

Adarsh Reddy

Email: adarsh.reddy2015@gmail.com

PROFESSIONAL SUMMARY:

- Accomplished QA Leader with an exceptional performance record in organizational development and growth with over 8 years' experience in Software Quality Assurance.
- Successful QA Lead with diverse background in multiple industries, contributed to small and large companies in various domains such as Networking, Technology, ecommerce, B2B, Customer Relationship Management (CRM) systems, HR systems, Financial Services, Health care, Electronics, Research, Retail solutions, web 2.0.
- Experience managing globally distributed QA resources. Proven expertise in building relationships with vendors for Quality Assurance services.
- Primary Champion in design, development and implementation of Testing Center of Excellence (TCoE), Quality Center of Excellence (QCoE), Agile QA practices, Software QA Testing Strategies and Test Automation frameworks. Creates, presents roadmap and recommendations to executive levels, and leads implementation working with internal resources and vendors.
- Possess expert presentation, communication, interpersonal skills to liaise with clients and senior management able to forge solid relationships with teams, business, leadership and partners, and build consensus and communication across multiple organization levels.
- Proven expertise with different testing methodologies Black box, white box, Grey box etc. and different levels, types of testing Unit, System Integration (Functional, Integration, Compatibility, Localization, Internationalization) Regression, Performance(Load, Stress, Volume), Security and User Acceptance Testing.
- Active in the testing community, regularly attends workshops, conferences, discussions, presentations and keeps up to date on the latest testing standards, best practices, tools, and methodologies.
- Adept with software development life cycle (SDLC) methodologies like Waterfall, Agile scrum, Continuous Integration, Test driven development, behavior driven development. Extensive experience with different phases of the Software Testing Life cycle (STLC).
- Expert in managing test environment in the cloud (SaaS, PaaS and IaaS). Extensively involved in testing SOA RESTFUL, SOAP web services.
- Experience conducting Performance testing and providing recommendations for code optimization, tuning, memory profiling, etc.
- Extremely familiar with CMMI and TMMI maturity levels and building continuous process improvement frameworks.
- Experience managing multiple QA projects with global resources and delivering them with required quality on time and allocated budget.
- Quick learner, able to grasp, master new concepts, technologies easily and creatively think outside of the box in conceiving and developing company needs and solutions while performing within established boundaries.

EDUCATION:

Bachelor of Technology (B.Tech) in Computer science

Masters in Software Engineering

Certified in Software Testing and Quality Assurance.

TECHNICAL SKILLS:

Programming Languages	C, Pro C, C++, JAVA, J2EE, HTML5, CSS, XML, XSD, XSLT, JSP, C#, VB.Net, ADO.Net, PHP, JUnit, NUnit, socket Programming, Data Structures, UML 2.0, Web services, MSMQ, Perl, Ruby, Ruby on Rails, Python
Scripting Languages	shell scripting, Java Script, VBScript, TSL
Databases/DB client tools	MS SQL Server 2000/2003/2005, SQL, Oracle 8i/9i/10g, MySQL, MS Access, SQL developer, toad,Cassandra,MongoDB
Web & App servers	IIS, Apache Web Server, Apache, Tomcat, Web Logic, Web Sphere, JBOSS,Vmware,Hadoop
Testing Tools	HP Quality Center/ALM, Quick Test Professional, Load Runner, Bugzilla, Selenium, Win Runner, Test Director, JIRA, SOAP UI, Clear Quest, IBM Ranorex, CodedUI (MTM),cucumber, JSpec , RSpec, JUnit , HttpUnit , Nunit , Jmeter , Firebug , Firefinder, REST Client, Hudson, Cruise control, Jenkins,Wiki central,Rally
Version control systems	Visual Source Safe (VSS), Perforce, CVS, Subversion.
Platforms & IDE	Net Beans 6.5, Eclipse Helios, Visual Studio 2005/2008/2010, TFS, SharePoint
Security Frameworks, Protocols	Penetration Testing Framework, Ethereal, Nessus, Backtrack security Suite,SMTP,TCP/IP,FTP,HTTP,SSH,Proprietary protocols (CISCO-HNAP),WAP,SOAP
Operating Systems	Windows 7/2000/XP/Vista, MS-DOS, Linux, UNIX, MAC OS Tiger/Panther/Lion,VMware
Mobile OS	Apple IOS, Android, windows mobile
Desktop Applications	MS-Project, Outlook, Lotus Notes, ERD commander, Crystal Reports, Adobe Photoshop, MSVisio, XML Spy, ant, Maven, MSOffice Suite, IE, Fire Fox, Mozilla, chrome, Netscape, and Adobe Acrobat.

PROFESSIONAL EXPERIENCE:

Cisco Systems

Jan 2012 –Present

Test Lead/Test Architect

Achievements:

- Performed the role of QA Architect designing and developing Automation Frameworks for Functional, Regression, Performance and RESTFUL web services Test Automation using Selenium web driver , Jmeter and JUnit.
- Led the full lifecycle of Quality and Testing delivery services from requirements through support. Integrated activities with business units and other areas of the IT Department to ensure the successful implementation and support of project efforts.
- Managed the testing, Quality Assurance staff as they worked with different applications and project teams responsible for the systems that support the selected business function and processes.
- Managed complex software testing environments with dependencies on multiple build deployments and hardware components. Led automation of build releases by using ANT scripts in Hudson.
- Hired QA resources, defined goals and motivated personnel to accomplish objectives. Provided leadership & technical direction to staff, peers and project managers. Built, trained & mentored onsite & offshore teams.
- Designed and developed a framework and governance structure to enable the implementation of TCoE. Spearheaded the assessment of existing QA processes, standards and defined implementation strategies for TCoE.
- Developed and implemented Automation test strategies for functional, security and performance testing of mobile applications using emulators and real devices such as smart phones (iPhone, iPod, android, blackberry etc) and PDAs.
- Experience in reviewing & analyzing the business requirements & technical specifications with product management, project management and writing detail oriented Master test plan, test cases, test scripts, traceability matrix and preparing the test reports.
- Interviewed, Analyzed & selected the right vendors for testing and quality assurance services. Created Sow's, purchase orders and managed invoices related to QA vendors.
- Hands on with testing the mobile application for Ios, Android powered devices.
- Primarily responsible for building the scalable test infrastructure and establishing the Testing center of Excellence for functional, cross browser, performance testing in the cloud using the AWS infrastructure.
- Hands on experience in developing custom components for Jmeter and Selenium in an integrated environment for testing against RESTFUL web service API's. Built, developed and maintained test framework for testing Oauth 2.0 workflow implementation. Responsible for creating the test infrastructure for testing the firmware against various router models, platforms.
- Worked closely with the project manager, product manager, and development teams to set and evaluate milestone criteria to ensure released products are on schedule with high quality and to identify issues and work towards their resolution. Responsible for preparing QA estimates and negotiated with the product management, providing quality sign off over the builds into production, RTM.

Environment & Tools: Agile scrum ,TDD, Selenium Web driver, Jmeter, JAVA,JUnit,TestNg, Python, Perl, JIRA, ApTest Manager, Oauth2.0, REST client, Firebug , SQL developer , Oracle , Ios, Android , Hudson,SaaS,IaaS,AWS, Maven , Shell script ,ant ,AWS, Apache httpclient library , Php CURL, Router Model (EA2700, E4200v2, EA4500, EA3500, EA6500), Mac, Windows, TCoE,Python,Rally,Linux

Risk Management Solutions (Newark, CA)

May 2011 –Jan 2012

Test Lead

Achievements:

- Led and managed the QA team members. Reviewed Business Requirements, Functional specifications and developed Testing Strategy and QA project plan.
- Led the development of Test Plan, Test Scenarios and Test Cases in ApTest. Performed (RESTFUL web services) API testing.
- Spearheaded the Functional Testing Automation by designing, developing, implementing a data-driven Automation Framework using Selenium and Performance test automation (load, stress testing) using Jmeter. Led the Load, performance testing and analyzed the test results against the benchmarks.
- Established the defect management system using JIRA.
- Managed multiple live applications and projects with aggressive time-lines and schedules. Managed deliverables, timelines and exceeded client expectations. Coordinated effort with software development and release teams to ensure quality software releases.
- Managed offshore software development projects with the teams distributed in different time zones.
- Instituted Quality Assurance processes, methods, techniques and best practices, enhancing overall quality of systems by 80%, minimizing delivery timeframes, and reducing total number of critical issues reported to support team.
- Worked with vendors in hiring the QA personnel and building the QA team.
- Hands on experience with developing custom tools and components for integration into the existing test infrastructure. Worked with large scale databases with size ranging from GB-TB.
- Responsible for Authoring User acceptance scenarios in cucumber, QA Documentation, Master Test plan, Test cases.
- Cultivated an environment of collaboration, teamwork and innovation by offering creative growth opportunities and providing mentoring/coaching along the way.

Environment & Tools: Agile CI,SCRUM,Test Driven development,Behaviour Driven Development, Windows, Visual Studio 2010, SQL server 2008 R2E, JIRA, VSS, Ncover, SOAP UI, C#, Altova XML Spy, XML, XSLT, Fiddler, MS SharePoint, SAAS, Hudson, Test Driven Development,CodedUI test,Jmter,Selenium Web driver,Cucumber,Rspec,Ruby,Rally,Linux

BIO-RAD, Hercules, CA

Sep 2010-May 2011

Test Lead/Architect

Group: Global IT

Achievements:

- Managed the administration of Testing Tools, testing hardware and test environments for products and applications.
- Responsible for authoring all QA documentation (master test plan, test cases, test report, traceability matrix and defect reports).
- Led the RDBMS testing using TOAD to run SQL queries for database validation of updates and inserts.
- Manage and Mentor onsite and offshore QA engineers in developing the automation framework with QTP. Coordinated efforts between product development teams and enterprise QA teams.
- Lead QA team to conceptualize, determine and develop test approaches and methods for unit testing, integration and functional testing, load and usability testing according to the application complexity and test requirements.

- Designed the Architecture and implemented Rapid Development QA processes and practices, including defect and test management, Test reporting and test archiving.
- Provided the architecture for cross browser and cross platform testing using Selenium RC/Grid. Provided the integration of QC and QTP and centralized the testing for various projects.
- Established the in house test infrastructure to perform Load/stress testing using HP Load Runner. Hands on experience in developing batch jobs in Perl, which will receive emails, store email in oracle database and sending auto reply based on contents of the email.
- Responsible for system testing, integration testing, regression testing and stress testing of quote to order and order to cash cycle scenarios for e-commerce application.
- Involved in improving the quality of software by developing and executing (positive, negative) test scenarios that conform to functional specifications and design documents.
- Achieving the benchmarks for the performance metrics defined in the SLA.
- Worked on creating and developing UI regression framework using selenium.
- Actively worked with Dev, PM, Support, Ops, Manufacturing and SEs to get key projects off the ground and released to customers

Environment & Tools: *Quality Center, JIRA, Load runner, Agile Scrum, Continuous Integration, Test Driven Development, Selenium , IaaS, Jspec, Behaviour Driven Development, Ruby, Rspec, Cucumber, SaaS, Perl, QTP, TestNg, Rally, C/C++, JAVA*

Bank of the West, San Ramon, CA

Jan 2008- July 2010

Test Lead

Mobile Banking Group

Achievements:

- Responsible for developing the architecture of the complex QA framework which has dependencies over multiple software builds hardware and mobile devices.
- Created multiple tests suites using an existing framework and QTP to test the GUI on various platforms and browsers (cross browser testing and cross platform testing).
- Responsible for testing mobile apps for iPhone, Ipad, Android and windows mobile using emulators and plugins for QTP.
- Managed evaluation, selection, procurement, installation and configuration of automated testing tools like HP QTP, Load Runner and QC for Functional, Regression and Performance testing.
- Implemented Black Box & White box testing of software written in JAVA, J2EE, XML, and by using JUnit and Abbot.
- Worked as a liaison with the different stakeholders to communicate the best practices, build consensus and implement agile QA practices.
- Negotiated software contracts with vendors and saved the cost of Automation testing tools software, QA consultants by 100k and Automation Tools maintenance by 200k per year up to a period of 5yrs. Managed contracts with existing partners.
- Designed and implemented basic/complex SQL queries for backend testing.
- Led the testing efforts for performing functionality, integration, usability and regression testing.
- Responsible for centralizing the testing approaches across the organization by establishing Quality center of excellence and governance processes.
- Hands on experience in created automation scripts using HP QTP.
- Responsible for authoring the Master test plan for the modules like "Oauth 1.0", "View Balances", "Pay Bills", "Transfer Funds", "Security" and "Alerts".
- Managed and mentored QA teams that are geographically dispersed.

Environment & Tools: *Agile (SCRUM, continuous Integration), QTP 10.0 mobile plug-in for IPHONE and Android, Quality center, JIRA, CVS, SAAS, UNIX, Shell scripts, Perl, Load Runner, Hudson, JAVA, QcoE, Junit, Abbot, Linux, C/C++*

Actelion, South San Francisco, CA
Software Engineer In Test
Master Data Management (MDM)

Jan 2005 – Dec 2008

Achievements:

- Involved in reviewing FSDs, technical requirements, ER Diagram & involved in ambiguity review meetings
- Responsible for producing all QA/QC documentation (test cases, test report, traceability matrix and defect reports)
- Created "Views" for adhoc reporting, data analysis & data quality management
- Responsible for completing system testing, integration testing, E2E testing and Regression testing.
- Responsible for creating test data for different kinds of testing(standardization, matching, clustering, relationship tables) for MDM Phase I, Phase II
- Log defects with the proper severity/priority based on risk and impact to the feature under test
- Performed data analysis of standardized data against source data by writing SQL queries in order to check quality of data.
- Fine-tuned search engines, extracted data from different databases, and migrated data back and forth using SQL.
- Reported defect using clear quest and interacted with developers to resolve any defects/issues.
- Selected the test cases to be automated and performed functional testing of the front end (end user web based querying tool) using Selenium(IDE & Remote Control) and performed Data driven testing of the web based tool using TestNG
- Involved in cross browser testing of end-user web-based querying tool on browsers like Internet Explorer, Netscape, Safari and Firefox with minor versions as well.
- Performed cross platform testing in windows, Mac and Linux platform for compatibility testing of the end user tool.
- Reviewed business requirement document (BRD) & functional design document (FDD) to create test cases based on test scenarios and Interacted with the product management for ambiguity review.

Environment & Tools: selenium, SQL server management studio, SQL Server 2008, MS access, T-SQL, MS Share Point, Lotus notes 8.5, SSIS, SSAS, SSRS, Flat files,JUnit,TestNg,C/C++

Infosys
Software Developer

Jan 2004- Jan 2005

Responsibilities:

- Implemented windows forms/Web forms for numerous modules using C# & Vb.
- Made reports using Crystal reports.
- Writing user defined functions, stored procedures and views using SQL Server 2000.
- Worked on web Development projects. This involved development of user interface, Validation, Event driven programming in C#.Net, ADO.NET.
- Write code according to company standards and policies, review code with team members to identify and correct deficiencies and ensure adherence to coding and documentation standards.
- Assisted QA teams in performance testing and fixed the code blocks having memory leaks and deadlocks.
- **Environment & Tools:** SQL Server 2000,VB.Net,C#.Net,.Net Crystal Reports.
