SUMMARY

- A result driven software professional with **7.5 years** of progressively responsible experience in Data Analysis, Design, Implementation, Administration and Support of Business Intelligence, OLTP, OLAP and ETL using SQL server, SSIS, SSRS and **Power BI**.
- Expert in designing relation **database model** and implementation as per the Business requirements.
- Extensive experience in **BI Solutions (ETL & Reporting) using Power BI**.
- Expertise in **Power BI, Power BI Pro, Power BI Mobile**.
- Expert in creating and developing **Power BI** Dashboards into rich look.
- Designed **Power BI** data visualization utilizing cross tabs, maps, scatter plots and density charts.
- Hands on experience writing complex **DAX** functions in **Power BI** and Power Pivot.
- Utilized **Power BI** gateway to keep dashboards and reports up to-date with on premise data sources.
- Expertise in integrating Custom Visuals based on business requirements using **Power BI desktop**.
- Extensive knowledge in **Tuning SQL queries** and improving the query performance.
- Experience in creating **Views, Constraints, Joins, Temp Table, Table Variable, Functions, stored procedures** consumed at various stages of **migration/cleansing** process, **reports** or **data validation**.
- Developed **Drill through** and **Drill down** Reports using **Power BI**.
- Good **interpersonal** and **communication** skills keen to learn new technologies to enhance my technical skills.
- Conduct research and make recommendations on enhancements and standards for the organization's business intelligence environment.
- Proactively communicate with, support and guide end users during application release cycles to ensure definition of requirements and testing of new release can be completed by predefined target dates.
- Experienced in all facets of Software Development Life Cycle (**Analysis, Design, Development, Testing and maintenance**) using **Waterfall** and **Agile methodologies**.

EDUCATION

- Bachelor of Science in Mathematics from Bharathiyar University, India (2005)

TECHNICAL EXPERIENCE

Unilever, Columbus, Ohio

May '17 –

Present

Power BI Developer

Project 1: Server Health Check Analysis

Developing Sever **availability reports**, **Server health -Memory & CPU reports** and Dashboards using **Power BI** for the critical and non-critical applications for all the servers. (DB server, Application server, Web server) that are used at an organization level for business analysis to monitor and understand current state of servers.

Project 2: Ticket trend Analysis

Building Ticket trend Analysis reports and Dashboards for the global applications used in four Regions (**US, APAC, EMEA, and Japan**) for all tickets raised in **Service now ticketing tool**. **Developed Power BI reports using Bar charts, Line charts, and Geographical maps** to analyze and identify the issues by Priority and Severity and shared the reports with Technical team to apply the solution to resolve the Issues.

Responsibilities:

- Created Server health check Interactive BI reports and Dashboards for **Critical and non-critical applications**.
- Worked on all kind of reports such as Yearly, Quarterly, Monthly, and Daily.
- Created Workspace and content packs for business users to view the developed reports.
- Scheduled Automatic refresh and scheduling refresh in **Power BI** service.
- Wrote calculated columns, Measures query's in **Power BI** desktop to show good data analysis techniques.
- Used **Power BI** Gateways to keep the dashboards and reports up to date.
- Weekly presentation to the business users about the reports and their changes as required.
- Worked on all kind of reports such as Yearly, Quarterly, Monthly, and Daily.
- Worked on all types of transformations that are available in **Power BI** query editor
- Created stored procedures and SQL queries to pull data into **power pivot** model.
- Expertise in writing complex **DAX** functions in **Power BI** and **Power Pivot**.
- Automated **Power Query** refresh using power shell script and windows task scheduler.
- Database creation (DDL, DML, DCL), database tuning, SQL tuning, performance planning.
- Extensively used **Joins** and **Sub-Queries** to simplify complex queries involving multiple tables.
- De-commission the Existing **SSRS** environment and setting up the new **Power BI** platform.
- Participated in project planning sessions with project managers, business analysts and team members to analyze business requirements and outline the proposed solution.
- Extensively worked on **debugging** application for fixing bugs and Production support.
- Involved in **Agile** Development process with monthly release cycle.

Blue Cross Blue Shield (BCBS), NJ

Feb '15 – Apr'

17

BI Developer

Responsibilities:

- Designed and developed **Power BI** graphical and visualization solutions with business requirement documents and plans for creating interactive dashboards.
- Utilized **Power BI (Power View)** to create various analytical dashboards that depicts critical KPIs and slicers, dicers enabling end-user to make filters.
- Generated ad-hoc reports in Excel Power Pivot and sheared them using **Power BI** to the decision makers for strategic planning.
- Utilized Power Query in **Power BI** to Pivot and Un-pivot the data model for data cleansing and data massaging.
- Implemented several **DAX** functions for various fact calculations for efficient data visualization in **Power BI**.
- Utilized **Power BI** gateway to keep dashboards and reports up to-date with on premise data sources.
- Performed Administration tasks like installing and configuring the new SSRS environment and writing automation scripts to manage Report server Data base.
- Created production flow or run book for SSRS reports in production.
- Monitoring the production jobs that will execute the reports and packages on Daily and monthly basis.
- Responsible for developing processes, automation of maintenance jobs, tuning **SQL** Server, locks and index configurations, administering SQL Server security, SQL Server automatic e-mail notification and SQL Server backup strategy and automation.
- Optimized the performance of various SQL scripts, stored procedures and triggers by using embedded UDFs, CTEs and System stored procedures.
- Involved in creating Dynamic SQL scripts for the Daily Extracts and Transforms.
- Formulated and documented ETL process design based on business requirements and system specifications including source to target mappings, data dictionaries and transformations.

Department of Education, NY

Jan '14 – Feb'

15

BI Analyst

Roles and Responsibilities:

- Performed administration duties like installing and configuring the new SSRS 2016 environment on multiple servers.
- Responsible for developing processes, automation of maintenance jobs, tuning SQL Server, locks and index configurations, administering SQL Server security, SQL Server automatic e-mail notification and SQL Server backup strategy and automation.
- Worked on various complex requirements of developing monitoring dashboards with multiple KPIs in Performance Point Monitoring Server 2007, Share point.
- Optimized the performance of various SQL scripts, stored procedures and triggers by using embedded UDFs, CTEs and System stored procedures.
- Created report models for the ad-hoc reporting of the end users using Report Builder
- Documented all the migration process documents for future reference
- Creates solutions and helps prepare test plans by having solid knowledge of data warehousing concepts, dimensional/cube data modeling techniques, including MDX and DAX scripting
- Successfully tested all task in staging and stored all versions of data using team foundation server (TFS).

Credit- Suisse., NY

Nov '12 – Jan'

14

Database Developer

Roles and Responsibilities:

- Created and managed stored procedures, indexed views, user defined functions, triggers, database constraints to meet business requirements and policies.
- Created highly complex SSIS packages using various Data transformations like conditional splitting, Fuzzy Lookup, For Each Loop, Multi Cast, column conversion, Fuzzy Grouping, Script Components, error handling.
- Generated Custom ETL scripts using SSIS 2008 and unit test SSIS load processes for performance check.
- As a part of administration duties Setting up the automation backup jobs for report server.
- Created various complex reports and manage those using SQL Server Reporting Services (SSRS 2008/2005/2012) according to ERLC.
- Created Parameterized, Cross-Tab, Drill Down & Drill Through reports by using SSRS 2005/2008
- Involved in complete Software Development Life Cycle (SDLC), which includes requirement gathering, analysis, design, development, and Implementation
- Created SSIS packages for data Importing, Cleansing, and Parsing etc. Extracted, cleaned and validated.
- Created complex queries to automate data profiling process needed to define the structure of the pre staging and staging area.
- Used Subversion source control to deploy and store the solutions.
