

Manish Kumar

ManishhKmar@yahoo.com

SAP® Certified
Associate

Summary

- 15 + Yrs. of total IT experience in SAP MM support, Supply Chain and implementation of SAP Ariba Cloud Applications, SAP Ariba Commerce Network and SCC (Supply Chain Collaboration) process.
- **SAP Certified Integration associate, Ariba Application specialist and Ariba Contract Management**
 - Implementation of SAP Ariba "Procure to Order" & "Procure To Pay"
 - Implementation of Ariba Commerce Network
 - Implementation of Ariba Sourcing and Contract Management
 - Implementation of Ariba Supply Chain Collaboration processes.
 - Implementation of Suite Integration, FPC and Service Procurement
 - Implementation of Strategic Sourcing Open API
 - Implementation of Sourcing and Contract through Web Services
 - Implementation of User Management and Source list integration via web services
 - Implementation of SLP – Supplier Life Cycle and Performance Management
 - Implementation of CIG – Cloud Integration Gateway
 - Implementation of Ariba with ECC and Non-ECC system using SAP Ariba Direct Connect (Direct Connectivity & Mediated Connectivity), Web Services Integration, Integration Toolkit, SAP Ariba CIG Add-On
- Design and configuration of objects in SAP PI/PO Enterprise Service Builder such as operation mappings, message mappings and data types
- Planning, execution of technical upgrade experience from ERP 6.0 EHP5 to ERP 6.0 EHP6 SPS7
- Responsible for preparation of "Technical Specification" and "Technical Design Document" for solutions to be implemented, requirements and customizations that comes across during implementation cycle
- Propose, conceptualize, design and implement solutions that involve integrations between SAP Ariba cloud offerings, S/4 HANA and/or SAP ECC
- Responsible for SAP ECC configuration in MM module and MM-FI Integration
- Prepared cut over plan so that configuration and customization can be moved to SAP Ariba cloud production environment
- Setup on Ariba Network - Business Application IDs and End Points, MultiERP and End points, Default Transactions Rules, Document routing, Ariba Open Network settings, Settings under "Supplier Enablement", Application and cXML log for issue debugging
- To help implement user exits, enhancements, report and transaction objects, scripts, BAPIs, RFCs, API, IDocs, ALE/EDI, internal and external integration technologies
- Worked on various flows - Scheduling Agreement release, Order Confirmation, Sub-contracting ,Consignment ,Advance Ship Notice, Invoice, Service Entry Sheet,Paymnet Proposal, Remittance, ERPCC Invoice Service Procurement, Blanket PO, Message Determination, Outline agreement, Pricing Conditions, Version Management, Release Procedure for PR and PO, WithHoldTaxConfiguration, FTXP tax configuration ,RTBC, TLC, Import Requisition , PR, PO, Invoice, Receipt ,PO closure from Ariba Buying and Invoicing

SAP, Ariba and Other Skill Set –

SAP ECC	ECC6.0 EHP 4.0,6.0 and 8.0, EHP 7.0, S/4 HANA on premise 1511,1610,1709 and 1809
Middleware	XI/PI 7.0,7.1,7.3 and 7.4, SAP PO 7.5, Web Methods
SAP Ariba cloud Solutions	SAP Ariba Commerce Automation, SAP Ariba Invoice Management, SAP Ariba Supplier Lifecycle and Performance, SAP Ariba Buying and Invoicing, SAP Ariba Buying, multi-ERP edition, SAP Ariba Strategic Sourcing Suite, SAP Ariba Contracts, SAP Ariba SCC
SAP Ariba Integration	SAP Ariba Direct Connect, Web services, Ariba ITK, CI- 9 SP2, cXML adapter for SAP and Oracle, CIG add-on for SAP, S/4 HANA, Open APIs
Internet Technologies	HTML, XML, XSDs, XSLT, JSON and SOAP
SAP MDG	Data Replication Framework, Supplier and customer configurations.
SAP PI Adapters	FILE, JDBC, SOAP, RFC and IDOC
Testing Tools for web service	SOAP UI, Postman
Others	Microsoft Office, XML editors,10g Oracle Fusion, 11g Oracle SOA Suite

Career History -

Employer	Period
Data Core Systems , US	September 2018 – Till Date
SAP Ariba, Bangalore, India	January 2014 – August 2018
Ariba Technologies India Pvt Ltd, Bangalore, India	July 2004 – December 2013

Professional work experience

Industry – Mining

Sep 2019 – till date

Role: Solution Architect

Responsibilities:

- To prepare “Architecture Vision Document” for overall Ariba Solutions integration that comprises Ariba B&I (FPC realm),SLP/Risks, Ariba Sourcing and Contract, Ariba Commerce Automation and SCC (Supply Chain Collaboration) with ECC and S/4 HANA
- To get sign off on “Architecture Document”, “Technical Design Document”, “Integration data flow” and “Data Migration Strategy”
- Help customer to design integration with SAP Ariba CIG
- To address various queries on technical feasibility for data flow between ECC to SAP Ariba and vice -versa
- Review of KDD (key decision document) prepared by partners on this project

Industry – Security Equipment and Controls**Mar 2019 – Sep 2019**Role: Technical Architect

Responsibilities:

- **Integration of Ariba Buying & Invoicing, Sourcing and Contracts, SLP and Ariba Network using CIG Add-On**
- Lead and manage technical development and configurations for SAP Ariba, SAP ECC, Non-ECC and S/4 HANA solutions
- Configuration in Ariba Buying and Invoicing – like field configuration, exception types, AML customization
- Customization in Ariba Network
- Implementation of request and registration template in Ariba SLP
- Documentation of technical implementation and Ariba side changes
- Configuration of **SAP Ariba CIG**
- Implemented customization to cater to business requirement in SAP Ariba procurement solution such as Demand Aggregation, TLC, RTBC, PR, PO and Receipts
- Prepared design document for custom implementation of FMD master data
- Responsible for preparing “Go-Live” activities in “Microsoft Project” plan
- Helped customer in OSS notes implementations

Industry – Fashion**Nov 2018 – Mar 2019**Role: Technical and Integration Lead

Responsibilities:

- Design and Implementation of **SLP** integration using **Ariba CIG**
- Implementation of **Tax API** in Ariba Buying with Thomson Reuters
- Documentation of technical implementation and Ariba side changes
- Configuration of **SAP Ariba CIG**
- Collaborate with IT, Business and other project team members to determine design specifications
- Prepared technical design document for customizations

Industry – Fashion**Oct 2018 – Nov 2018**Role: Integration Lead

Responsibilities:

- Design integration for SLP, Sourcing and Contracts using **CIG** for global level sourcing and contracts for multiple companies under one parent
- Design custom integration of SLP and Buying and Invoicing for Non-SAP systems
- Design integration for **Ariba Buying** solution using **CIG**

Industry – Oil and Gas**Oct 2017 – Aug 2018**Role: Solution Architect

Responsibilities:

- Implementation of SAP Ariba Buying features like Collaborative Requisitioning, Demand Aggregation, Purchase Orders (PO change, cancel and closure), Total Landed Costs, Real Time budget check
- Configuration of "Technical" and "Business" systems for SAP Ariba cloud applications and SAP backend systems in SAP PI/PO system landscape directory
- Setting up of Business Application IDs and End Points for RFQ, Award and CLID integration
- Configuration of "Document routing" in Ariba Network
- Setting up of "Default Transaction Rules" for PO and Invoices in Ariba Network
- Setup of "Country based Invoice rules" in AN
- Single Sign on and Suite Integration
- CVI Implementation for BP creation and vendor migration on S/4 HANA
- Custom Integration for Sourcing and Contracts
- Implementation of SLP integration with ECC and S/4 HANA
- Implementation of Ariba Commerce Network flows like PO, Order Confirmation, Ship Notice, Goods receipt, Order Inquiry, Service Entry Sheet, Invoice, Service Entry Sheet Status Update, Consignment, Sub- contracting, Returns PO, PIR
- Source List Integration
- User management through web services integration with backend system
- Implementation of sourcing process where "Sourcing request" originated directly in Ariba and other via RFQ creation in ECC and which in turn creates SR in Ariba

Industry – Airlines**Feb 2017 – Sep 2017**Role: Sr. Technical Consultant/Integration Lead

Responsibilities:

- PI 7.4 system monitoring and troubleshooting
- Worked Onsite with customer during design to build phase for Ariba Upstream and S/4 HANA integration
- A Sourcing process design with a complete flow (Sourcing Request, Sourcing Project and Ariba D-Forms)
- A Contract process designed for internal collaborative working, with Ariba 's Best Practice Scenarios
- SIPM process was designed and implemented simultaneously including supply information Process and supply performance management Process
- Integration of Ariba Supplier Information and Performance Management with SAP MDG and SAP ERP
- Integration of contract information from Ariba Contract Management with SAP ERP
- Integration of Master Data from SAP ERP with Ariba Sourcing and Ariba Contract Management
- Helped in review of SAP OSS notes and implementation of same
- Buyers using Ariba Sourcing or Ariba Contract Management can import organizational data, cross application data such as incoterms and payment terms, and material master data from SAP ERP systems
- Implemented Line Item level attachments in RFQ
- Implementation of SPQ (Supplier Profile Questionnaire) as custom fields in vendor master via Import Supplier Profile web service

Industry – Real Estate**Oct 2016 – Jan 2017**Role: Sr. Integration Consultant

Responsibilities:

- Installation and configuration of S/4 HANA 1511 for Ariba Implementations
- System Monitoring and Reporting configuration and troubleshooting
- Implementation of Real-Time Budget Check Integration between Ariba Procurement Solutions and S/4 HANA 1511 system
- Implemented Import receipt functionality from SAP to Ariba
- Implemented Import requisition from SAP to Ariba
- Helped in Integration of PO, PR, Receipt from Ariba to ECC
- Support for Taxes and Charges on requisitions, purchase order
- Integration of complete TLC (Total Landing Cost)
- Support for Real Time Budget check in Funds Management module
- Helped in customization in BADI for adding additional fields in material master integration

Industry – Manufacturing and Semiconductors**Mar 2016 – Nov 2016**Role: Solution Architect/Sr.Integration Consultant

Responsibilities:

- Integration of Purchasing Info Record with ECC via Export RFX Award web services
- Integration of contracts header level data via web services
- Custom integration of SCV a share point portal tool with Ariba to create project and event automatically via Import Project and Import Event web services
- Helped customer to build custom template for Full and Quick project in Ariba
- Configured pricing details in Ariba Contract Pro
- Implementation of Ariba D-Form
- Integration of BOM (Bill of Material) from ECC to Ariba Sourcing solution
- Integration of additional material master data fields and classification-based custom fields
- Service Item Integration in Ariba Sourcing – With this customer can now manage their material and services spend in Ariba Sourcing, and these business processes are now integrated with their backend systems
- Integration of users and groups from LDAP system via Import Users and Group web services
- Prepared technical architecture for complete Ariba Solutions Implementation
- Implemented 9 Ariba Web Services as this project involves custom Implementation
- Helped with configuration in ECC system for pricing and info record
- ABAP Proxy configuration for PI 7.4

Industry – Aviation**Sep 2015 – March 2016**Role: Sr. Integration ConsultantApril

Responsibilities:

- Implementation of Budget check on PR's and PO
- Customization of Ariba B&I in Requisition, PO and Invoice
- Implementation of complex customized approvals
- Procure to order management which includes requisitions, approval flows and receiving
- Service Procurement integration between Ariba Buyer and ECC system
- Support for Taxes and Charges on requisitions, purchase order
- Integration of complete TLC (Total Landing Cost)
- Support for Real Time Budget check in Funds Management module
- Adapter Installation & Configuration in SAP PI/PO
- Support customer in performing mapping changes
- Full integration with their largest catalog suppliers, both with Punch-out catalog shopping and fully integrated PO and Invoice transmissions
- Integration of service procurement in sap NetWeaver adapter flow –
- Service Po, Service Entry Sheet, Service Invoice, Performa Invoice

Industry – Insurance**March 2015 – July 2015**Role: Sr. Integration Consultant

Responsibilities:

- Implemented new improved catalog user interface with Ariba Procurement Content
- Implementation of custom/out of the box integration of service entry sheet and the related service invoice process automation
- Design of a sourcing process with complete flow (sourcing request, sourcing project and D-forms
- Designed SIPM process and implemented simultaneously supplier information process and supplier performance management process
- Integration with SAP ECC using PI and Cloud Integration SP6
- Streamlined processes for strategic and tactical sourcing
- Implemented online approvals for sourcing strategy and sourcing award.

Responsibilities:

- Configuration of Technical and Business Systems for Ariba Application and SAP system in System landscape directory
- Exposure to Net weaver XI and PI 7.0/7.1/7.4 single and dual stack, SLD, Integration builder and Enterprise Service builder
- Upgrade of XI adapters for SAP
- Full integration with their largest catalog suppliers, both with Punch-out catalog shopping and fully integrated PO and Invoice transmissions.
- Integration of Total Landed Costs
- Integration of service procurement in sap NetWeaver adapter flow
- Defined and determined user business requirements, designed applications, and tested solutions
- Configuration of Enterprise structure, various purchasing documents and Master Data for Procurement process
- Integration of full suite Ariba application – P2O, Ariba Network and Upstream Solution

Role : Functional Analysts (Ariba)

Jan 2007 – Nov 2013

- Involvement with Customers for Gathering Business Requirements and Identifying, analyzing customer requirements and gaps and freeze the design
- Finalizing business use cases; reviewing functional design; finalizing testing scope for QA team; reviewing test cases; reviewing test approach; guiding QA team on automation
- Helping Team in escalated issues, complicated use-cases and providing Trainings and Demos
- Configuration in the area of SCM, Purchasing, Master Data, IV, IDocs
- Configuration of IDocs -partner profile, RFC destination, logical system, message types
- Extension of standard IDoc DELINS/DELFOR02 to /ARBA/DELFOR02
- NACE settings for automatic transmission of Goods Receipt document from SAP to Ariba Network
- Integration of Order Confirmation
- Implementation of Ship Notice Barcode Label Printing
- Performed functional analysis, requirements gathering
- Defined and determined user business requirements, designed applications, and tested solutions
- Configuration of Enterprise structure, various purchasing documents and Master Data for Procurement process
- Integration of full suite Ariba application – P2O, Ariba Network and Upstream Solution
- Testing of all Integrations – Ariba P2O and Ariba Network with new namespace code
- Testing of Clubbed PO and Change PO in single IDOC interface
- Gathered and collected requirements resulting in detailed business rules, functional requirements and process design
- Handled new enhancements and all the support issues pertaining to SAP MM and ERP integration
- Configuration of Technical and Business Systems for Ariba Application and SAP System in SLD

- Approval process implemented with no loss in functionality based on their On Premise build
- Integration of procurement processes with interfaces to FI module for Remittances in SAP
- Used business and technical understanding to analyze business and functional requirements before developing positive and negative test plans, test cases and scripts
- Facilitated defect reporting and test case writing and execution, in line with functional specifications, in addition to test completion reporting and sign off
- Carried out end-to-end functional testing to ensure applications are successfully integrated
- Implementation of P2O solution using file channel (ITK)
- Worked extensively on ALE/IDocs, proxies (inbound and outbound)
- Implementation of Payment ITK to Network
- Used various data load techniques like LSMW, direct input method, BDC, BAPI and BODS.
- Implementation of Discount Pro
- Responsible for preparing cut over plan so that configuration and customization can be moved to SAP Ariba cloud production environment

Role: Software Engineer (Ariba)

Jul 2004 – Dec 2006

-
- Resolution of Service Requests and Hot fixes related to SAP and ERP integration logged into Siebel CRM
 - Resolved tickets and Change Requests for Business processes, Integrations and customizations/configuration issues in SAP according to the SLA
 - Design and configuration of objects in Enterprise Service Builder such as Operation Mappings, Message Mappings and data types
 - Configuration of Materials Management module in the areas of Purchasing, Inventory Management, Invoice Verification

Certifications

- SAP MM Certified Solution Consultant – Supply Chain Management Procurement
- SAP Certified Application Associate – Ariba Integration
- SAP Certified Application Specialist - SAP Ariba and SAP Application Integration
- SAP Certified Application Associate - Ariba Contract Management
- Certified in Basics of Supply Chain Management from American Production and Inventory Control Society, USA
- Certified in Master Planning of Resource from American Production and Inventory Control Society, USA
- Microsoft Certified Application Developer for Microsoft.NET
- Procurement Certification – Indian Institute of Material Management

Education

- Master's in computer application from Indira Gandhi National Open University, India 1996-2002
- Bachelor's in computer application from Indira Gandhi National Open University, India 1996-2002 (Integrated course)
- Bachelor's in commerce (Hons) from University of Delhi 1995 -1999
