

Naga Jyothi Kunaparaju
347-341-3307
jkunaparaju@gmail.com

Profile Summary:

- Certified Spark and Java Developer
- More than 9 years of work experience in Object Oriented Design, Modeling, Programming and Testing in Java, J2EE, XML and Relational Databases.
- Have Proficient Experience in business Systems analysis and design.
- Architect, leading Big data development projects.
- Masters in Data science.
- Expert in applying Machine learning models in real time using Big data technologies and streaming technologies

Technical Skill Expertise:

Programming Languages	SCALA, JAVA, J2EE, PYTHON, R, SQL, Unix Shell Script
Big Data Technologies	SPARK, MESOS, HDFS, S3, AWS, EMR, DATABRICKS, SNOWFLAKE, SPARK STREAMING, SPARK ML
Data Visualization	Tableau, Plotly, R Shiny, Power BI
Data Science	Spark ML, NLTK, Machine Learning Marketing Analytics & Operational Research, Predictive Analytics & Financial Modeling Statistical Programming(SAS)
Tools & Utilities	Eclipse, IntelliJ, R studio, R Plumber API development, KAFKA
Application/Web Servers	BEA WebLogic, ATG Dynamo, Tomcat.
RDBMS	Oracle , MySql , MS SQL Server , Cassandra
Cloud	AWS S3, KENISIS Streaming, EC2

Professional Work Experience:

DTCC, Tampa, FL
Big Data Developer

Mar '19 till Date

Project: DTCC Risk Management
Responsibilities:

Design and develop Data Science and Big data applications within Risk Management.

- As Part of the Risk Management Data science team worked on various AI/ML model development and Enhancements projects including ServiceNow Incident Priority Prediction, Email Spam Filtering, Credit Risk Analysis model building.
- Architected and developed DTCC Security Log Search platform for Risk Management. Design and developed Data reconciliation application for 90 different heavy volume log data from various sources across the entire DTCC.
- Design and create big data pipelines to maintain stable data flow to the machine learning models both in batch mode and near real-time mode.
- Interface with Operations/ System Admin/ Data Science teams to ensure data pipelines and processes fit within the production framework.
- Ensure that tools and environments adhere to strict security protocols. As part of Data Science & Engineering team, needs to understand, enhance and deploy AI(Artificial Intelligence (AI)/Machine Learning (ML) Models and serve their outputs as RESTful API calls and also be able to estimate performance and dependencies.
- Document and review model performance strictly fit the DTCC Model validation team guidelines.
- **Technology Stack-** Apache Spark, Scala, Mesos, AWS , Python, R studio, Spark ML , R Rest API(Plumber), Snowflake, Power BI

Royal Caribbean, Miami, FL

Project: Data Streaming

Responsibilities:

April '18 – Feb '19

- Develop and deploy Monitoring and Reporting system for Royal Caribbean Ship to Shore MicroServices messaging platform.
- **Technology:** Spark 2.1, Scala, AWS EMR, YARN, HDFS, Jenkins, Bitbucket, Jira, Cassandra, Kafka, Couchbase, SQL Server, Confluent, Maven, Jenkins, Groovy, Mesos.

DUN & BRADSTREET, Shot Hills, NJ
Application Developer

Sept '17 – Mar '19

Project: Alternative Data Solutions

Responsibilities:

- Responsible for developing an end-to-end pipeline for real-time analytics processing of heavy volume news data. The pipeline was developed with a distributed queue (AWS Kinesis streaming) for large-scale data ingestion further processed using Spark structured streaming into S3.
 - Topic modeling by training and scoring of news data done using SparkMLlib's LDA Model.
 - Named entity recognition (NER) and sentiment analysis was done with Spark NLP & Stanford CoreNLP. Developed website and Dashboards for end users to present topic modeling end results in near real-time.
 - **Technology:** Spark 2.1, Scala, Python, Flask, HDFS, HADOOP, Tableau, Databricks, AWS, Kinesis, EMR, LDA Topic Modeling
-

Graduate Teaching Assistant, Saint Peter's University, NJ
Feb '17 – May '17

Project : Teaching Assistant (Data Mining and Big Data Analytics)

Responsibilities

- Quickly understand the difficulties in University policies for installing new software. Overcome hurdles to set up databases by communicating with the IT department. Mentored students to setup Spark Clusters in AWS and access S3 Buckets with AWS api calls.
 - **Technology:** Mysql, Scala, Java, Python, R, SAS, Plotly, Tableau, Predictive Modeling, Postgres, SQL Server, Spark, Hadoop, AWS
-

Project: Vectorum
Hyderabad, India
Software Engineer.

Mar '15 – Dec' 15

Responsibilities:

- Developed data pipeline for Machine Sensor data. Written programs with Spark Scala, Play Framework APIs, data aggregations with Hive, and formatting data(JSON) for visualization
 - **Tools and technologies :** Spark, Scala, play, Hi-charts, D3, HDFS, Jira, Github, Linux, JASON, Parquet, AWS, EC2, S3
-

Project: MCI Telecom Billing, DMV Nevada Vehicle Registration

Mar '1999 – Feb '00

Cedar Rapids IA
Software Engineer.

Responsibilities:

- Participated in many project implementation including MCI Telecom billing and Nevada state DMV Occupational and vehicle licensing system
- **Tools and Technologies :** Java 1.1, DB2, COBOL, Servlets, Applets

Project: Production Planning and control

Mar '00 – Sept '04

Visakhapatnam Steel plant, Visakhapatnam , AP , India
Engineer.

Responsibilities:

- Projects Worked : Maintenance of Production planning and control systems, Parts Inventory, Material Design
- **Tools and Technologies :** CICS, COBOL, IBM 3090, ORACLE, DB2

Certified Spark Developer, Oracle Certified Java Developer

EDUCATION

Master of Science in Data Science *Saint Peter's University, Jersey City, NJ*

Bachelor of Science in Electronics and Communication, *JNT University, India*
