

By the Grace of G-D.

SHMUEL GOLDSTEIN

99 Wall Street, #5725, New York, NY 10005

347-770-1606

ShmuelGoldstein1@gmail.com

SUMMARY:

- Senior DevOps Engineer working with Containers, Cloud Infrastructure and Automation.
- Ansible & Chef Expert. Python/PHP/Ruby Developer. Linux (Full LAMP stack) Admin.
- Advanced custom solutions using Chef and Ansible for deployment automation, Jenkins and Rundeck for running builds and deployments, and Python, PHP & Ruby scripts for advanced automation, integration and management.

MY TECHNICAL SKILLS:

Cloud:	Amazon Web Services / AWS: EC2, EBS, ELB, EFS, CodeCommit, ECR, CloudFormation, CloudFront, CloudWatch, ElastiCache, IAM, RDS, Route 53, S3, SES, SNS, SQS, VPC. Python boto. Rackspace, Azure, Google Compute Engine. VMware, vSphere, ESXi, KVM, Openstack.
Containers:	Docker, docker-compose. Some exposure to Kubernetes/EKS.
Config Mgt/Automation:	Opscode Chef: Cookbooks, recipes, community cookbooks w/wrapper cookbook, roles, environments, encrypted databags, attributes, nodes, templates. Foodcritic. Ansible: Playbooks, Roles, Tasks, handlers. Lint with ansible-lint. SaltStack.
CDN:	Amazon Cloudfront, Highwinds CDN, Akamai Site Accelerator, Softlayer.com CDN, CDN.net.
Deployment Automation:	Jenkins, Rundeck, Chef, Vagrant.
API:	Amazon AWS API [PHP/Python boto], Facebook Graph API, Google Maps/Charts API, eBay API, Twilio API, Yahoo Social API, Akamai API.
Messaging:	RabbitMQ.
CMS:	Drupal 6/7, Magento, Joomla, WordPress, OSCommerce; SugarCRM.
Database:	Amazon RDS, MySQL, MariaDB, Postgresql, Redis.
Version Control:	Git, Mercurial, Bitbucket, Github, Atlassian Stash.
Team collaboration:	Atlassian Jira, Confluence, Agile Scrum.
Monitoring:	New Relic, Zabbix, Nagios, Sensu.
DNS:	Amazon Route53, Google Cloud DNS, Bind, Rackspace DNS, DNSMadeEasy, UltraDNS, MyDNS.
Agile / Scrum:	Atlassian Jira.
Languages:	Python, PHP, Ruby.
Caching:	Cloudfront, Varnish, Akamai Site Accelerator, Memcache/Memcached, Elasticache.
Job Scheduling:	Jenkins, Rundeck.
Operating Systems:	Redhat Enterprise Linux [RHEL], CentOS, Debian, Fedora, FreeBSD, Ubuntu, Windows Server.

MY EXPERIENCE:

8/19 to **TD Bank** - Manhattan, NY

9/20 **Senior DevOps Engineer**

- Worked as a Senior Devops Engineer.
 - Converted many files from Python 2.7 code to Python 3.
 - Participated in daily stand-up meetings.
 - Created CCM [Cloud-Control-Matrix] controls for TD Bank.
 - Created Unit-tests in python.
 - Created WinRM-based Jenkins + Python scripts to execute inspec tests on Windows machines.
 - Used Microsoft Azure and created Python scripts to interact with Log Analytics & other Azure services.
- Technologies: Microsoft Azure, Jenkins, Python, Linux, Windows Server, inspec, DataDog, SaltStack.

8/13_____

to

4/19

Broadridge Financial - Newark, NJ

Sr. Devops Engineer

- Accomplished a migration to AWS in 1 month which the manager said they were not able to accomplish in 2 years. Used Jenkins, terraform, and Docker.
- Created multi-node cluster on EC2 of around 100+ instances - each with 8 Docker containers (total 800+ containers!) - to run testing in parallel; brought testing times from 5+ hours to 3 minutes. Logging of all containers to Amazon EFS. Spin-up/down with Terraform.
- Brought down deployment of new environments from 6 weeks down to 3-5 minutes.

- Write Dockerfile's to automate the build and deploy of Marklogic containers.
- Write terraform to automate Infrastructure-as-code for the above project.
- Use Jenkins to automate and parametrize the Docker/Terraform project.

Technologies: Docker, Jenkins, Terraform, AWS EC2, S3, EFS, ELB/ALB, CodeCommit, ECR, RHEL Linux.

The Family Help Institute & Journeyman - Brooklyn, NY

DevOps Engineer

- Create a Speech-to-Text script using IBM Watson Speech-to-text API.
- Imported emails from multiple Gmail accounts into a MySQL database using a nightly-run Python script.
- Re-write database calls to support PDO and prepared statements.
- Analyze code base and provide security recommendations.
- Modify PHP code and MySQL database structure as per client's specifications.

Technologies: PHP, SSL, Apache, MySQL, Linux, IBM Watson, Gmail.

AT&T – New York, NY

DevOps Engineer

- Deployed cloud infrastructure with Openstack, VMware ESXi and KVM.

Technical environment: Hypervisors: KVM, VMware ESXi. HP Proliant iLO, BIOS/Emulex.

AMPLIFY COM – New York, NY

DevOps Engineer

- Wrote ansible playbooks: tasks, roles, templates.
- Established a deployment system using Ruby.
- Created & fixed ansible code to deploy applications & servers.
- Participated in daily agile/scrum conferences.
- Created & modified ruby scripts for advanced systems monitoring [sensu, Redis].

Technical environment: Ansible, Ruby, Redis, AWS, Git, Postgres, Stash, RabbitMQ, Sensu.

AT&T – New York, NY

DevOps Engineer

- Effectively and efficiently communicated, collaborated, and worked with many groups in dynamic environments
- Deployed and managed cloud based application environments running on Openstack.
- Utilized broad technical background and experience with multiple disciplines as Systems Administrator, Software Engineer/Developer, and Database Administrator
- Advised to move all source-code from Github to onsite, secure, behind-firewall Git system.
- Analyzed cookbooks and offered plan to fix & rewrite recipes

Technical environment: Chef, Ruby, Openstack, Git.

SOFTGATESYSTEMS COM – New York, NY

DevOps Engineer

- Created a customized base VMware Debian 7 7 0 installation
- Python scripts to automate provisioning of new servers and ongoing maintenance of them
- Created Chef cookbooks and automate the deployment of new VMware instances into a new QA environment
- Created a Chef "debian_base_configuration" cookbook and applied to new instances
- Provided code updates via Git and BitBucket

Technologies: Chef, Python, Debian 7 7 0, PHP, VMware vCloud, vSphere 5 5, ESXi, Git, BitBucket

VERIZON COM – Richardson, Texas

DevOps Engineer

- Setup a VMware lab inside VMware workstation, including 2 VMware ESXi hosts, and a Windows Server host running VCenter
- Cloud Integrations: Integrate VMware vCloud Director API into Scalr Open Source edition
- Installed vCloud Director and vShield Manager into the ESXi host via vCenter
- Modified source code of Scalr to support vCloud
- Provided code updates via Git; posted code updates on BitBucket

Technologies: PHP, Scalr, VMware vCloud, vSphere 5 5, ESXi, Git, BitBucket

SCHOLASTIC COM – New York, NY

DevOps Engineer

Developed and automated deployment for multiple Scholastic com properties:

- Developed the automated deployment using Jenkins, chef, and Python scripts.
- Deploy these multiple web properties to multiple environments (including Dev, QA, and Production).
- Jenkins executed the python script; runs a chef search tagged and match this environment and website, login to the servers using the Python Fabric module and execute chef-client.
- Clear Drupal cache on any server tagged as 'Admin' (if the option was checked in Jenkins) as well as clear Varnish cache and multiple Akamai or Cloudfront URL's

- Created a web-based Control-Panel to automate the creation and track instances on AWS using the chef knife.
 - Modified, updated and fixed existing chef cookbooks, as well as created new recipes & cookbooks.
- Technologies:** Python, Fabric, PHP, MySQL, Akamai Site Accelerator, Amazon Cloudfront, JQuery, Varnish, Amazon Cloudfront, Amazon EC2, Amazon S3, Amazon RDS, Jenkins, Opscode Chef, Akamai, Microsoft Windows Server 2008, Microsoft Windows Server 2012, IIS, Amazon RDS, HTML, CSS, RHEL.

3/12 to **[Consulting]**

2/13 CEO

- **Solv:** Created encrypted backup system to auto-backup/encrypt/store on an hourly/daily/monthly basis.
- **WHYY / NewsWorks:** Fixed MySQL slow query by adding a HEAP in-memory caching table & better SQL queries.
- **Nielsen:** Worked on Nielsen Photo Network/NielsenContests.com/IPNstock.com, migration into AWS.
- **Conde Nast:** Coded for "SWEEPR", an in-house sweepstakes/contest program builder; migrated image storage to S3; fixed MYSQL issues.

Technologies: Apache, MySQL, PHP, Amazon, CentOS, HTML, Linux, Godaddy, AWS, EC2, RedHat, S3, RDS.

12/05 to **Freelancing**

10/11 **PHP Programmer**

- Created hundreds of PHP scripts based on the LAMP (Linux/Apache/MySQL/PHP) stack for international clients.
- Created PHP scripts to monitor the registrar's list of 90,000,000+ domains (the entire .com namespace) for expiring domains; automatically update MySQL database with daily updates
- MySQL database kept track of domain's statuses, PHP scripting to execute 'dig' and 'whois' at timed intervals to detect status changes
- Created DNS Management System to provide directory services for 1+ million sites (PHP/MySQL).
- Created rss2blog, a WordPress plugin that creates posts from RSS feeds (PHP, MySQL, WordPress).
- Developed data mining and scraping scripts.
- Managed Linux servers.

Technologies: PHP, MySQL, SEO, curl, data mining, regular expressions, HTML, JavaScript.

EDUCATION:

Yeshiva Tomchei Temimim Chabad-Lubavitch, Ramat Aviv, Israel

2009-2010

Important Note: I can get anything done - **even technologies not listed on my resume.**

How it works: I can delegate - at my own expense - to a team of over 1,000 developers.

Technologies my extended team worked on (# of concurrent projects)

.NET (190)	Adobe Pagemaker (4)	Amazon S3 (6)
.NET Core (31)	Adobe Premiere Pro (22)	Amazon Web Services (176)
