Career Objective

Data Science/Artificial Intelligence leader. Data Analyst and Data Scientist Nanodegree Certification. Experience programming in SQL, Python and R with a passion using machine learning methods to gain knowledge from data.

Technical Experience:

- 3 years of experience developing Python and SQL Scripts for data extraction, manipulation and analysis.
- Experience in data mining, data preprocessing and feature engineering.
- Exporting data using SQL to Excel, creating graph trends for reporting.
- Extensive experience using data science/machine learning libraries such as Pandas, Numpy, Scikit Learn, Pytorch, Keras and Tensorflow for hypothesis testing and data modeling.
- Using above methods in supervised learning, unsupervised learning, and deep learning problems.
- Experience with visualization tool Tableau, as well as libraries such as matplotlib for creating graphs and visual resources to gain insight.

Applications/Tools	Microsoft Excel, Visio, Tableau, AWS, IBM Cognos, Spark, Hadoop
ML/DL Methods/Data tools	Data Mining, Data Wrangling, Predictive analytics, Linear regression, Deep learning, Unsupervised learning, Supervised learning, Collaborative filtering, Big Data, Neural Networks, CNN, RNN, Reinforcement Learning.
Programming	Python, R, SQL, Java, SAS
ML/DL Frameworks	Scikit Learn, Keras, Pytorch, TensorFlow, Pandas, Numpy, Spark

Technical Experience

Experience

The AI Institute

January 2020-Present

- Data Science/Artificial Intelligence Professor, optimize bootcamp, lead courses, create exercises/workshops.
- Build and optimize Neural networks from scratch, as well as using machine learning libraries. Convolutional Neural networks, Recurrent neural networks, reinforcement learning.
- Optimize bootcamp syllabus and create learning notebooks.
- Create personal projects using convolutional neural networks including algorithms for brain hemorrhage detection, and machine learning algorithms for EEG analysis.

Education/Certifications

Rutgers, the State University of New Jersey

- Course work in Biomedical Engineering.

Udacity

June 2018 to February 2019

Data Analyst/Data Scientist Projects

Projects can be viewed at <https://github.com/samifarooqui>

- Worked on Data Science projects for Bertelsmann, Figure Eight, IBM Watson, Insight, Kaggle, Starbucks. Projects included problems for recommendations, image classifiers, clustering, and predictive modeling.
