

Nick Sauliak

4 years of software development

Two years of react-native development experience, publications in

Play Market and App Store,

Certificates for git, js, agile, android, client requirements

in

React-Native developer

kolia.sauliak@gmail.com

Work Experience

Pet-Project, UX designer, Jun 2020 ~ Aug 2020

Used Adobe XD to create fully interactive prototype for startup presentation

Used draw.io to create content map Used coggle to create interaction map

Self-Employed, Full-Stack Engineer, Jan 2020 ~ Jun 2020

Build databases and table structures following NOSQL architecture methodology for mobile applications
Collaborated with product management to design, build and test systems
Integrated mobile payment platform Stripe
Integrated mobile search platform Algolia
Create admin dashboard with ReactJS
Using image, date picker to implement a custom seller experience
Using Cloud services to implement custom negotiation system between seller and buyer

Managed state within the app using Redux and persisted certain parts of the state to device via Redux Persist.

Used Middleware, Redux-Promise in application to retrieve data from Back-End and to also perform RESTFUL services.

Developed the flux pattern by using redux framework as a core dependency.

Design React Native components and higher order components.

Design UI views with Flexbox and React Native dimension API.

Worked in using React native components, Forms, Event, Keys, Navigation and Redux concepts.

Using Javascript's development patterns to organize classes for communication with

Self-Employed, Android mobile developer, May 2019 ~ Feb 2020

Used React concepts like JSX (JavaScript Syntax Extension), components, state and props.

Implement track player to play streaming audio

Worked with ECMAScript 6 features. For the build of JSX and ES2015 (ES6) used Babel, webpack.

Used mongo db to save track on the server

Used express to create REST API for audio

Extensive Experience in Creating Components & reusable Components.

Good understanding on usage of states and props inside components

Implemented API calls Post/Get methods using rn-fetch-blob library

Used Redux to store state of app in a singular source.

Worked with Jest unit test framework to write unit tests for JavaScript code.

Used Redux-thunk to asynchronously launch Redux actions in response to async code.

Used android native library for book reader

Used typescript for type checking

Used javascript web scraper for creating own database of text stories

Used webview to implement custom text stories reader

Used Middleware, Redux-Thunk in application to retrieve data from Back-End and to also perform RESTFUL services.

Achieved native navigation by using react-native-navigation, created a fork for adding features to fit design needs.

cloud storage service
Using Gitlab-CI for admin deployment
Worked with Jest unit test framework to write unit tests for JavaScript code.
Extensively used Git for version controlling and regularly pushed the code to GitHub.
Worked on state, specs, props and events to create interactive React JS components.

Self-Employed, React-Native dev, Feb 2020 ~ June 2020

100% Code coverage on critical components, using coverage collection built into project testing framework (i.e. jest). Develop new mobile application on Android and IOS . Overall reduction in both memory usage and memory leakage.
Worked on hamburger menu/logout functionality Improved app store rating.
Improved general responsiveness in app, window load. Support: Reduce time to resolution, overall volume, and number of unique issues. Changed Native Base components to use drive colors and updated the in-app style guide to have Driven color palette. Strong experience in writing and updating the technical documents on daily basis with the changes made to the existing environment on daily basis. Excellent interpersonal abilities, communication skills, time management and Team skills with an intention to work attain project deadlines under stressful environments. Experience in Software life cycle phases like Requirement Analysis, Implementation and estimating the time-lines for the project.

Self-Employed, Firebase Engineer, Jan 2020 ~ Mar 2020

Help to fix local payment system
Fix auth errors
Used React concepts like JSX (JavaScript Syntax Extension), components, state and props.

Self-Employed, Expo/React-Native developer, Feb 2019 ~ May 2019

Used expo to create android mobile app for universities rating
Worked on REST implementation.
Development was done on agile methodology with rapid turnarounds.
Used ECMA script 5 while writing react native code
Handled RESTful APIs which support JSON to access back-end data payload

hackathon, React-Native Web, Sep 2018 ~ Sep 2018

Create landing page with react-native-web
Using Blockstack authorization on website
Used SOLID principles for create authorization classes

Self-Employed, React developer, May 2017 ~ Sep 2017

Create landing page with React
Using HTML5 for create page
Using react-bootstrap as component library
Used advanced level of HTML5, JavaScript, CSS3 and pure CSS layouts (table less layout).

Self-Employed, Python developer, Jan 2017 ~ Feb 2017

Used selenium driver for data parsing
Used SQLite database for data storage
Used Excel for data analysis

Self-Employed, Python telegram bot developer, Feb 2016 ~ Sep 2016

Created telegram bot for selling products
Used heroku as cloud storage
Used telegram bot API to create the bot

Self-Employed, Javascript developer, Aug 2015 ~ Nov 2015

Used JQuery to create animated slider
Used javascript to handle link activation
Used html for page structure
Used bootstrap to styling page

Education

Taras Shevchenko National University of Kyiv, 2017 ~ 2021

The Hong Kong University of Science and Technology, Other, 2020 ~ 2020

Certificates

- Android App Components - Intents, Activities, and Broadcast Receivers - Vanderbilt University
- Front-End Web Development with React - The Hong Kong University of Science and Technology
- Multiplatform Mobile App Development with React Native - The Hong Kong University of Science and Technology
- Version Control with Git - Atlassian
- JavaScript, часть 2: прототипы и асинхронность - Moscow Institute of Physics and Technology (State University) - MIPT, Phystech
- Client Needs and Software Requirements - University of Alberta
