan for Commercial, Medicaid Plans.

Responsibilities

- Reviewed all Medicaid / Medicare agreements, changed if there is change in rates with eff dates
- Documented all provider rates and reimbursement methodologies

- Coordinated with QNXT implementation analyst on validating provider rates and reimbursement methodologies
- Worked with Claims Configuration to ensure provider contracts are accurate based on the contractual obligations,
- Developed an expertise in provider data, reporting, fee schedules, contracts, capitation, vendor setup and member assignments in the QNXT claims platform.
- Coordinated with the developers and IT architects to design the interface of the new system according to the X12 (834, 835, 837 (I, P, D) standards.
- Assisted with the development of internal policies and procedures with regards to QNXT ensuring compliance with nationally accepted accreditation standards
- Worked closely with the implementation team to validate provider mapping and contract configuration.
- Validated configuration through various claim scenarios and quality processes.
- Worked closely with all levels of personnel at the client site.
- Provided ongoing support and mentoring of staff, in addition to performing periodic performance review.
- Performed a wide range of claims testing scenarios in order to ensure proper configuration and claims payment.
- Worked closely with other client-based testing and configuration staff.
- Configured Providers (IPA, Group Practice and Facility), agreements for group practices, and pricing into the provider agreements
- Involved in load and maintenance of QNXT Reference information: Claims Finance Codes, Medical Codes, and Configuration.
- Involved in overall System updates and testing: loading and updating Fee Tables, Provider Configuration, Provider demographics, Service group configuration etc.
- Contract Configuration - creating new contracts of all types (Facility, Physician, DME, ASC, SNF, DRUG)
- Contract Type (Medicare, Medicaid, Commercial..etc) and enhancing existing contracts with knowledge of various payment methods, Custom DRG, Per diem, etc.
- Use of Term Restrictions and Restriction Groups in Contract/Benefit Modules.
- Benefit Configuration - setting up new Benefit Plans, making changes to existing benefit plans in the all areas including co-insurance/co-pay, deductible, out of pocket maximum, accumulators.
- Resolving Service Groups with benefit terms and addition of service groups to all Plans.
- Analyzed changes across all benefits plans (e.g: SNF to all Plans, benefit terms, contract and contract terms) in order to configure complete solutions for Medicare (example changes in RBRVS rates) and Medicaid
- Provided changes to configuration, to support various line of Business, were done prior to migrating to PROD.
- Ensured correct pricing/configuration of each benefit plan and contract
- Helped create Reports for reporting of errors and fault finding.
- Undertook fault-finding and process improvement with technical and non-technical users and ensure that provider groups and individual providers are entered and setup in the QNXT system so that other downstream processes will function effectively.
- Reviewed the range of approaches used to undertake key tasks such as; adding providers, or configuring provider groups and then develops written guidance and training materials.
- Participated in and lead groups in operational fault finding and remediation for providers in the QNXT application.

Environment: RUP, Rational Rose, Requisite Pro, MS Visio, RUP, MS Project, SQL, Oracle, MS Access, MS Excel and MS Word.

Molina Healthcare - Long Beach, CA
Associate Business Analyst

October 2017 to February 2018

- Oversee and perform User Acceptance Testing (UAT), test plan, timeline and peer script reviews.
- Schedule and prioritize tasks to meet target schedule, quality, scope, and cost objectives.
- Work closely with business management and vendors to develop requirements for major projects with considerable complexity.
- Analyzed and reviewed the claims processing in QNXT and monitor the efficiency, and auditing of the claims and process.

- Responsible for testing ITS claim functionality within QNXT for all lines of business.
- Communicate testing progress, issues, results, and other relevant information to project stakeholders/team and management in a daily or weekly basis as necessary.
- Create and mock up test data (EDI format and QNXT UI) according to business requirements and system collaborating with IT Developer.
- Develop test documentation including, but not limited to, test scripts, cases, plans, timelines, and scenarios for projects.
- Document test case execution, test results, and defects in detail (SharePoint).
- Analyze, track, and manage testing issues and defects to resolution (HP ALM Quality Center 12.1).
- Perform peer review for a final UAT sign off for any new QNXT system deployments.

Community Health Choice - Houston, TX

January 2015-October 2017

Business Analyst/EDI Analyst

The scope of this project included HIPAA 4010 conversion to HIPAA 5010. The change affected all the major EDI transactions including 270/271, 276/277, 820, 834, 835 and 837.

Responsibilities:

- Analysed existing business units, business/Application and their Interfaces with their capability through open-ended discussions, brainstorming sessions, and prototyping, prioritizing them and converting them as business requirements that must be included while developing the software.
- Created Data Flow Diagrams (DFD's), ER diagrams for data modeling and web-page mock-ups using MS - Visio for acceptance from end users.
- Experience in Data Warehousing; responsible for data mapping activities including maintaining mapping
- Analyzed data and created reports using SQL queries for all issued Action Items.
- Experience working with ETL specifications and ANSI X-12 data translations
- Define business requirements and business process and policy changes related to the client Medicaid system during the conversion from the existing HIPAA 4010A formats to the future HIPAA 5010A format
- Analyze and document Medicaid EDI transactions issues related to implementation of HIPAA 5010 and ensure these issues are documented and addressed in the approach to the HIPAA 5010 version.
- Converted the XML files into X12 and X12 to XML files on GIS for sending and receiving the EDI files.
- Also worked on multiple 837s and multiple Eligibility (270/271) and healthcare claim status (276/277)
- Responsible for the development and implementation of HIPAA EDI Map sets 270, 271, 276, 277, 820, 834, 835, 837 and 5010.
- Reviewed the application systems and determined how to map the new applications data to the EDI System.
- Create EDI interface to send purchase order requests and receive acknowledgments and invoice data.
- Mainly assisted with documenting processes, used agile methodology to write the System Requirements documents and designed Functional specifications.
- Conducted UAT. Wrote SQL queries in MS Access and Oracle for data manipulations.
- Used Agile and Rational methodology in the project development for Rational Test Suite for various phases of RUP.
- Proficient with QNXT claims processing platform.
- Developed Use Cases, Use Case Diagrams, UML Diagrams, Activity Diagrams, Sequence Diagrams, Class Diagrams in Rational Rose

McKesson - San Francisco, CA

March 2012 to Dec 2014

Jr. Business Analyst

Worked on the requirements for the Medication Administration module of this application, this part of the application is used by Nurse/Physicians to chart the administration of various regimens and drugs. This data get its feed from the Ordering module and feeds back into the Charting and Billing modules. Aspects include functional, usability, reliability, and supportability of the updates.

Responsibilities:

- Teamed with clients to gather requirements; changed into Epics and later to User stories; translated into

- functionality. Liaised with end-users during UAT.
- Helped user experience team to understand the requirements for wireframes
 - Created workflow diagrams using Visio.
 - Wrote User acceptance for user stories via Jira.
 - Handled issue log & tracked to closure; reviewed & managed all change control requests and liaised with end-users during UAT.
 - Consulted with functional unit management and personnel to identify, define and document business needs and objectives, current operational procedures, problems, input and output requirements, and levels of systems access.
 - Acts as a liaison between end-users, technical analysts, information technology analysts, consultants and other governmental organizations in the analysis, design, configuration, testing and maintenance of case management systems to ensure optimal operational performance.
 - Responsible for managing and mentoring team for each sprint cycle phases.
 - Responsible for programs or projects involving department or cross-functional teams focused on the delivery of a product or program through the design process and into a finished state for internal or external customers.
 - Oversee and coordinate all aspects of project and serves as manager for project team who are the liaison between project management, line management and other departments and reported to Sr. Manager.
 - Highlight project issues and develop resolutions to meet productivity, quality, and client-satisfaction goals.

EDUCATION

Bachelors in Science (Bhavans College - India)
