www.linkedin.com/in/somyac

PROFESSIONAL SUMMARY:

Sr. Full Stack Java Developer with over 7 years of experience in Analysis, Design, Development, Testing and Implementation of Enterprise Client/Server and Distributed Applications across the entire Software Development Life Cycle using Java and J2EE Technologies.

- Worked with complete **Software Development Life Cycle (SDLC)** process which incorporates Requirement Gathering, Analysis, Designing, Developing, Testing, Implementing and Documenting the whole life cycle with methodologies like **Waterfall Model** and **Agile methodology**.
- Highly experienced in **AWS** Cloud platform and its features which includes Amazon **AWS** Cloud Administration which includes services like: **EC2, S3, ELB, LAMBDA**.
- Proficient in developing web applications with W3C Standards like **HTML5, CSS3, XHTML, Bootstrap, JavaScript, XML, AJAX, AngularJS, NodeJS, JSON**.
- **Angular 7** integration with a **MEAN** backend using **NodeJS** framework.
- Proficient in **XML, DTD, XML Schema, XSLT, XPath, DOM** and **SAX** parsers.
- Strong programming skills in Java **Multi-Threaded, Collection Framework, Interfaces, Synchronization, and Exception Handling, Java Beans, Executor Services, Thread pools** applications and **J2EE** technologies.
- Strong hands on experience in developing the Enterprise and Web applications on n-tier Architecture using Java/J2EE and Java based technologies such as **Servlets, JSP, Hibernate, EJBs, Struts, JNDI, Web services, XML, JPA, JMS** and **JDBC**.
- Having strong Algorithmic skills and condensed in Programming, worked on **design patterns** like **Singleton, Business Delegate, Service Locator, Factory, Chain of responsibility, Front Controller, Session Façade, Command, DTO, DAO** and **OOPS** concepts.

- Strong experience in Spring Framework modules such as Spring MVC, IOC, JDBC, Spring Dashboard, Spring Boot, Spring Microservices, Spring REST, Spring Eureka, Spring Ribbon, Spring Netflix, Spring Zuul Proxy.
- Adept skills in working with applications developed using Object Relational Mapping frameworks like Hibernate and MVC frameworks like Struts, JSF etc., and IOC frameworks like Spring and its subsidiary modules such as Spring MVC, Spring DI, Spring JDBC, Spring IOC, and Spring AOP.
- Experience of working with databases Oracle 10g/11g/12c and DB2, MySQL, extensive experience working on SQL, PL/SQL, Oracle Database development experience using tables, triggers, views, packages, stored procedures and all object relational features in oracle.
- Expertise in using NoSQL database like MongoDB, Cassandra to support the storage of JSON objects
- Experienced in configuration and deployment on Application Servers such as IBM WebSphere, Oracle WebLogic, Red Hat JBoss and Apache Tomcat
- Substantially acquainted to SOA (Service Oriented Architecture) and experience in developing Web services using Apache CXF, Axis, WSDL, SOAP, REST, UDDI, WS-Security (WSS), XML-RPC and JAXB/JAXP.
- Proficient in Web based Integration Testing, System Testing, Performance Testing, Functional Testing and Unit Testing using Karma, Jasmine, JUnit/TestNG, Selenium (IDE/Web driver), Continuum, Selenium, Hudson, Jenkins and Apache Camel.
- Experience with Docker containers, leveraging Linux Containers and AMI's to create Docker Images/ containers.
- Used Maven, Gradle, Ant/IVY, NPM and Jenkins tools to build and deploy the source code.
- Experienced in Hudson and JENKINS for continuous integration and for End-to- End automation for all build and deployments. Working knowledge on Team City and Bamboo.
- Hands on experienced in integrating Java Applications to use Splunk for logging and metrics.
- Experience in developing and Executing test cases Manually and Developed Automation Script with Selenium IDE, GRID, Selenium RC, Selenium Web Driver and Jenkins.

- Experience in working with projects utilizing test-driven development (TDD), BDD and Acceptance Test-driven development (ATDD) methodologies.

TECHNICAL SKILLS:

Languages	Java, J2EE, C, C++, SQL, PL/SQL.
Java Technologies	Java, J2EE, JDK 1.7/1.8, JDBC, Hibernate, XML Parsers, JSP 1.2/2, Servlets, EJB, JMS, Struts, Spring Framework, Java Beans, Web Services (REST, SOAP)
Framework	MVC, Spring 3.0/3.5, Hibernate 3.0/3.2, Struts 1.2/2.0, Micro Services, Spring Boot
Web Technologies	HTML 5, DHTML, XHTML, CSS, Bootstrap, jQuery, Java Script, PHP, XML
Application Web Frameworks	Angular JS, React JS
Servers	WebLogic, WebSphere, jBoss, Tomcat, Glassfish
DB	Oracle 12c/ 11g/10g/9i/8i, DB2, RDBMS, SQL Server 2000/2008/2012, My SQL, MS Access, No SQL, PostgreSQL, MongoDB, Azure cosmos DB
Build Scripts	Ant, Maven, Jenkins, Bamboo, Groovy
Testing	JUnit, Mockito, Selenium, Cucumber
Defect Tracking Tools	Jira, Rally
Methodologies	Waterfall, Agile.
Version Controls	GitHub, Git, Bitbucket
IDE	Spring Tool Suite, Maven, Eclipse IDE, Neat Beans, JBuilder, JDeveloper, Visual Studio .NET, Putty, JUnit

PROFESSIONAL EXPERIENCE

Present

Careington International, Frisco, TX

- Worked in Amazon Web Services (AWS) for utilizing the AWS stack (Including EC2 and S3), in creating high-availability, fault tolerance, and auto-scaling environment.
- Developed API gateway for invoking **AWS Lambda** to manage the servers and alerts in the **AWS**.
- Used **AWS Cloud watch** in alerting, maintaining and monitoring of production and corporate servers/storage.
- Developed Single Page Applications (**SPA's**) using **Angular**. Created **Multiple & Nested Views, Routing, Controllers, Services** and **Custom Directives** and **Webpack**.
- Involved in developing UI using JSP, JSTL, HTML5, CSS, JavaScript, jQuery, and Angular.js
- Build the reusable service components with **AngularJS, Bootstrap, and JSX** that are used across various modules. Used Selectors, Events, AJAX and Dom Manipulation components in **Angular** directives, filters, services.
- Implemented routing logic, navigations and implemented login functionality on the client side in **Angular Js**.
- Develop **RESTFUL** Web Services interface supporting **JSON** to publish printing machines operational data, also developed the code to interact with other web services. Strong understanding of supporting **JSON based RESTful web-services**, integrating with the front-end.
- Used advanced java 8 features like **Lambda expressions** for array operations, **Streams, Method reference, collections**. Enhanced concurrency methods etc. throughout the application for well-defined programming.
- Used a **Microservice** architecture, with **Spring Boot**-based services interacting through a combination of **REST** and **Apache Kafka** message brokers.
- Hands-on experience setting up Kubernetes (k8s) Clusters for running microservices. Took several microservices into production with Kubernetes backed Infrastructure.
- Implemented interceptors using **JPA** and build and release **Spring Boot** framework.

- Created **SQL** queries, **PL/SQL** Stored Procedures, Functions for the Database layer by studying the required business objects and validating them with Stored Procedures using **DB2** and **JPA** with **Hibernate** provider.
- Utilized **Jasmine** and **karma** to run tests on **Angular JS** components whereas **Junit** is implemented to perform unit testing on a **RESTful** web application.
- Used **Jenkins** with **Maven** to Compile & Build **Microservices** code and configure **Build Triggers**.
- Used **AGILE** software development methodology which helps to develop project plans.
- Gathered Requirement by interacting with business users and Business Analyst.

Environment: Java 8, J2EE, Spring boot, Spring Security, Struts, Spring Batch, Angular, JavaScript, selenium, HTML, CSS and Bootstrap, AWS, Netflix Eureka, Rabbit MQ, SOAP, RESTful, NoSQL Mongo DB, Elastic Search, STS, MAVEN, JUnit, Jenkins, Log4j, JIRA, Git, WebSphere (Liberty Profile), CICD Tools, Jenkins, JIRA.

Sr. Java Developer

Sept

2018 – May 2019

FedEx, Memphis, TN

- Designed and developed applications using **Agile Methodology**.
- Experience with event-driven and scheduled **AWS Lambda** functions to trigger various AWS resources.
- Created web services and desktop applications to access and display data needed by support teams using **JavaScript**, **jQuery**, **Angular JS**, **Java**, **CSS**, and **HTML** with various middleware technologies
- Used **JavaScript**, **AngularJS**, and **AJAX** technologies for front end, user input validations and Restful web service calls. Developed reusable components using Custom Directives in **Angular JS**.
- Using **Angular JS** created **Responsive Web Design (RWD)** and did data manipulations to display data in company standard format in UI. Implemented databinding and MVC using **AngularJS** for front-end development of a current web application
- Experienced in developing web-based applications using **Java/J2EE**, **Servlets**, **Spring**, **Web Services (SOAP & RESTful services)** and **ORM** frameworks like **Hibernate**.

- Used Spring Core annotations for Spring Dependency Injection, **Spring MVC** for Rest API's and **Spring Boot** for microservices.
- Maintain **Interface** compatibility and **concurrency** in the project using **Java 8** new features like lambda, Streams, functional programming default, static methods, and Concurrency API.
- Developed end-to-end **API** Design and development using **Swagger JEE** and Spring Boot for micro services.
- Developed Complex database objects like **Stored Procedures, Functions, Packages and Triggers** using **SQL and PL/SQL**
- Written the Rest Services to get the data from **NoSQL Cassandra** collections in JSON format.
- Worked as core technical team member for **analysis of requirements, design, development, unit, and integration testing** of applications.
- Implement and review Unit Test using **JUNIT** and **Mockito**. Involved in writing test cases for testing the Business components developed in spring and Hibernate using Junit framework.
- Worked with the **Splunk logs** to monitor the Application health and created the health rules and dashboard in **App dynamics** in both Dev and Prod environment.
- Setup the continuous Integration (CI) and continuous Deployment (CD) process for the application using the Jenkins.
- Developed unit testing with **Jasmine** by using karma and **E2E** tests with protractor.
- Configuration Management and source code repository management using tools like GIT, Subversion (SVN), and **JIRA** for project progress management.
- Used **Active MQ** (Message queues) for reliable and asynchronous exchange of important information between multiple business applications.

Environment: Java 8, J2EE, Spring boot, Spring Security, Struts, Spring Batch, Angular, JavaScript, selenium, HTML, CSS and Bootstrap, AWS, Netflix Eureka, Rabbit MQ, SOAP, RESTful, NoSQL Mongo DB, Elastic Search, STS, MAVEN, JUnit, Jenkins, Log4j, JIRA, Git, WebSphere (Liberty Profile), CICD Tools, Jenkins, JIRA.

– July 2018

Nitido Solutions, Hyderabad, India

- Involved in Requirements gathering, Analysis, Design, Development and Testing of application using **AGILE** methodology (**SCRUM**)
- Developed the web interface using **Angular-JS**, **HTML**, **CSS**. Hosted the application on a **Node.js** server using express middleware.
- Used **Angular JS** for UI to make the application user-friendly in the development of the Navigation Bar, Tables etc.
- Implemented a Single Page Web Applications (SPA) and Multi Page Web Application based front end for displaying user requests like fetching, inserting, updating, deleting user records history using JavaScript and **Angular JS**.
- Implementing and exposing the Micro services based on **RESTful API** using **Spring Boot**.
- Used Spring Boot which is radically faster in building cloud **Microservices** and develop spring-based application with very less configuration.
- Involved in implement the security with **OAuth2**.
- Implemented SOA to develop **REST Based Web services** using **Spring Rest API**.
- Created web services using **Spring @Rest Controller** to return **JSON** to the frontend
- Implemented **Swagger** by using spring annotations, which will make the developers easy to understand the flow.
- Remotely debugged remote debugging the application to resolve environment specific issues.
- Configured **Swagger-UI** registered Micro service with Eureka server to monitor service health check from Spring Boot admin console.
- Used **JavaMessageService (JMS)** for reliable and asynchronous exchange of important information for status report along with **Apache Kafka** as Queue Server.
- Involved in creating **Mongo DB**, collections and documents and developed **Mongoose Schema** objects to perform CRUD operation.
- Involved in Code Review, Unit Testing and Integration Testing, Selenium Web Driver
- Created **Jenkins jobs** and **pipelines** and integrated **python** scripts to communicate to **AWS** resources.

- Responsible for Continuous Integration (CI) and Continuous Delivery (CD) process implementation using **Jenkins** along with UNIX Shell scripts to automate routine jobs.
- Used **MAVEN** to define the dependencies and build the application and used **JUnit** for suite execution and Assertions.

Environment: Java, J2EE, Spring boot, Microservices, Spring Security, OAuth2, Spring Batch, Angular, JavaScript, selenium, HTML, CSS and Bootstrap, AWS, Netflix Eureka, Rabbit MQ, SOAP, RESTful, NoSQL Mongo DB, Elastic Search, STS, MAVEN, JUnit, Jenkins, Log4j, JIRA, Git, WebSphere (Liberty Profile), CICD Tools, Jenkins, JIRA.

Java Developer

Jan 2015 –

March 2017

Byte Alpha Solutions, Hyderabad, India

- Involved in the **Analysis, Design, Implementation and Testing** of Software Development Life Cycle (SDLC) of the project.
- Assisted the analysis team in performing the feasibility analysis of the project.
- Designed **Use Case diagrams, Class diagrams and Sequence diagrams and Object Diagrams** in the detailed design phase of the project using **Rational Rose 4.0**.
- Developed presentation layer of the project using **HT**
- Used various **J2EE design patterns**, like **DTO, DAO, and Business Delegate, Service Locator, Session Facade, Singleton and Factory patterns**.
- Consumed Web Service for transferring data between different applications.
- Used **Object/Relational mapping Hibernate 3.0** framework as the persistence layer for interacting with **Oracle 9i**.
- Implemented **Spring MVC, dependency Injection (DI) and aspect-oriented programming (AOP)** features along with hibernate.
- Involved in implementation of **MVC** pattern using **Angular JS, and Spring Controller**.
- Created **RESTful** web services interface to Java-based runtime engine.
- **JSP** and **Struts** framework used to Developed presentation tier and while coding JSP pages used custom tag libraries and Struts tag libraries and used **AJAX** for better user interface.
- Extensively used **IBM Web Sphere 5.0** while writing code and for creating Data Sources.
- Written complex **SQL** queries, stored procedures, functions and triggers in **PL/SQL**.

- Configured and used **Log4J** for logging all the debugging and error information.
- Used **Spring ORM** to integrate with the Hibernate and used the hibernate template to implement the business logic
- Created Database Tables, Sequences and wrote hibernate mapping files and POJO classes and used Spring DAO on data layer access layer with the Hibernate.
- Involved writing code for Request Processor class to extend the functionality of **Struts Controller**.
- Developed **Ant** build scripts for compiling and building the project.
- **ML, JSP 2.0, JSTL and JavaScript** technologies.
- Developed complete Business tier using Stateless and Stateful Session beans with **EJB 2.0** standards using **Web Sphere Studio Application Developer (WSAD 5.0)**.
- Used **IBM Web Sphere 5.0** for deploying the application.
- Used **CVS Repository** for Version Control.
- Created test plans and **JUnit** test cases and test suite for testing the application.
- Participated in SCRUM Meeting and Delivered the Project in SCRUM methodology.
- Participated in the production support and maintenance of the project.

Environment: J2EE, Java/JDK, JDBC, JSP, **Struts 2.0**, Web Services, SOAP, REST, JavaScript, CSS, JNDI, JavaBeans, XML, XSLT, Oracle 10g, TOAD Eclipse, HTML/ DHTML, Windows, JAXB, MySQL, IBM WebSphere, HTML, CSS, Spring 3.0, Hibernate 3.5.6, Maven, JUnit, Log4j, SVN, Servlets, jQuery, JSP.

Jr. Java/J2EE Developer

Aug 2013 - Dec 2014

People's United Bank, Hyderabad, India

- Involved in entire Software Development Life Cycle (**SDLC**) of the project like Requirement gathering, Conceptual design, analysis, Detail design, Development, System Testing, and User Acceptance.
- Designed and developed all the user interfaces using **HTML, CSS, JavaScript, JSP, Servlets** and **Spring framework**.
- Defined and designed the layers and modules of the project using **OOAD** methodologies and standard J2EE design patterns & guidelines.

- Configured **Java Messaging Services (JMS)** on **Web Sphere Server** using **Eclipse IDE**.
- Maintained the existing code developed in **Spring** and **Hibernate** framework by incorporating new features and fixing bugs.
- Developed the **DAO** layer using **Hibernate** and used caching system for real time performance. Involved in writing **Hibernate Query Language (HQL)** for persistence layer.
- Used **Spring ORM** module for integration with **Hibernate** for persistence layer.
- Used **REST API** for development for **Microservices** and implemented microservices in **Spring Native Cloud**.
- Used **AJAX** for developing asynchronous web applications on client side.
- Developed **Web Service** provider methods (bottom up approach) using **WSDL**, **XML** and **SOAP** for transferring data between the Applications.
- Developed stored procedures and triggers using **PL/SQL** in order to calculate and update the tables to implement business logic using **Oracle** database.
- Wrote prepared statements and called stored Procedures using callable statements in **MySQL**.
- Involved in fixing bugs and unit testing with test cases using **JUnit** framework.
- Used **Git** as Distributed version control system and branching for creating a new feature and making bug fixes.

Environment: Java, WebSphere, JSP, HTML, CSS, JavaScript, AJAX, Servlets, Spring, Hibernate (HQL), EJB (Session Beans), Multithreading, JNDI, SQL, MySQL, Oracle, Log4j, Maven, Jenkins, GIT, Log4j.
