

RAVISHANKAR B KRISHNAPPA

Contact: (903) 747-5048

E-mail: krishnaravi0206@gmail.com

SUMMARY:

- Around 10+ years of experience as an IT Consultant in all aspects of **Client engagement lifecycles** including **Pre-sales, Requirement gathering, Effort scoping, Developing, Product implementation, Production support** and System upgrades on **ITSM** and **Monitoring**.
- Over 6.5 years of experience as ServiceNow suite developer and administrator.
- Overall responsibility, including management, maintenance, upgrades, and improvements for IT Service Management application (ServiceNow) and underlying ITIL Processes.
- Working experience of various phases of **SDLC** such as Requirement gathering, Analysis, Design, Code Construction and Testing.
- Worked on Various Web Services Integrations using **SOAP** and **REST**.
- Client sides Scripts, Glide API's, Inbound email Actions, SNOW OOB implementations.
- Server-side Script's Business Rule, Script Include, Processors. **REST API, Table API's, SOAP web services. MID server Integrations.** Background scripts. Task relationship, many-to-many, one too many. Reports customization, Database views
- Implemented **Discovery, Orchestration, CMDB, Performance Analytics, Project Portfolio management, Software and Hardware Asset Management, Service Catalogs, HR Case Management, Legal Management Release Management and Scoped Applications** for multiple customer accounts.
- Built and designed **Orchestration** related workflows for highly used IT Service catalogs.
- Configured **Orchestration** plug-ins in Fuji, Geneva and Helsinki versions.
- Performed **CMDB baseline validations**.
- Developed **probes** and **sensors** for **discovery** of Infrastructure elements.
- Used **Service Mapping** to establish relationships between the different infrastructure components that are dependent on each other.
- Configured **alerts** using **CMDB** and **Event Management**, that helped identify infrastructure issues as soon as they occurred.
- Worked with **Orchestration** which enables an IT organization to automate complex tasks on remote computers reliably and quickly, with best practices every time.
- Used **ACL's for controlling the security** mechanism in ServiceNow.
- Developed and configured **Business Rules, Script Includes, UI Policies, Catalog Client Scripts and Client Scripts**.
- Customization of Incident Management Application.
- **Documented** all implementations and best practices defined within team.
- **Developed Orchestration workflows for Amazon EC2, PowerShell and Puppet.**
- Attention to detail and complex problem-solving abilities from **operational** and **technical** perspective.
- Functional knowledge and implementation experience of **ITSM frameworks**.
- Highly accomplished and focused Technical consultant with broad experience in providing solutions over ServiceNow Architecture and familiar with Other ITSM applications.
- Budget management for all ITSM and Service desk.
- Implemented **Release Management** for ITSM modules.
- Hands on experience in **web development using AngularJS, HTML, JavaScript, CSS and Bootstrap**.
- Developed Import Sets to import data from different Sources.
- Created & maintaining **Requirement Traceability Matrix** in order to track the development and QA process.
- Closely involved with the **QA team & assisted them to develop quality Test cases by referring the Use cases**.
- Assisted the **QA team to complete the performance testing** of the integration project.
- Ensured Disaster Recovery, UAT and Training server consistency with production environments.

EDUCATION

Master of Science in Industrial Management

The University of Texas at Tyler,

December -2017

Tyler, Texas

GPA: 3.90/4.00

Bachelor of Science in Mechanical Engineering

Visvesvaraya Technological University

2000 - 2004

Bangalore, India

GPA: 3.25/4.00

TECHNICAL SKILLS:

ITIL Tools	ITSM, ServiceNow (Istanbul, Helsinki, Geneva, Fuji etc.), BMC Remedy
Web/Application Servers	IBM Web Sphere, Web Logic
Software Methodologies	Agile, RUP, SDLC, Waterfall, Scrum, Six Sigma, CMMI, ITIL
Programming Languages	C, C++, Java, C#, Net, Vb.Net
Operating Systems	Windows NT/2000, Linux, Solaris and HP UNIX
Database Tools	Oracle 9i/10g/11g, SQL Server-2000/2005, Sybase, SQL, PL SQL
Scripting Languages	JavaScript, Jelly Script and UNIX Shell Scripting
Web Scripting	AngularJS, HTML, CSS and Bootstrap.
Defect Tracking Tools	Load Runner and QTP
Six Sigma	LSSBB (UT Tyler), LSSGB (ATMAE)

PROFESSIONAL EXPERIENCE:

Low & Bonar, Asheville, NC

02/ 2020 – Till date

Role: ServiceNow Developer

Responsibilities:

- Provided health checks **on Service Now for ITAM and CMDB processes**
- Provided **ITAM and Configuration** subject matter expertise.
- Provided guidance to clients on software asset management process improvements.
- Provided integration guidance on ITAM and CMDB projects for system integration
- Demonstrated skills in IT operations with a technical focus on IT asset management, discovery, license management, and configuration management (CMDB).
- Perform ITIL maturity assessments.
- Design solutions for Green IT infrastructures
- **Architect solutions for ITAM solutions**
- Demonstrated business effectiveness skills such as establishing total cost of **ownership (TCO) models for IT assets and developing a cost savings business case for same.**
- Created complex transform scripts in transforming the data into the SNOW database.
- Created generalized framework for repeating problems and incidents.
- Defined the process for each service request.
- Created **scheduled tasks, monitoring the ticket queues and generating statistics.**
- Checked the **change management** document and verify the changes.
- Assisted in **Release Management** during product and patch releases.

- Provided training sessions **on ticketing tools, reporting and data entry.**
- Assisted testing teams with **testing the applications for functionality and integrity.**
- Developed **UI Actions, script includes and Business rules** for overall platform.
- Followed up with clients and customers on process requests, special requirements etc.
- Analyzed business processes and provide innovative and scalable solutions to increase operational maturity.
- Consulted with clients/project manager to architect and develop appropriate process solutions
- Advised on options, risk and impacts on business processes and cultural adoption.
- Followed-up on outstanding client needs and provide timely status reports to project manager.
- Communicated technical problems and solutions to both technical and non-technical audiences.
- Built positive relationships with external clients by providing excellent service/support and consistent communication as appropriate.
- Performed maturity assessments **on ITAM and CMDB customer processes.**
- Built process roadmaps for **ITAM, and CMDB processes.**

The Quartz Group, Asheville/Spruce Pine, NC

05/ 2018 – 12/2019

Role: ServiceNow Developer

Responsibilities:

- Implemented, documented and maintained the Service-Now platform to meet specific business needs to support ITIL and business processes.
- Created reports, Workflows, data imports for Incident, Problem, Service Request, and Change ServiceNow modules.
- Used ServiceNow Orchestration to manage and maintain workflow-automation.
- Implemented ServiceNow Discovery and CMDB and integrated it with Change management.
- Involved in introducing AngularJS Plugin into ServiceNow and widely used it in creating the Front-end view of Portal.
- Configured Orchestration for management of datacenter assets and extended built-in orchestration activities (ex : password reset)
- Used ServiceNow Orchestration to automate business processes and speedup new employee onboarding.
- Setting up Change Management along with Advanced Risk Assessment Calculator (on a script include level).
- Have hands on Experience on Integrating Service Now with third party tools and Domain separations for the external users to raise incidents in SNOW.
- Worked with Orchestration which enables an IT organization to automate complex tasks on remote computers reliably and quickly, with best practices every time.
- Involved in development of requirement integration components (**SSO, LDAP, and SOAP**).
- Used Service Mapping to establish relationships between the different infrastructure components that are dependent on each other.
- Developed and configured **Business Rules, Script Includes, UI Policies, Catalog Client Scripts and Client Scripts.**
- Customization of Incident Management Application.
- Worked on data upload and configuration in CMDB and other **ITSM** modules.
- Configured alerts using **CMDB and Event Management**, that helped identify infrastructure issues as soon as they occurred
- Strong knowledge in creation of PA reports, updating the OOB indicator which includes service management operations, service strategy, Human resources management.
- Extensive experience in adding fields to the metrics capture of service now Performance Analytics, and creating roles and groups using dashboards, analytics, time charts.
- Created 45 scripted web services which are used in setting up a robust process for integrating Service Now with a Procurement Tool. Also has an in-depth knowledge **about Direct Web Service API of Service now, SOAP and WSDL.**
- Extensively worked on Integration with **REST GET and POST using basic HTTP Authentication.**
- Good knowledge on Single Sign on and event-based integrations.

- Strong knowledge in updating visualizations of performance across teams and organizations, and in establishing service delivery.
- Had good knowledge working on **LAN Password Reset and Integrating with other Servers using Orchestration**.
- Configuration of Email Notification and Alerts to notify users about specific activities in the system such as updates to Change and Problem requests.
- Responsible for access control, security, minor enhancements such as form or workflow editing, and UAT/Regression testing of any development.
- Responsible for maintaining and growing data held within Service Now such as our users, locations, configuration items, service catalog items.
- Created reports, **workflows, and data imports for Incident, Problem, Service Request, and Change ServiceNow modules**.
- Extensive development in our Service Now platform including creation and customization of our **Incident, Request, Service Change, Service Level, Knowledge and Configuration (CMDB) applications and processes**.
- Responsible for gathering requirements and customizing Business Service Catalogs for AIG organization from the scratch.
- Created and Maintained foundation data - User Accounts, Approvers, Support Groups, Create new service catalog requests and items with variables.

KCT Engineering Private Limited Bangalore, India

04/2013– 01/2015

Role: ServiceNow Analyst/Developer

Responsibilities:

- Performed Project Scoping, Organization and Management including Business and IT Requirements.
- Created functional and technical specifications documents for various Service Now modules.
- Development of Service catalog, which includes creating new catalog items, designing workflows and execution, plans.
- Implementation, Customization and Maintenance of ITIL modules such as **Incident, Change, Problem, Knowledge, Service Catalog, CMDB in Service Now**.
- Used Orchestration for automation and accelerating process for Employee onboarding, file transfer and remediation.
- Worked on evaluation, selection, and configuration/developed, and deployed ServiceNow as our ITSM Toolset.
- Configured multiple **Catalog Items Front-end web / GUI components using AngularJS, JavaScript, CSS, and HTML**.
- Configured multiple forms for Asset module using Configuration Management Database.
- Worked on end-to-end implementation of **CTI Integrations**, Supported the team with the workflow of the integrations.
- Created the UI pages to use them in catalog items, Implemented-using UI scripts.
- Wrote **Catalog client scripts and UI policies** to make client-side changes.
- Developed Transform maps to map values between **Import Set and ServiceNow tables**.
- Involved in developing **Transform Scripts to trigger events** during import process
- Knowledge on **License management, Optimization, planning for audit as per License agreements and Tracking illegal software licenses**.
- Developed Import Sets to import data from different Sources.
- Supported the team with improvising the Discovery tool and the configuring the CI's.
- Worked on order guides, to arrange them in sequential order to make the user comfortable while raising a request.
- Integrated **Service catalog module with “Net cool” monitoring tool using Web Services** and fixing them.
- Created notifications based on user requirements and configured inbound email actions to create incidents or requests.
- Established and maintained effective communications with customers, other technology specialists, and vendors about services.
- Discussed the business requirements with clients and documenting them into process requests.

- Built forms from scratch along with advances customizations at the level of UI Macros/UI page as per the complex requirements.
- Created a lot of client's scripts/UI policies also with a lot of high-level customizations like attaching a **custom event and DOM-injection with JQuery and Prototype**.
- Created many standard workflows which are being re-used and propagated and handled many custom events.
- **Installed AngularJS Plugin into ServiceNow and developed service portal using the two-way data binding methodology.**
- Good knowledge on **Single Sign on and event-based integrations**.
- Set up **Configuration Management from scratch defining the CI classes and their relationships**.

Nederman India Private Limited, Bangalore, India

08/2011 – 12/2012

Role: ServiceNow Developer

Responsibilities:

- Worked with client and gathered functional requirements within ServiceNow.
- Facilitated rollout of new applications and modules.
- Designed and implemented new functionality using **Business Rules, UI Policies, and Access Lists** etc.
- Created **Service Catalog and Request Workflow Design and Configuration**.
- Designed the **Content Management System for Varian system which involved layout, CSS and service catalog work**.
- Created various workflows for **Incident Management, Change Management, Service Requests and SLA's**.
- Created Buttons and context menus both on form and lists using **UI actions**.
- Designed many email templates by using **html and jelly scripting and used them in notifications**.
- Integrated Fire eye tool with **Service-Now using Email integration i.e. inbound actions** scripting.
- Worked on the integration of **ServiceNow with Siebel, integrated Service Catalog and Incident module**.
- Used JMS integration to fulfill this requirement, worked on **Scheduled Jobs and Mid Server Script Includes** to fulfill the requirements.
- Worked on order guides, to arrange them in sequential order to make the user comfortable while raising a request.
- Resolved typical Users access and roles issues by checking active directory and users table. Developed UI Appearance for **Service Catalog Requests**.
- Create, monitor, modify, and publish service catalog workflows with approvals.
- Configured multiple Catalog Items Front-end web / GUI components using **AngularJS, JavaScript, CSS, HTML and Bootstrap**.
- Designing, configuring and customizing new applications and modules. Assisting in troubleshooting patch / release management issues.
- Create and use update sets to move customizations between systems.
- Search, populate, and customize the knowledge base.
- Writing **Business Rules, Client scripts, UI Policies and UI Actions** to customize the instance as per business needs.
- Designed new Service Portals using **HTML5, Angular JS, JQuery and CSS**.
- Developed operational requirements documentation and train operational staff to maintain solution.
- Use business analysis skills to directly interface with customers to design and build applications that meet business goals and objectives.
- Managed and coordinated **testing of ITIL tool** upgrade.
- **Coordinated post-implementation testing and support**

Fluid Air Systems, Bangalore, India

10/2007 – 07/2011

Role: ITSM Engineer

Responsibilities

- Delivery of solutions to the customers to change current operations.
- Implement technology changes and process changes.
- A foundation understanding of **ITIL (Service Support, Service Delivery, and Business Services Management)**.
- Designing and implementing ITAM solutions.
- Designing architectures for ITAM systems including integrations with **financial, HR and other IT systems and ITIL processes**.
- Experience in project management and detailed technical planning.
- Implementing **ITAM processes, policies and procedures**.
- Assessing existing ITAM systems for improvements.
- Writing scripts for **automation of tasks (e.g. workflow, reporting, etc)**
- Generate detailed process and technical documentation
- Manage projects to complete customer requirements **for Altiris products**.
- Perform fact finding meeting with customers to gather solution requirements
- Perform system demonstrations for potential customers.
- Implement **Asset Management Solutions** on project basis.
- Develop **Business process to support** the proposed solutions.
- Develop processes around **Software Asset Management**.
- Propose best practice recommendations on **Asset Management**.
- Implementation of **Bar Code/RFID** solutions for various customers
- Produce reports using Excel from the **Altiris Solutions**.
- Design asset solutions to **manage T1, WAN**, and other networking devices.
- Integration activities with **HP, SMS, and BMC products**
- Implement and design **Altiris CMDB solutions** for customers

Think 3 Designs (I) Private Limited, Bangalore, India

06/2004 – 09/2007

Design Engineer /Senior Design Engineer

Responsibilities

- Creation of product configurator using Think PLM & Think Design software. Work involved the creation of 3D and 2D database for the different assemblies for mobile hydraulic equipment's.
- Reverse engineered a Telescopic Lifter for Oil & Steels S.p.A, Italy. This Telescopic Lifter was modified for higher altitude work.
- PDM activities, namely ECR, ECN, item creation using ThinkPLM, Think Design. Engineering calculations for components & assemblies
- Design of filters, cyclones, stacks, belt conveyors, bucket elevators, screw conveyors, oval tracks with applications of GD&T (ASME Y14. 5), and preparation of BOM.
- Project costs estimation, prepared project proposals, developed project-specific work procedures, project planning, and scheduling.
- Interfaced with key vendors on ongoing productions. Training and evaluating new vendors.
- Established standard training procedures for new hires and external staff.
- Conceptualization and sizing of system and components, including complete design and engineering of dust/fume extraction systems with proper Geometric dimension & Tolerance.
- BOM generation and approval, cost calculations, P&ID diagrams, project planning to closeout.
