

Name: Chandana M

Email id: chandanast045@gmail.com

Phone: 6463552501

Title: Java Fullstack Developer

PROFESSIONAL SUMMARY

- Over **6+ Years** of experience in Software Development Life Cycle (SDLC) and Software Engineering including requirement gathering, analyzing, designing, implementing, testing, support, and maintenance of client-server applications.
- Expertise in building web and enterprise applications in domains including Healthcare, Banking and Financial
- Strong in **Java/J2EE** design patterns and other object-oriented concepts (OOPS).
- Developed **ANT** Scripts and used **MAVEN** tool to build and deploy **J2EE** Applications.
- Designed and developed multiple J2EE Model 2 MVC based Web Application using **J2EE** Technologies and popular open-source framework **Struts Framework, Spring MVC, Spring Framework, Spring Boot, Hibernate ORM Framework**.
- Strong experience in unit testing tools of **JavaScript** Frameworks like **Karma, Jasmine and Protractor for Angular**.
- Configured **Swagger-UI** registered Micro Services with Eureka server to monitor service health check from Spring Boot admin console
- Developed Single Page applications using Angular JS 2, HTML, CSS, Semantic UI libraries and Typescript.
- Expertise in implementing Web Services based on Service Oriented Architecture (SOA) using **SOAP, Restful Web Services**.
- Creating Rich UI applications using Angular 2/4/6 integrating with **REST API's** built on Micro services
- Experience in the developing professional web applications using **HTML5, CSS3, JavaScript, jQuery, Bootstrap, AJAX, JSON, XHTML, XML and Node.js**
- Experience in Server-side messaging using camel and JMS and development experience at server-side using technologies **EJB, Web Services, XML, Oracle, MySQL Server**.
- Experience in testing with JUnit Framework using Mockito and Easy Mock, and other testing tools like Firebug, Fire Poster, Protractor, Selenium, Jasmine, SoapUI.
- Hands on experience in developing Single Page Applications (SPA) using **Angular JS**
- Expert knowledge of JavaScript frameworks such as **Angular js, Media Query** and libraries like **Backbone JS**.
- Working on creating a distributed network by hosting the application on **AWS cloud, Amazon EC2** servers.
- Experience in working with automation tools like selenium and continuous integration tool **JENKINS**.
- Experience in Configuration and deployment of multi-tier applications using servers like **Web Sphere, Web Logic, and Tomcat**.

- Experience in working on modern MEAN Stack- MongoDB, Express, Angular and Nodejs.
- Handled all the port mapping/binding things that happen with Dockers and Containers.
- Solid Hands-on experience in end to end implementation of CI and CD (Continuous Delivery), DevOps processes using AWS Code Commit AW.
- Used Mongoose API in order to access the MongoDB from NodeJS.
- Experience in Enterprise Integration Development using Apache Camel, JMS, and Web services.
- Excellent understanding of PL-SQL programming. Develop, implement and optimize stored procedures, functions, views using PL-SQL, also worked with various databases like Oracle, MySQL, DB2 and MS SQL Server
- Experience in processing semi-structured and unstructured datasets.
- Strong independent learning ability, team player, easily adaptable to different development environments, collaborative, highly motivated and dedicated to delivering quality software
- Actively participated in daily scrum meetings, sprint planning sessions, sprint reviews, and retrospectives.
- Experience with Test Driven Development, paired programming and refactoring code

Technical Skills

Web Technologies	HTML/HTML5, XHTML, DHTML, XML, JavaScript, Node JS, Bootstrap, Ajax, CSS 2/3/4, Angular 4/6, LESS, SASS, JSP, DOM, MVC, Spring, Spring MVC, Git, Gulp, SOAP, REST, Sketch, Sketch 3, Rapid UI, ADA Compliance, Prototyping, Information Architecture, Interaction Design.
Languages	C, C++, JavaScript, PL/SQL, MVC.
XML Stack	XSL, XSD, XPATH, DTD, XML Schemas, DOM, SAX.
Adobe Tools	PageMaker, FreeHand, InDesign, Insight, Photoshop ColdFusion Studio, Collaborate, Acrobat Pro and DC, and Adobe Analytics Cloud, Flash, Ant, Maven.
Web Services	SOAP, RESTful.
Operating Systems	Windows Family, LINUX, UNIX (Sun Solaris), Mac OS.
Java Technologies	Core Java, J2SE, JSP, JavaScript, Servlet, HTML/HTML5, CSS/CSS3, XML.
Frameworks	Spring, Struts, Hibernate.
Applications & Web Servers	Web sphere, Weblogic, Apache, Tomcat, JBoss, Mango HTTP Server.

IDE Tools,	Eclipse, MS Visual Studio, Notepad++, Dreamweaver, NetBeans, EditPlus, Sublime Text, Web storm.
Web Server	Java Web Server, Apache Web Server, ANT, Tomcat, Jetty.
Other Tools	TOAD, Log4J, Mockito, Junit, JIRA, Jenkins, Rational Rose, Eclipse, MS-Office, Log4j, AWS, ANT, WSAD, Maven, MS Project.
Methodologies	Agile, Waterfall, TDD, SDLC.
Reporting Tool	Crystal Reports. Jasper, Crystal Reports
Version Control	GIT, SVN, Clear Case.
Nosql Databases	Mongodb, HBase.
RDBMS	MySQL, SQL Server, Oracle, DB2, Mongodb, Cassandra.
Cloud Technologies	AWS, EC2, S3, EB2

Professional Experience

Client: State Farm, Bloomington, IL
Role: Full stack Java Developer

July 2019 to Till Date

Responsibilities:

- Participating in application solutions including assisting with planning and architectural design, development, resolution of technical issues, and application rationalization.
- Created Typescript reusable components and services to consume REST **API's** using Component-based architecture provided by Angular 4.
- Involved in Unit testing of application using Karma and Jasmine library to make sure that the application is compatible in all browsers.
- Implemented micro services architecture using spring boot and **Spring REST** to create **REST** end points and integrated **Swagger Spring boot** to get dynamic documentation.
- Implement modules into **NodeJs** to integrate with designs and requirements.
- Involved in writing the front-end code for the application using AngularJS.
- Implemented the presentation layer (**GUI**), based on open source framework, involving Servlets, **JSP**, **JSTL**, **JSF**, **CSS3**, **HTML5**, **JavaScript** and **GWT**.
- Used **jQuery**, **Angular JS**, and **Node JS** to develop the rich user interface and to invoke RESTful Web Services to perform various operations.
- Used Maven for developing build scripts and deploying the application into Weblogic.
- Performed backend operations using Hibernate and native **SQL** on various databases.

- Developed single page applications using **Angular 4/6, Typescript, HTML5, CSS3**, and **Bootstrap**.
- Developed user specific Highlights (dashboard menu) section, Home Page, Admin home page, user module using Spring framework, Hibernate ORM module, Spring Core Module, **XML, JSP, and XSLT**.
- Worked on Web Services using Java **API for XML, JSON** Services (**JAX_RS**) and worked on the build, deploying RESTful web services.
- Expertise in designing and developing web and mobile applications using **HTML 5, CSS3, Less, Sass, JavaScript, jQuery, nodeJs, AngularJS**.
- Used Spring Boot to modularized code and implemented Rest API's using Spring Rest and integrated **Swagger API** for documentation.
- Developing application design guidance and consultation, utilizing a thorough understanding of applicable technology, tools, and existing designs.
- Used **AngularJS** and **Handlebars.js** framework where data from backend is stored in model and populated it to **UI**.
- Developed stored procedures and triggers using **PL/SQL** to calculate and update the tables to implement business logic using Oracle database.
- Expertise in designing and developing Web-centric applications using **HTML5, CSS3, Java Applets, JavaScript, XML, XSD, JSON, Ajax, jQuery, Bootstrap, AngularJS, NodeJS, ReactJS, Tag Libraries, Google Web Toolkit (GWT)** and Custom Tags.
- Involved in build and deployment of micro services with **Jenkins**.
- Conducted code review session at the end of the sprint and be the point of contact for code quality.
- Created computing and data resources on **AWS** using **EC2**.
- Deployed containers and Micro services in **AWS** using **EC2** Container Services. Designed, configured and deployed Amazon Web Services (**AWS**) for a multitude of applications utilizing the Amazon cloud formation.
- Implemented the Account Management micro service that used Spring Data to implement a **JPA** and Spring Rest to provide a Restful Interface based on **Spring Boot** application.
- Wrote several Playbooks and created various roles for applications using Ansible and deployed the Applications/Services on the client hosts.
- Integrated **Ansible** to manage all existing servers and automate the build/configurations of new Servers
- Used several Ansible modules which include scripting (bash, command), cloud modules,
- Used Tomcat server for the application development and Utilized **JIRA** for task scheduling, quality control activities like defect tracking and fixing.
- Developed test suites in Selenium Web Driver (**Java**) with TestNG framework in **Eclipse IDE** for regression and sanity testing.
- Build the application using Maven and used Jenkins for continuous integration.
- Writing complex **SQL** queries, using object-relational mapping libraries (**iBATIS/Hibernate/Toplink**) and MVC frameworks (Spring MVC/Struts 2) as well as building and consuming **SOAP** and REST services

Environment: Java 8.0, REST, Spring, AWS, Struts, JSF, EJB, jQuery, AJAX, Angular 4/6, Bootstrap, JSON, Toad, IBM Web sphere Application Server 7.x, Spring Boot, Docker, React JS, SQL Server, DB2, Clear Case, Selenium, UM L, JSP, JIRA, Jenkins, Micro services, Agile, Git, and JUnit.

Client: MetLife - Los Angeles, California

Oct 2018 - June 2019

Role: Full stack Java Developer

Responsibilities:

- Participated in the complete software development lifecycle tasks (design, coding, testing, and documentation).
- Responsible for preparing the use cases and for designing and developing object models, class diagrams with **UML** Specifications.
- Designed and **Developed UI** for Customer Service Modules and Reports using **Angular2.0, HTML, CSS, Bootstrap, JavaScript, and jQuery** Created web application prototype using JavaScript and **AngularJS**.
- Implemented nested views and routing using **Angular UI Router** as per the requirement. **GUI** was developed using **JSP, HTML, and AngularJS** and created reusable components in **Angular2.0** using Custom Directives Filters, Services, and Partial.
- Created **Typescript** reusable components and services to consume REST API's using Component based architecture provided by **Angular JS**. Also developed internal services using **Java and Node.js**.
- Customized Restful Web Service using Spring **RESTful API**, sending **JSON** format data packets between front-end and middle-tier controller.
- Good Knowledge in dynamic documentation of RESTful end points using **Swagger API**.
- Called REST web services through AngularJS services to get **JSON** Object and modified the response object to display in UI.
- Design and develop micro services, **J-Unit** test cases, mock creation and fix defects.
- Developed the backend tier using **Spring Boot** framework providing Dependency management.
- Developed the application under Core **Java, J2EE** Architecture using **REST, JBoss, Node.js, backbone.js, EXT JS, spring, Struts, Hibernate, Servlets, Web logic, Swing, Agile, Eclipse, Jenkins, and JSP**.
- Developed API to Integrate with Amazon EC2 cloud-based architecture in **AWS**, including creating machine Images.
- Developed views using Bootstrap components, Angular-UI and involved in configuring routing for various modules using angular UI router.
- Create desktop application with **Angular 2/4** and Unit Test with Karma-Jasmine
- Designed and developed the REST based Micro services using the **Spring Boot**.
- Used Spring Core Annotations for Dependency Injection **Spring DI** and Spring MVC for REST API s and Spring Boot for micro services.
- Used 'TestNG' for backend test cases and 'Jasmine' for **AngularJS** test cases.

- Developed the application using **Spring MVC** intensively that leverages classical MVC architecture and JavaScript for major data entry that involved an extreme level of data validation at the client side.
- Developed **REST API's** using **Spring MVC** and **spring boot**, hosted all micro services on Pivotal Cloud Foundry (PCF).
- Implemented continuous deployment system with **Jenkins**, **AWS**: Code Deploy, Ops Works, and Packer for deployment of Java Applications.
- Designed and developed the REST based Micro services using the Spring Boot, Spring Data with **JPA**.
- Used Junit and Mockito framework for unit testing of application and **Log4j** 1.2 to capture the log that includes runtime exceptions
- Developed unit test cases using Jasmine and Karma as unit test runner for various application modules.

Environment: Java, HTML5, Angular 2.0, jQuery, JavaScript, Spring Batch, Node.js, Bootstrap, Spring 4.0, Apache 7.0, log4j, Hibernate, Maven, Tortoise SVN, Spring Boot, Rest web services, Docker, AWS, Micro services, maven, jQuery, JIRA, Eclipse Kepler, XML, MySQL.

Client: Pershing LLC, **Location:** Jersey City, NJ
Role: Sr. Java Developer

Jan 2018- Sept 2018

Responsibilities:

- Involved in software development life cycle (SDLC), which includes requirement-gathering, design, coding, testing.
- Developed Project Specific **Java API's** for the new requirements with the Effective usage of Data Structures, Algorithms, and Core Java, OOPS concepts.
- Used Bootstrap, **NodeJS** for effective design of Web pages.
- Developed web service for web store components using **RESTful API** using Java & Spring.
- Experienced in developing web-based applications using **CSS, HTML, JavaScript, jQuery, UML**
- Experience in Object Oriented design, Systems Analysis, Software & Web Application development.
- Developed business modules using Hibernate & Spring framework technologies.
- Responsible for analysis, design, development, and integration of backend components using **J2EE** technologies such as Springs 3 and **Spring JDBC** and **EJB's**.
- Wrote Micro services to export/import data and task scheduling and **spring boot**, Spring and Hibernate in the Micro services and **Swagger API** for Micro services.
- Used **Jasmine**, Karma for unit testing and end-to-end testing to verify Angular JS modules and JavaScript utility routines.
- Experienced in Front End frameworks such as jQuery, Ajax, JavaScript, **Nodejs, ReactJS, BackboneJS, AngularJs**.
- Created **Typescript** reusable components and services to consume **REST API's** in **Angular 2**.
- Analyzing the execution plan and choosing the optimized query for the DB operation using **SQL** Developer.

- Implemented Micro services architecture using Spring Boot for making application smaller and independent.
- Developed Project Specific **Java API's** for the new requirements with the Effective usage of Data Structures, Algorithms, and **Core Java, OOPS** concepts.
- Developed web service for web store components using RESTful API.
- Used **XML, XSD** and **JSON** messages for Data transfer. Used **JAXB API** and **DOM** for **XML** parsing messages.
- Developed application Specific thread safe **XML APIs**, **XML** Document Builder and parser utils, validators using java DOM Parser which is used among the components.
- Implemented Business logic in the middle-tier using Java classes, Java beans.
- Created and modified Complex **SQL** Commands.
- Database designing and tables, master data creation in the database.
- Good in writing build files with ANT, Maven.
- Used Sonar for maintaining the code quality and JUnit code coverage.
- Created and Modified Jasper Reports and having good Knowledge of Jasper server.

Environment: JDK1.6, J2EE, JDBC, Servlets, Spring, Spring MVC 4.1.5, Spring JDBC, EJB3.0, XML, Hibernate ORM, HTML5, JBoss Studio, JBoss Server, SVN, Maven, Windows OS, Log4j, Junit, JIRA.

Client: Value Labs, India	July 2014- Dec 2017
----------------------------------	----------------------------

Role: Java Developer

Responsibilities:

- Developed multiple user tools with core Java and **DB2** using **eclipse IDE**.
- Implemented multiple design patterns like factory, façade, etc.
- Extensive code reviews on adherence to design and performance.
- Used **NodeJs** to run AngularJS on server with mock JSON data and completed the UI development independent of server.
- Extensive real-time production support.
- Used front end web development tools HTML5, CSS3, JavaScript, **Typescript**, Bootstrap, Angular JS, Angular2.0 to design UI.
- Worked on developing CRUD applications using MERN stack (**MongoDB, Express, ReactJS and NodeJS**) and REST based API.
- Wrote **HQL** queries as part of development.
- Supporting to testers to test **AngularJS 2.0** with **Jasmine** and **Protractor**.
- Designed and implemented **XML** parsing for **XML** order conformations.
- Wrote batch jobs and was involved in performance tuning of complex queries.
- Monitored the error logs and fixed the problems.

- Developed the different components of the application such as **JSP**, **Servlets**, **DAO** and Used **Subversion (SVN)** for version control.
- Involved in the Development of **Spring Framework** Controllers. Developed Controller for the request, response paradigm by Spring Controllers using Spring-MVC.
- Developed additional **UI** Components and implemented an asynchronous, **AJAX (jQuery)** based rich client to improve customer experience.
- Built ANT scripts for automated deployment and for the build operation of the entire application.
- Developed web pages using **HTML5/CSS** and **JavaScript**, **Angular JS**.
- Developed many **JSP** pages, used Dojo in **JavaScript Library**, **jQuery UI** for client-side validation.

Environment: Core Java, SQL (DB2), Design Patterns, HTML5/CSS, JavaScript ,Hibernate, DOJO 1.5, Eclipse IDE, JIRA
