## PROFESSIONAL EXPERIENCE

---

### Independent Contractor / Self-Employed

Analytics & Data Science Consultant

September 2019 - Present

- Produced data-driven solutions from prototype to production in the domains of predictive analytics and NLP to help clients make informed business decisions.
- Provided statistical consulting expertise and assisted clients in building a successful data science strategy.
- Built data pipelines and automated reports using Python to optimize business workflows and reporting.

### University of Arkansas Graduate School and International Education

Researcher

May 2017 - August 2019

- Analyzed university survey results to be contributed and compared to national benchmarking data on PhD recipients career trajectory.
- Presented research findings to university administrators and identified active opportunities for program improvement.
- Developed a dashboard using Python's Plotly library and Microsoft PowerBI to provide university administrators with quick access to alumni data.
- Utilized analytical tools to optimize research schedules and project timelines.

### Kellogg Company

Sales Analyst

May 2018 - October 2018

- Analyzed Walmart Retail Link sales data to monitor ongoing sales programs such as store feature placement and demos, and identified sales trends & anomalies to inform business decisions.
- Developed Python code to automate 8 weekly reports, including brand scorecards, inventory, sales, and promotional trackers.
- Integrated clustering techniques into price bucket reporting to isolate stores and products with extreme deviations in SRP.

## TECHNICAL SKILLS

---

**Programming Languages:** Python (scikit-learn, SciPy, NumPy, pandas, nltk), SQL(PostgreSQL, Amazon Redshift, Apache Hive, BigQuery), R

**Data Visualization:** Tableau, MS Power BI, matplotlib, seaborn, Plotly

**Statistical Methods:** time series, regression models, hypothesis testing & confidence intervals, principal component analysis and dimensionality reduction

**Machine Learning:** supervised learning, logistic regression, gradient boosting, bagging, random forests, search ranking, deep neural networks, unsupervised learning, generative modeling, GMM, generative deep learning

**BI and Statistical Tools:** MS Excel (VBA & Macros), SAS, SPSS, Knime, MicroStrategy, APT

**Systems:** Git, AWS, Spark

## EDUCATION

---

### University of Arkansas

Graduate:

Statistics & Analytics

August '17- May '19

Undergraduate:

BA in International Studies

August '14- July'17
