- Demonstrated ability to work with groups of people from diverse backgrounds.
- Highly motivated and results-oriented; able to work independently, or manage a team to accomplish goals.
- Well-organized with proven ability to prioritize and delegate important tasks.

Summary:

- Over **8** years of experience in the field of **Object Oriented Design & Development** of mission critical web and client based business applications using variety of Internet and Client Server development technologies.
- **Strong working Experience using J2SE, J2EE, PHP, SQL, MySQL, MS-SQL, MONGODB, DB2 HTML / XHTML, XML, JavaScript, JSON, CSS, Unix / Linux, Microsoft Windows, Apache Web Server.**
- **Strong experience in developing web based applications using JQuery, JSP, JSTL, SERVLETS, STRUTS, AJAX, DWR 2.0, EJB 2.0, XML, XSL / XSLT, JAXP, JAXB, HTML, JAVASCRIPT, Angular JS, Angular 2**
- **Good Experience with Version Control Systems like SVN, GitHub& CVS**
- **Good knowledge in MVC1, MVC2, JSP Architectures, XML versions.**
- **Good Experience in Hibernate O/R Mapping Framework.**
- **Good Experience with CI/CD Processes**
- **Good Experience with, Ant , Maven, Jenkins, Docker**
- **Experience in sharing data and services using Web Services with SOAP , REST AND JSON**
- **Experience in developing IBM WEB SPHERE PORTAL applications using JSR 168 and IBM Struts Portlet API.**
- **Good experience in using Application servers WebSphere Application Sever 6.0, WebLogic Application Server 8.1, Apache Tomcat 5.1, JBOSS 5, Glassfish v2Experienced with Multi language support for different Web Applications.**
- **Knowledge with JUnit in performing unit test and determining the application functionality.**
- **Experience with Waterfall, Agile and Scrum Development models**
- **Excellent interpersonal abilities & maximum contribution to attain the team goal.**
- **Team player with good communication skills and also a self-motivated individual with exemplary analytical and problem solving skills.**

Technical Proficiency:

- Languages/ : Java, J2EE 8, Servlets, JSP, JDBC, Micro services, C++, PHP
- Technologies : Javascript, JQuery, Angular JS, Angular 4, HTML5, AJAX, BootStrap, NodesJs
- Frame work : MVC, Zend, Struts, Spring, SpringBoot, Hibernate, Apache Velocity,
- Tools/ IDE : JUnit, Log4j, Eclipse 3.2, Net beans 4.1, Maven, ANT, Jenkins, Docker
- Web Technologies : XML, JAXP, JAXB, XSL, XSLT, Web Services, SOAP, WSDL, REST
- Web/App Servers : JBOSS, Apache Tomcat, Web Logic 8.1/7.0
- Database : MySQL, Oracle 8/9i, SQL Server 7.0/ 2000, MS Access, MongoDB, DB2Packages
- Other Tools : Visio 2013, JIRA, MS Project.
- Platforms : AWS, Azure, Google Cloud; Windows/Linux

Educational Qualification:

MBA, Project Management from American Intercontinental University – 2016

Certification: CSM -Scrum alliance 2019

Work Authorization: US Citizen

Projects:

Title: Aviation Procurement Report Application (July 2018 – Present)

Role: Technical Lead

Employer: KreativeBiz Solutions LLC

Project Synopsis:

Report Generation Application used by potential aircraft owners to generate reports on cost of maintenance for specific aircrafts. Application is built in with Admin module which is used to input data for Aircrafts available in the Aviation industry along with all the relevant data that can help in calculating the costs of maintenance and purchase. Application offers the service to customers as a subscription service; Customers can register and pay for the service. Customer can enter aircraft tail number a unique id given to each aircraft model which is accepted as standard across the industry, based on the aircraft tail number and origin airport, application pulls detailed reports on expenses involved in the maintenance and purchase of the aircraft. Customer can enter multiple aircraft tail numbers and compare the reports. Customer can also Print the reports.

Environment/Technology/Tools: J2EE, Oracle, JSP, Spring, Springboot, Hibernate, Angular 4XML, XSL, Linux, SVN, JQuery, Weblogic Server.

Responsibilities:

- Responsible for Requirements gathering, Conceptual Design, Analysis, Detail Design, Development, System Testing, User Acceptance Testing, Data Validation, Version Controlling and deployment.
- Involved in the SOA/OO Analysis and design using Data Modeling, development and documentation
- Develop webapplication byutilizingStruts, Hibernate
- Created andcoded databaseschema and procedures, used Oracle as database
- Create Common API for front end using AJAX, Angular 4
- Bulk Uploading excel sheet to the System.Acrobat(.PDF) with iText

- Worked on Debugging using Log4j tool. GUI designing and managed entire system code using SVN
- Created WAR, JAR files, deployed them on development and Testing Servers
- Track Bugfixes, after deploying the application on testing environment

Title: MRA (October 2017 – May 2018)

Role: Technical Lead

Employer: KreativeBiz Solutions LLC

Synopsis:

MRA (Medical Record Archive) is an online tool which will allow to maintain, update and track Patient Identification, Past Medication, Surgical, Family & Social History, Patient encounter & follow ups, Current medications & allergies, Patient diagnosis and procedures ICD9 and CPT, Lab flow details operation reports, Physical exams, Patient Education, Reports office visit, practice health, inventory. We continuously provide support, enhancements and new modules to our Client's EMR solution.

Environment/Technology/Tools: J2EE, MSSQL, JSP, Spring Hibernate, XML, XSL, Linux, TCP/IP, SVN, JQuery, Ajax, Apache Tomcat Server.

Responsibilities:

- Design and develop some Workflow modules for data extraction, transformation & loading health-care data from source to destination using Mirth, and Open Source ETL tool for HL7 Formats.
- Generating X12-835,837 EDI files for submitting Claims to Clearing agencies like Claim Logic, GHN to PMS systems.
- Transfer of radio logic images and other medical information from medical instruments like pentax, Olympus to PACS (Archiving Server).
- Gap Analysis to identify shortcomings in EMR application to make CCHIT compliant.
- Developing custom medical therapy forms for Rehabilitation Facility using XML/XSL architecture.
- Involved in Technical design with Definition of classes for MVC
- Involved in UI Design to be implemented as Web Layer using JSP pages
- Involved in Application Deployment and Setup and Control SVN System
- Track Bugs and update bugzilla with status on bugs.

Title: CRM360 (December 2015–October 2017)

Role: Senior Software Engineer

Employer: KreativeBiz Solutions LLC

Project Synopsis:

CRM360 is designed to help companies use data to foster relationships with current and future customers. The tool does this with a fully integrated system across sales, marketing and customer service.

Order Funnel Management (OFM): To create New Campaigns, Assign campaigns to specific profile representatives and register day to day update on the campaign progress.
