NYC | 646-206-1810 | ss11600@nyu.edu | <http://www.linkedin.com/in/sichensong>

EDUCATION

New York University, Manhattan, NY

09/2018 - 05/2020

Master of Science, Management and Systems(STEM), concentration in Database Technologies, GPA:3.62/4.0

Beijing University of Civil Engineering and Architecture, Beijing, CHN

09/2013 - 06/2017

Bachelor of Management, Marketing

PROFESSIONAL EXPERIENCE

Product Analyst, UNOde50, Manhattan, NY

09/2019 - 12/2019

- Managed inventory database (Ruby), synthesized data and resolved issues of data integrity
- Contacted branch stores to identify complaint records and tracked follow-up actions
- Monitored product performance to highlight popular features (SQL) and recommended product design, increased sales by 26%
- Created competitive analysis dashboards using Power BI to measure key metrics performance and presented to the senior manager, thus increasing revenue sales by 4.36% during the winter season

Research Analyst, Privacy Guard, Manhattan, NY

06/2019 - 07/2019

- Designed personalized electronic questionnaire with more than 100 people participating to support product development
- Developed data model, including the E-R diagram and MetaData, and created database using Oracle to support queries
- Cleaned sales data through SQL and analyzed the influence factor of sales using multiple regression model

BI - Product Operation Executive, Wisers Information Limited, Beijing, CHN

09/2017 - 06/2018

- Communicated with non-technical clients to capture business problem and translated to technical requirements
- Created work breakdown structure using Microsoft Visio, and made schedule and allocated servers to manage multiple projects
- Monitored 1700+ social networks, cleaned data(Pandas & Numpy) and examined the issues of data transformation and integration
- Created technical documentation of data-driven processes for internal training
- Visualized monthly dashboards using Power BI, presented findings and delivered solutions, winning \$ 3,400,000 worth of contract
- Identified anomalous data point by analyzing eCommerce performance, wrote risk report to alert the client so that DARLIE won the NO.1 among toothpaste brands during the shopping festival
- Wrote sample analysis report for Deloitte to submit a bid and won the contract, which was worth \$280,000

Founder, Campus Entrepreneurship, Beijing, CHN

01/2014 - 05/2017

- Started an express delivery business on campus, developed a new process to facilitate express experience, managed the business for 3 years and earned more than RMB39,000
- Designed and developed relational database using Oracle to manage over 1000 subscribers information
- Led all aspects of data flows, analysis and traceability for enhancements
- Used decision tree to segment the users, computed the probability for each segment based on nested query (SQL) and found the combination of variables that could produce a high probability of increasing the orders
- Built logistic regression model to found the influence of price and dormitory location and adjusted price strategy

ACDEMIC EXPERIENCE (<https://github.com/sichensong-99/Analysis-Projects>)

Real-time Insights From Social Media Data

06/2020 - 07/2020

- loaded and inspected Twitter data for topics that were worldwide and in the United States at the moment of query using JSON file
- Found the common trends and extracted text, screen name and hashtag to dig into the hidden insights
- Computed frequency distributions for all names and hashtags
- Analyzed the data to find patterns in the activity around the tweets and visualized the result using (Matplotlib & Pandas) in Python
- Plotted the distribution of languages using Matplotlib library in Python

Data Mining and Data Warehouse, New York University

01/2020 - 05/2020

- Identified the operational problems of Shoprite, modified the inventory system and developed ROI analysis
- Built an internal data warehouse to increase business efficiencies by creating well-structured dimension tables and fact table
- Identified each customer's favorite categories using complex queries (SQL) and customized strategy to suit their needs
- Analyzed web log to dig out potential consumers for specific products (SQL) and popular products viewed by consumers

TECHNICAL SKILLS

Database: Oracle, My SQL, SQL Server, DB2, Access, PhpMyAdmin

Programming Languages: SQL/PLSQL, Python, JavaScript, HTML, CSS

Python Library: Pandas, Numpy, Matplotlib, Seaborn, JSON, CSV, fuzzywuzzy, tweepy, basemap, Openpyxl, SQLAlchemy, SQLite3

BI Tool: Tableau, Power BI, SPSS

Other Tools: Google Suite, Google Analytics, MS Office, Advanced Excel, Lingo, Microsoft Visio
