
WORK EXPERIENCE:

CEREBRO API WOOCOMMERCE INTEGRATION:

Contractor – January 2018 - Present

- Developed a custom API endpoint that allows the client to overwrite WooCommerce data, place orders, and create new users from a single API call. This API call reduced the amount of code Cerebro's Node.js team needed to write to integrate from WooCommerce drastically
- Developed using good PHP practices and OOP paradigms including class abstractions and extensions
- Implemented detailed error reporting throughout the stack, providing the developer with critical information if the sync fails

CRAIN COMMUNICATIONS:

Contractor – February 2017 - Present

- Redesigned utech.com from the ground up using the WordPress Genesis theme framework
- Built out a custom WordPress plugin that renders email templates for Crain's internal email system
- Built out a custom WordPress plugin that makes managing their Google DFP ads easier. This is used on 3 of their websites and has expanded into more than one ad framework. Written in PHP
- Integrated with a third-party content lockdown system to prevent visitors from viewing their content after so many page views

SUMMIT COUNTY BOARD OF ELECTIONS:

Subcontractor – January 2017 - February 2018

- Worked closely with a .net developer to build an API that converts antiquated .db database schemas into JSON endpoints.
- Built out middleware using PHP to access and use the API for all reports pages
- Implemented custom templating systems using PHP that displays the resulting report data
- Built custom caching systems using PHP that saved report data on the local server, reducing load times on common reports from hundreds of seconds to milliseconds.

INSOURCE SOLUTIONS

Subcontractor - June 2015 - September 2015

- Built website using WordPress Sage Framework, which featured build tools such as Gulp
- Followed supplied PDF designs and developed HTML/CSS/JS from scratch, including a mega menu

- Implemented and customized several WordPress plugins including ACF, The Events Calendar, and Ninja Forms

BRECHBUHLER SCALES

Contractor - Oct 2015-August 2016

- Design, Customize, and Manage all websites, including 3 ecommerce stores, and 3 WordPress websites
- Implement WordPress customizations that dramatically improved website update efficiency
- Manage and curate blog content on website to generate email list growth
- Develop relationships with content writers to assist with writing operations
- Optimize websites for Local SEO for all 16 branches of the company

NATIONAL CENTER OF ELECTRONIC RECYCLING

Contractor - June 2015 - September 2015

- Took a Bootstrap-based HTML template and converted it into a WordPress theme
- Built a system of organization on the WordPress admin panel to allow the user to organize content easily
- Provided training videos to educate users on how to use WordPress

PERSONAL PROJECTS:

THE UNDERPIN THEME FRAMEWORK – WORDPRESS THEME FRAMEWORK

- Developed a WordPress theme framework that utilizes both Composer and Webpack to make a modular WordPress theme
- All items in the theme are broken down into PHP-based components with their own stylesheets and Javascript files. These files are automatically packaged up using Webpack automatically
- Modules can automatically utilize Advanced Custom Fields and integrate directly into the website

EASY BEER LISTER – WORDPRESS PLUGIN

- Developed an open-source WordPress plugin that allows breweries to display their beer information on their website

EASY AGE VERIFIER – WORDPRESS PLUGIN

- Created a simple plugin that displays an age verifier popup on a website.
- Integrated WordPress customizer to change how the verifier displays, and behaves
