

Princi Singh
Java Developer
Email: singhprinci590@gmail.com
Ph #: 512-766-0623

Professional Summary:

Full-stack developer with around **6+ years** of experience with all stages of the development cycle, for projects in **AGILE** and **SDLC** models

- Working knowledge in multi-tiered distributed environment, OOAD concepts, good understanding of Software Development Lifecycle (SDLC) and familiarity of Service Oriented Architecture (SOA).
- Extensive experience in designing and developing Enterprise Applications for J2EE platform using **Core Java, Servlets, JDBC, JSP, JSTL, JAXB, Struts, EJB, Spring, Spring Boot, Spring DATA, Spring JDBC, Groovy-Grails, Hibernate, XML, Web services, JMS, Eclipse, RAD, Ant, Maven.**
- Expertise in implementing **Web services and JMS** for the synchronous and asynchronous communications between two applications running in different servers.
- Proficient in creating **Web Services** using **Spring Boot**.
- Expertise in application development using **Servlets, JDBC, JNDI, spring, Hibernate, JSF, EJB2.0/3.0, XML, Web Services- SOAP, WSDL.**
- Successfully designed and implemented systems based on N-tier distributed architecture using JAVA/J2EE technologies such as, **Core Java, Multithreading, Collections Framework, Java I/O, JDBC, Hibernate, Spring Framework, Spring Batch, Struts Framework, JSP, jQuery and XML** including XSL, XSLT and XML Beans.
- Experience in developing Web based GUI's using **JSP, HTML5, DHTML, CSS3, JavaScript, JSON, Node JS, Angular 1.x, 4 & 7, JQuery, EXTJS and Ajax.**
- Experienced in developing Mobile Learning Applications, including video recording and playback, device registration based login for internal staff, etc. Experienced in using Cordova Child Browser and Mobile Offline Player.
- Support Client side libraries like angular and database connection like mysql, Casandra, mongoDB and postgres through the Node base microservice and have them connected with Api calls.
- Experience in developing Web based GUI's using **JSP, HTML5, DHTML, CSS3, JavaScript, JSON, Node JS, AngularJS, React JS, JQuery, EXTJS and Ajax**

- Extensive experience in various Java/J2EE technologies including Core Java, J2EE (EJB, Servlets, JSP, JDBC), Spring (IOC, MVC, AOP, DAO), **Hibernate** and **Java Web Framework** along with Web Services (SOAP, RESTful) and Database related technologies.
- Proficient in using Amazon Web Services **AWS**. Extensive experience focusing on services like **EC2**, **Cloud Watch**, **Cloud Front**, **Cloud Formation**, **IAM**, **S3**, **Amazon RDS**, **Elastic Cache**.
- Managed Amazon Web Services like **EC2**, **S3 bucket**, **ELB**, **Auto-Scaling**, **SNS**, **SQS**, **AMI**, **IAM**, **Dynamo DB**, **Elastic search**, **Virtual Private Cloud (VPC)** through **AWS Console** and **API Integration**.
- Deploy application updates to **AWS** and monitored the load balancing of different instances
- **Knowledge** in implementing a Microservices with Spring Boot based services.
- Expertise in Web Services architecture in **SOAP** and **WSDL** using **JAX-RPC**.
- Experience in developing Web based **GUI's** using **JSP**, **HTML5**, **DHTML**, **CSS3**, **JavaScript**, **JSON**, **Node JS**, **AngularJS**, **React JS**, **JQuery**, **EXTJS** and **Ajax**.
- Experience in **Bootstrap** (Responsive Web Design), **Backbone**, and **AngularJS** frameworks.
- Utilized React Navigation for routing and passing data between screens.
- Utilized React native components like Images, height, width, text input, flex box for development of new features
- Strong working experience Object Relational mapping (ORM) tools like **Hibernate** (**Hibernate Connection Pooling**, **HQL**, **Hibernate Caching**, **Transactions**).
- Expertise in design patterns including **Front Controller**, **Data Access Object**, **Session Facade**, **Business Delegate**, **Service Locator**, **MVC**, **Data Transfer Object** and **Singleton**.
- Proficient in **OOAD Technologies** developing **Use Cases**, **Activity diagrams**, **Sequence Diagrams** and **Class diagrams** using case tools like **Microsoft Visio** and **Rational Rose**.
- Experienced in the functional usage and deployment of applications in **JBoss**, **WebLogic**, **WebSphere** and **Apache Tomcat**.
- Experience in Database Design, Creation and management of Schemas, writing Stored Procedures, functions, Triggers, DDL, DML SQL queries. Experience in writing SQL and PL/SQL programming.
- Involved in building and deploying Apache **ANT/ MAVEN** scripts for deployment and customizing WAR/ JAR file management for web applications.
- Well experienced in using **JUnit** for performing unit-testing framework.
- Expert in Various Agile methodologies like **SCRUM**, **Test Driven Development (TDD)**, **Incremental** and **Iteration methodology** and **Pair Programming** as well as implementing **Waterfall model**.
- Worked using IDE like **Eclipse**, **My Eclipse**, **Netbeans**
- A very good understanding of **Groovy** and **Grails**.

- Expertise in using configuration management tool like SVN and GIT for version controlling.
- Highly motivated team player with strong communication, analytical, documentation and organizational skills.

TECHNICAL SKILLS:

Languages	Java SE 6/7/8, Java 1.6/1.7/1.8/J2EE
Java/J2EE Technologies	Servlets, JSP, JSTL, JDBC, JSF, JavaBeans, MVC, ANT, MAVEN, Log4j, XML, JAXP, DOM, JNDI, JUNIT, Web services (REST/SOAP), Executor Framework, JTA
Design Patterns	Singleton, Factory, Facade, Builder, Observer, Command Patterns, Value/Data Transfer
Design Tools	Rational Rose, Star UML, Enterprise Architect
Web Technologies	HTML, JavaScript, CSS, XML, Angular, Node
Frameworks	Struts, Spring, Spring-Data, Node Js, Spring JDBC, Hibernate, JPA, Spring Core, Spring ORM, Spring MVC, Spring AOP, Angular JS, React JS
Web/Application Servers	Web Logic, WebSphere, Apache Tomcat, JBOSS
Testing	Junit, SOAP UI, POSTMAN
Version Control Tools	GIT, SVN, CVS
Build Tools	Ant, Maven, Gradle
Methodologies	Agile (Scrum), Iterative
Database Environments	Oracle, PostgreSQL, MySQL
Operating Systems	Windows, Mac, Linux and UNIX

PROFESSIONAL EXPERIENCE:

City of New York, NY
 Jul 2018 – Till Date
 Role: Full Stack Developer

Responsibilities:

Working within the frontend with Angular and duties are to work on the user stories we get in team, including updating any changes or fixing any bugs or making sure flow is working in the Illumina link web browser.

- Involved in the development of a portal called **Microsite** using **spring boot** framework.
- Upgraded the UI screens in the application to single page UI using **Angular 6**, **HTML5** and **CSS3**.
- Used **Postman** with **JSON** to test the request and response of the application.
- Design and Development of Objects using Object Oriented Design in Java.
- Created **sequence diagrams**, **collaboration diagrams**, **class diagrams**, **usecases** and **activity diagrams** using **Rational Rose** for the Configuration, Cache & logging Services.
- Developed **Micro-Services** based **architecture** to enable the application to be deployed on **AWS**.
- Responsible for creating an instance on **Amazon EC2 (AWS)** and deployed the application on it.
- Worked on **AWS** services to deploy static websites and dynamic Web Apps on EC2 using Elastic Beanstalk and Elastic Container Service-Docker.
- Implemented a Continuous Delivery pipeline with **Docker**, **Jenkins** and **GitHub** and **AWS AMI's**.
- Deployed **Spring Boot** based **Microservices** Docker container using Amazon EC2 container services and using AWS admin console.
- Worked on XML Technologies like **XML Parsers**, **JAXB** for binding data to **Java objects**.
- Developed the **Spring AOP** Programming to configure logging for the application.
- Developed the application using **Angular 6**, **spring**, **HTML**, **Bootstrap**, **CSS** and **JavaScript**.
- Created and Implemented Microservices using **spring boot**, **REST**, **JSON**.
- Extensively used **Maven** to build the application and **deploy on Embedded Tomcat Server**.
- Configured session timeout with **Spring Boot** in server side and implemented auto logout Functionality.
- Created various MongoDB collections and wrote services to store and retrieve user data from for the application on devices and used Mongoose API in order to access the MongoDB from NodeJS
- Maintained and handled database access using Node.JS and Express and manipulated data using CRUD operations of MongoDB database management system
- Essentially worked on Message Routing and Kafka Broker implementation in node.js.
- Implemented Cordova Child Browser in both Android iOS apps. Used various JQuery Plugins like Calendar control, Carousal control, Video Upload, etc.
- Used **Angular 6** as the development framework to build a single-page application.

- Involved in SPA (Single Page Web Applications) using **RESTFUL** web services plus Ajax and React JS.
- Participated in development of a well responsive single page application using **Angular 6** framework, **JavaScript**, and **jQuery** in conjunction with **HTML5**, **CSS3** standards, with front-end **UI** team.
- Involved in creating a reusable component using **Angular 6** for DOM manipulation.
- Worked extensively on Web Services (**SOAP&REST**), **XML**, **JMS** and Spring Controller.
- Reviewed the code for ensuring adherence to Java coding standards.
- Responsible in testing the classes and methods using **Junit** test case for unit testing of application and **Log4j** to capture the logs.

Environment: Java, JSP, JavaScript, Ajax, JQuery, Angular6, Maven, Spring Boot, POS, DOJO, spring, Microservices, Backbone, HTML5, CSS3, Rest API, Log4J, GIT, Kubernetes, Agile, Jenkins, XML, Windows.

Silicon Valley bank, CA
Apr 2017 – Jun 2018
Role: Full Stack Developer

Responsibilities:

- Responsible for writing **J2EE** compliant Java code for application development effort which involved working with **JSP**, **Servlets**, **JDBC**, **XML**, **EJB**, etc.
- Involved in the development of a portal called **Microsite** using **spring boot** framework.
- Designed and developed the application using **AGILE-SCRUM** methodology.
- Strong experience with **Angular** and **Ionic** to develop multiplatform mobile apps using technologies like **Cordova**.
- Implemented features like logging, user session validation using **Spring-AOP** module.
- Upgraded the UI screens in the application to single page UI using **React JS**, **HTML5** and **CSS3**.
- Used **Postman** with **JSON** to test the request and response of the application.
- Involved in creating REST APIs by using **NodeJS** as backend, **Express.JS** as a Middleware, and **MongoDB** as Database.
- Extensively worked with core java like collections, **String Builder** and interfaces.
- Utilized **Node.js** to create a fast and efficient chat server.

- Involved in creating REST APIs by using NodeJS as backend, Express.JS as a Middleware, and MongoDB as Database
- Implemented and maintained monitoring and alerting of production and corporate servers such as EC2 and storage such as S3 buckets using AWS
- Used Amazon S3 to backup database instances periodically to save snapshots of data
- Utilized Amazon Web Services (AWS) EC2 to deploy Docker containers.
- Core java development for different components. Developed the application using Core Java, Multi-Threading, Spring Core, Beans, JDBC, Transaction and Batch, ORACLE, Maven.
- Design and Development of Objects using Object Oriented Design in Java.
- Extensive experience in various **Java/J2EE** technologies including **Core Java**, **J2EE**, Servlets, JSP, JDBC, Struts, spring and Hibernate.
- Developed robust client and form management system with React Native, Redux, and Firebase.
- Leveraged react- native-text-input-mask to handle filtering user input in near-realtime
- Created **sequence diagrams**, **collaboration diagrams**, **class diagrams**, **usecases** and **activity diagrams** using **Rational Rose** for the Configuration, Cache & logging Services.
- Took initiative in learning react native and went on successfully developing various features under minimal supervision.
- Optimized the performance of application using Angular 4 Lazy Loading and Ahead of Time Compilation.
- Developed application using concepts of Single page application using **Angular 4**.
- Enhanced application performance by **Angular 5** Component based development in view of future Angular framework transitions.
- Worked extensively on **Angular 4/5 framework** and had experience working with Ng-Modules, components, Observables, ng-router, AUTH-guards.
- Develop new features and components using **Angular 6** and Angular material, lo-dash, ES6 and GIT Lab.
- Developed custom directives in **Angular 6** to share common functionalities shared between different components
- Created proof-of-concept using responsive web design, **Angular 6**, HTML5 and Bootstrap4.
- Internal Team Training Instructor (React, React Native, Redux); Implemented AES Encryption (256)
- Preparing the migration document for migrating application from **Struts** to **spring** and Responsive Web Designing (RWD) of the application.
- Involved in designing overall Microservices architecture including **Gateway**, **API Service**, **Core Service**, **Discovery Server** and **Monitor Server** using **Spring Cloud Netflix**.
- Experience using Microservices with **spring cloud**.

- Created a web application for ticketing system based on **Spring Cloud Microservices** and **Spring Boot**.
- Setup Centralized Microservice Configuration with **Spring Cloud Config Server**.
- Worked on XML Technologies like **XML Parsers**, **JAXB** for binding data to **Java objects**.
- Developed the **Spring AOP** Programming to configure logging for the application.
- Implemented JMS for notifications and testing with JUnit, Mock cases.
- Developed the application using **React JS**, **spring**, **HTML**, **Bootstrap**, **CSS** and **JavaScript**.
- Created and Implemented MicroServices using **spring boot**, **REST**, **JSON**.
- Extensively used **Maven** to build the application and **deploy on Embedded Tomcat Server**.
- Configured session timeout with **Spring Boot** in server side and implemented auto logout Functionality.
- Involved in creating and Deployment of REST API and Micro Services in Java J2EEE using **Spring Boot**.
- **Node.js** is used to develop server side applications.
- Used **React JS** as the development framework to build a single-page application.
- Involved in SPA (Single Page Web Applications) using **RESTFUL** web services plus Ajax and React JS.
- Participated in development of a well responsive single page application using **React JS** framework, **JavaScript**, and **jQuery** in conjunction with **HTML5**, **CSS3** standards, with front-end **UI team**.
- Involved in creating a reusable component using ReactJS for DOM manipulation
- Worked extensively on Web Services (**SOAP&REST**), **XML**, **JMS** and Spring Controller.
- Used spring framework for the MVC implementation with spring for DI and Hibernate as ORM tool for database communication.
- Extensively used **Maven** to build the application and **deploy on Embedded Tomcat Server**.
- Maintained source code in **GIT** Repository.
- Used **Log4j** for logging to trace the application log messages which is used for debugging.
- Designed various tables required for the project in **Oracle** database.
- Prepared JUnit and Integration test cases and integrated with Jenkins.
- Used JIRA for writing user stories and raising defects in a defined sprint.
- Develop the changes using JSTL, JQuery, JCP, JSP, Spring MVC, Spring IOC, Spring JDBC, Web services Configure beans in spring configuration file with Spring IOC, Spring AOP concepts.

Environment: Java 1.8, JSP, JQuery, JSON, Elastic, Spring Boot, Spring IOC, Spring MVC, Spring AOP, Spring ORM, React JS, Node.JS, Microservices, XML, SOAP Web Services, JMS, Agile, XPATH, Hibernate, Maven, GIT, Oracle, Tomcat, Log4j, GIT, JIRA, Oracle, Windows/Linux.

Goelzer	Investment,	Indianapolis,	IN
Oct 2014 – Dec 2016			
Role: Full Stack Developer			

Responsibilities:

- Involved in all the phases of SDLC including Requirements Collection, Design and Analysis of the Customer Specifications, **Development and Customization of the application.**
- Created new **workflows for Enterprise business Markets (EBM) workflow Engine** to sell enterprise products.
- Developed business components using **core java** concepts and classes like Inheritance, Polymorphism, Collections, **Serialization** and Multithreading etc.
- Involved in using **Core java concepts - Collections, Exception Handling, Multithreading, Concurrency, Serialization and Java 1.8 features.**
- Developed **core Java programs** for all business rules and workflows using **spring framework.**
- Advised & developed the switch to a new host app in React Native based on the old Cordova, Ionic, and Angular app; Leveraged Google Vision API to read text from Driver's License & other documents
- Designed and Developed native Android and IOS apps using react native components and libraries.
- Designed and developed various modules of the application with **Spring MVC** architecture and **Spring Bean Factory** using IOC, AOP concepts.
- Experienced in building cross platform mobile applications using HTML5, CSS3, SASS, Javascript, Cordova, Child Browser, Sencha touch, JQuery Mobile, JQuery, Backbone, Require, Underscore Phone Gap, Node.js
- Modified the existing workflows to reduce execution time and improved the throughput.
- Thorough knowledge of Motive Workflow builder enabling debugging and analyzing workflow executions
- Analyzed and resolved themes and themeskin issues during the migration of **UCP project.**
- Played the role of configuration controller to validate and maintain the project as per the company and TI9k standards.
- Designed use cases for the Application as per the business requirements.

- Participated in requirement gathering and framework implementation sessions through Agile TDD methodology.
- Used ng2-pdf-viewer from Angular2 npm package to preview the pdf files
- Created many components with Angular2 for each single page application.
- Used Angular2 camelCase syntax for built in directives.
- Used router module from Angular2.0.
- Used Angular2 npm packages like ng2-datepicker, ng2-pdf-viewer, ng2-auto-complete etc., to meet the requirements of the project.
- Developed and delivered **SOAP based Web Services** and used Apache-CXF and SOAP UI to test the services
- Developed Web Applications with rich UI using **CSS, JavaScript, Ajax, jQuery** plugins and **Struts 2** framework.
- Implemented **Single Page Design** and customized directive and filter criteria by using **Angular.JS**.
- Involved in creating and Deployment of REST API and MicroServices in Java J2EEE using **Spring Boot**.
- Implementation of authentication for Restful web services using Spring Boot Security Starter.
- Developing the application for incident creation and retrieving the events using restful web services with spring Boot.
- Worked extensively on spring boot for building web service.
- Extensively used **Core Java** such as Exceptions, and Collections.
- Designed the system based on **Spring MVC Model** architecture. Developed a business logic layer using **Spring Dependency Injection** and client side **Java-beans** for **DAO Design Patterns**.
- Used Maven for compilation and building JAR, WAR.
- Used **Log4J** for logging and tracing the messages.
- Used **STS** for developing, debugging, integrating and deploying the application.
- Maintained source code in **GIT** Repository.
- Involved in the day to day sprint development activities and delivered per sprint timeline.
- Written unit test cases using JUnit and Integration test cases and integrated with Jenkin jobs.
- Coordinated with the onsite and offshore developer's w.r.t ongoing issues and follow up.
- Utilized Node.js to create a fast and efficient chat server.
- Responsible for the overall layout design that meet cross-device compatibility using Bootstrap, color scheme of the web site using HTML5, and CSS3 and Responsible for creating detailed wire frames and process flows.
- Used Hibernate as persistence framework for DAO layer to access the Oracle10g database.
- Proficient in using GIT for Version Control.

- Actively involved in code reviews and also in bug fixing.

Environment: Java, JSP, JavaScript, Ajax, JQuery, Angular2, Maven, Spring Boot, POS, DOJO, spring, Microservices, Backbone, HTML5, CSS3, Rest API, Log4J, GIT, Agile, Jenkins, XML, Windows.

Kricon Solution, Hyderabad, India

Jul 2013 – Mar 2014

Role: Java/JEE Developer

Responsibilities:

- Responsible for system analysis, design and development in JEE using **MVC** based architecture.
- Involved in various phases of Software Development Life Cycle (**SDLC**) as requirement gathering, modeling, analysis, architecture design & development and the project was developed using Agile Methodologies.
- End-to-end Project Management, including customization of product based on the customer's requirement, meeting delivery deadlines on development, testing, implementation phases of the system and customer relationship consulting.
- Developed the front end of the application using **HTML, CSS, JSP** and **JavaScript**.
- Implemented the design patterns like **DAO Factory, Singleton, Service Locator** and **Business Delegate**.
- Developed Object Model from **Hibernate** mapping files.
- Developed **JSP** and pages **HTML** using **CSS** as part of the presentation layer
- Used **ADF Framework** with strong Object Oriented background
- Developed Web Services to implement SOA using **SOAP, WSDL** and **UDDI** with **HTTP**.
- Data access layer is implemented using **Hibernate**. Involved in debugging the product using **Eclipse 3.6** and **JIRA** Bug Tracking.
- Test automation for web application using **Cucumber**. Worked extensively in the backend **Oracle** database
- Used **Spring Batch** for scheduling and maintenance of batch jobs.
- Using **spring validation** framework for server side validation. Used various design patterns to direct best solutions.
- Helped to finish assignments using several frameworks such as: **Java applet, Spring MVC, Hibernate**.

- The several technologies were used to create and deploy web pages such as **JSP, JavaScript, HTML, and CSS**. Used **Hibernate** as ORM tool to store the persistence data into the Oracle database.
- Developed Web Services using **SOAP, WSDL** and **XML**.

Environment: Java, JEE, JavaScript, Hibernate, HTML, CSS, JSP, spring, Oracle, Windows, Apache Tomcat, MVC.
