and junior level staff to analyze and develop solutions. Eliminates and mitigates risk through cooperation with auditors.

General Ledger Achievements:

- Exported and integrated SAP data during change to SAP's Business Planning and Consolidation (BPC) system and subsequent change to Oracle's Hyperion system for financial consolidation.
- Reduced the time spent ensuring and verifying the accuracy of the year-end close process by streamlining IT procedures to support that process.

Accounts Payable and Receivable Achievements:

- Designed vendor interface using SAP IDOCS in Trans4M, repaired any issues, and maintained accuracy of vendor data. In this interface, vendor data is maintained in SAP and downloaded to Trans4M.
- Reduced purchasing costs by setting up terms codes and procedures to support cash discounts.
- Reduced manual effort by configuring foreign currency payments in Euros, Yen, and Pesos, including month end clearing of realized and unrealized gain / loss.
- Eliminated the cost and effort of in-house printing of A/P checks by working with Bank of America using DMEE to send check payment data to the bank for print and distribution.

Asset Accounting Achievements:

- Facilitated realization of fresh start accounting and purchase accounting by recalculating asset values using Excel and configuring and implementing new transaction types and LSMW programs to load the revised values. Used as part of the emergence from bankruptcy and later when the company was acquired and revalued by Iochpe Maxion.
- Implemented statutory, USGAAP, and Purchase Accounting reporting for non-USA locations by setting up multiple depreciation areas, including the use of a non-leading ledger and new depreciation keys.
- When corporate policy changed to require depreciation of high-value spare parts, created a new asset class and procedures to handle the acquisition, capitalization and depreciation of those assets.

Banking Achievements:

- Collaborated with treasury department to convert from Citibank to Bank of America as primary financial institution through set up of new house banks and bank accounts, configuration for electronic bank statement and lockbox, and creation of new data communication procedures.

Purchasing Achievements:

- Improved conformance to corporate approval limit policies by setting up new purchase requisition approval limits.
- Fashioned new plant codes to handle the shipment of purchased materials to new locations.
- Addressed auditor concerns by developing procedures to monitor open receipts and purchase orders as well as purging old purchase requisitions and purchase orders.

Other Achievements:

- Ensured system dependability by setting up test plans for all systems to be used during upgrade or support pack testing, by installing SAP notes, support packs, and support pack stacks, and by updating the SAP system from R/3 version 4.7 to ECC version 6.0.
- Supported corporate and international reporting requirements by changing the fiscal year (from February – January to January – December), changing reporting currency (from Czech Koruna to Euro), ensuring SEPA compliance with SWIFT and IBAN codes, and setting up electronic invoice reporting to the Spanish government.
- Reduced the effort to handle expense reports by expanding the use of the SAP Concur expense reporting system and “Connector” from the USA to Germany, Italy, Czech Republic, and Spain.
- Demonstrated flexibility and cultural awareness by working with management in Turkey and with users, consultants, and IT colleagues in India, Spain, Italy, Germany, Czech Republic, China, Thailand, and South Africa.
- Reduced expenses by converting SAP HR / Payroll system to Ultipro HR / Payroll system.

Education

Bachelor of Science in Mathematics

Michigan State University, East Lansing, Michigan
