

- *Over 15 years of IT experience in designing, developing and implementing data driven solutions.*
- *10 years of experience in designing and developing **data warehouse** and data-marts to support reporting and analytics projects.*
- ***Designed star schema and snowflake solutions.***
- ***Expert level skills in data cleansing, mining, wrangling and modeling adhoc data analysis to assist with the analytics related to pre and post product implementation success metrics.***
- *In-depth development experience in **creating tables, indexes, constraints, functions, stored procedures, triggers, views and packages, materialized views.***
- *Provided assistance in query performance tuning.*
- *Have excellent acumen to **quickly adapt and learn new functional domains.***
- *Worked in **Pharmacy and Medical solutions, Transportation and Parking Solutions, Corporate Banking and Financial Reconciliation.***
- *Good understanding in managing PHI, PII data and also HIPAA rules.*
- *Proficient in NCPDP and X12 standards.*
- ***Expert Analytical skills and advanced SQL.***
- *Comfortable switching between **Cloud and On-Premise infrastructure.***
- *Excellent verbal and written **communication skills, great interpersonal skills, quick learner , agile thinker.***
- ***Worked on Agile and Waterfall methods.***
- *General understanding of application architecture, Micro-services and Web APIs*

TECHNICAL SKILLS

Operating Systems	:	Windows, Linux
Cloud Services	:	Azure
Reporting/Dashboard	:	Business Objects, Tableau, Power BI
Databases	:	MS-Access, Oracle, SQL Server, MongoDB
Database Tools	:	TOAD, SQL Developer, SQL*LOADER
ETL Tools	:	ODI
Languages	:	SQL, PL/SQL, NoSQL
Microsoft Tools	:	Outlook, MS Excel, MS Word, PowerPoint
Source Code Control	:	Microsoft Visual Source Safe, Subversion, GitHub, Azure DevOps
Defect Tracking Tool	:	Azure DevOps, JIRA
Programming/Scripting	:	HTML, XML, JavaScript, C#, Perl, Python
Queue	:	RabbitMQ

EXPERIENCE

Lead Data Engineer (Data Services)

RelayHealth Pharmacy Solutions, McKesson Company

Jun 2014 to Present

Relay Health Pharmacy primarily focuses on providing high quality solutions to Pharmacies, Pharma Manufacturers, Payers, and Prescribers so they could cater patient's everyday needs. Our focus of our team is to maintain the data marts in Oracle, Sql server and MongoDB for new and on-going projects. This team is also responsible for exporting and importing scheduled data feeds with millions of data.

Responsibilities

- Developed solutions to build and data mart and source data to the reporting and analytics needs.
- Had been a primary resource for analyzing and **designing several pre-sales models and data driven product solutions.**
- Proficient in NCPDP and X12 Standards.
- Partnered with the internal and external groups, such as end-users, DBA and infrastructure team for setting up and maintenance of project related resources.
- Utilized Perl, Python and Java for developing data load pipelines.

- Developed Complex SQL, PL/SQL, functions, packages, database triggers.
- Heavily involved in providing metrics on pre and post product performance.
- Worked closely with the data scientist and assist them with their data needs.

Lead Systems Analyst (BI)

Xerox State and Local Solutions.

Jan 2007 to Jul 2014

Xerox provided solutions for transportation, toll and parking industries to cater major clients like SEPTA, SUNRAIL and major city airport parking facility. Over the 7 years in xerox, I have been a involved in parking and transportation BI/data engineering solutions and designed and loaded data into different data marts for Account Management, Ridership, Equipment Services, Revenue Reconciliation and General Ledger reporting and data analytic needs. This project involved multiple data sources like Oracle, Siebel, SQL Server and legacy data files.

Responsibilities

- Lead the BI team and mentored junior analysts.
- Designed and lead a group of analyst in constructing a batch data process for delivering the General Ledger extract to the accounting department.
- Created complex reports using Crystal Reports 2011 to provide revenue and sales information required by auditing group.
- Partnered with the internal and external groups, such as end-users, DBA and infrastructure team to define user groups and user roles, folder structures and scheduling options.
- Defined database objects to represent a denormalized warehouse entity for each subject area.
- Created and scheduled ODI Interfaces, PL/SQL Procedures, Packages, views to load data into the warehouse entities.
- Provided training on new reports and web functionalities to the end users.
- Clear Documentation, unit testing and user acceptance testing as per Quality Standards.

Software Engineer

Polaris Software Lab

Aug 1999 to Jul 2004

Description

Citibank Global Banking system was designed and developed to cater the corporate and consumer banking. The system was robust and the team was responsible to build solutions for account management, fund transfers, lending, deposits, ATM and Reconciliation reporting and analysis. It was a multi-currency system and was versatile enough to support various Asian and European countries.

Responsibilities

- Developed Interfaces using SQL, Stored Procedures, functions, packages, database triggers.
- Developed scheduled reports using Pro*C and Crystal Reports.
- Created an extensive reporting system by gathering the user requirements.
- Co-ordinated with the end-users and auditors to help them with their **reconciliation**.
- Had been On-Site to lead the User acceptance test.
- Clear Documentation, unit testing and user acceptance testing as per Quality Standards.

EDUCATION

- **Master of Computer Applications** – Bharathidasan University, India (2000)
- **Post Graduate Diploma in Computer Application** – SSI Limited, India(1997)
- **Bachelors Degree in Mathematics** – University of Madras, India (1996)
