Work Experience

Flex Force Engineer III

AT&T - St. Louis, MO

June 2019 to Present

Angular Developer at AT&T Flex Force

I create modern Angular web application converted from ColdFusion legacy code using Angular Material, NodeJS Express, and Oracle for the 911 internal database.

Completed the Trouble Ticketing Reporting feature in Angular using Angular 8, NodeJS, Oracle, so that 911 team could log their trouble reports, search and filter out trouble reports.

Rewrote the No Records Found feature from CodeFusion into Angular, NodeJS Express, and Angular Material creating a modern user interface and improving the load time by improving the load time of many pages by tuning the queries and improving the code.

Write .Net Core Web API C# Applications for the Depot team to be able to search for and devices order by AT&T, using Dapper and Swagger to host the applications,

Wrote Depot Inquiry API using .Net Core Web API to search for and modify inquiry searches, assign inquiries, close inquiries, and recategorize and transfer inquiries.

Application Specialist II

Ameren - St. Louis, MO

July 2018 to June 2019

Web Developer for Customer Service Support Website using .Net MVC and AngularJS

-- Trained at Saint Louis University in Angular 6

Worked on expanding functionality for Missouri and Illinois for Net Metering System using .Net MVC

--Created ANM Report Builder using .NET MVC and Oracle SQL calling Oracle Stored Procedures.

--Passed Azure Web Service Microsoft Certification
--Passed Microsoft Python Programming Certification

--Introduced AngularJS into .Net applications
--Introduced more useful technology to make apps more user friendly using a combination of Ajax, AngularJS, JQuery, BootstrapCSS, and MVC.

--Trained in Mulesoft, Salesforce communities by Salesforce and Mulesoft Employees.

--Fixed many bugs in Ameren.com website using .Net MVC, Oracle SQL, Bootstrap 3.3.7
--Advised on how to improve on existing legacy systems and proper database mechanisms and policies.
--Fixed bugs inside of the Solar Energy Rebate Website using Bootstrap 3.3.7, Ajax, .Net MVC, JQuery, JavaScript.
--Setting up websites to be used with Angular 6 and other new technologies.

Angular C# JQuery Developer

Government Servicer

May 2016 to July 2018

- Using AngularJS created a stopwatch with only a day or two for agents to use to time their calls
- Using Angular JS created a Repay Options Wizard in combination with ASP.net in a new tab.
- Added auto noting feature using JQuery to the company's Call Landing Page used by 400 employees like Loan Processing Specialists and Customer Service Representatives when answering phone calls from borrowers
- Created Income Driven Repayment Application Popup Review Screen using ASP.net modal popup and JQuery
- Adding saving of the Auto debit offer and Paperless offer dates so that call center employees would know whether or not customers had already been offered these features within the last 180 days
- Adding another loan servicer in the accounting General Ledger refund page Accounting page, and made the website table driven
- Fixed bugs in the Call Center website using ASP.net, C#, and SQL Server
- Added initialize secure messaging tab to enable agents to send emails to borrowers
- automate task Management system
- Fix and improve reports and create new reports
- Upgrade code to HTML5, include CSS3, upgrade legacy VB code into ASP.net code
- Implementer autodebit cancellation and suspension into internal facing customer website
- Introduced Jasmine and Selenium to the IT manager who in turn showed another senior level developer how to use Selenium.

Software Engineer

Local Backhaul Networks

March 2016 to May 2016

Added a new feature in the bulk editor wizard using MySQL, JQuery and PHP Code Igniter MVC Framework.

- Made the Flot.js charts load data from MySQL database more consistently by loading data through multiple asynchronous calls
- Added Domain Scoring to the Circuit Summary Page so that groups or domains of circuits had their most recent domain score displayed.
- Helped with Saturday morning deployments by finding bugs in production immediately after deploying
- Used Mercurial to check in, check out, push and merge changed from my local branch to the master branch
- Used NetBeans IDE to do PHP programming.

Software Developer, Missouri Employers Mutual

May 2014 to January 2016

- Trained one week in C# to learn MVC, helped develop a website that called an existing web service to create a rates calculator website using JavaScript
- Used GOSU, a Java based language, that was included in the Guidewire Insurance Suit package to create a new Invoice Adjustments Page within Billing Center website.
- Create a query that retrieves the missing invoices sent from Billing Center using Java JDBC. hitting the IMAGERIGHT database.
- Modify existing Guidewire Billing Center, Policy Center, and Claims Center INETSOFT, SQR, SQL and COGNOS reports to work with new company Previsor
- Modify the 1099s SQR program to work for the new company Previsor and enhancing existing 1099 edit website.
- Worked on a team to update the Signature Partner Commission PL\SQL Program
- Certified as Oracle Certified Associate Java SE 7 Programmer 10/2015

Java programmer

JB Hunt - Lowell, AR

November 2012 to March 2014

- Created a dashboard that displays FusionCharts charts of statuses of deliveries, available drivers, using Java, Spring framework, Java Server Faces, and Icefaces, and JavaScript.
- Created SSRS reports of data for managers at JB Hunt and created an SSIS job that will update a zip matrix from an excel file

- Update existing Java applications including sending emails automatically to the manager when a customer requests an order to be rescheduled

jQuery programmer

Work in School - Columbia, MO

March 2012 to June 2012

- Created a channel builder that allows users to create an application the way they want it to look and feel, including choosing colors and sizes
- Built a Twitter Google maps mashup that searches for tweets and maps the user's profile picture onto the location they reside on google maps.
- Created a Twitter ads classifieds real-time stream
- Supervisor Peter Meng
- Java Programmer, Araha Incorporated, Columbia, Missouri 10/2005-12/2006

o Supervisor Otto Plummer

- Designed an outliner that allows people with ADD to better organize their thoughts with drag and drop functionality to reorder groups of text
- Used Java AWT and SWING packages to create an Outliner from scratch
- Allowed users to pick and choose their look and feel of the outliner

Java Teaching Assistant

Tokyo Metropolitan University - Tokyo, JP

October 2003 to December 2004

- Taught students how to make flow charts and fix bugs
 - Guided students in writing programs such as sorting algorithms including bubble sort, bucket sort, and drawing in Java Applets.
- Teacher: Fukunaga Chikara fukunaga@tmu.ac.jp

Education

Front End Developer Enterprise

Udacity

December 2019 to February 2020

Bachelor of Science in Computer Science

University of Missouri

May 2012

Computer science

University of Missouri-Columbia

2012

Statistics

University of Missouri-Columbia

January 2011

Math

University of Missouri-Columbia

2010

Japanese Language School in Japanese Language

Asian Cultural Center Japanese Language School

August 2001 to March 2003

Skills

- Angular 6 (Less than 1 year)
- AngularJS (2 years)
- C# (2 years)
- Java (5 years)
- Javascript (5 years)
- CSS (5 years)
- Spring
- Spring (2 years)
- JQuery (5 years)
- JQuery UI (2 years)
- HTML5 (8 years)
- .Net
- ASP
- MVC
- Angular
- SQL
- Microsoft SQL Server
- XML
- MySQL
- APIs
- Web Services
- Bootstrap

Certifications and Licenses

Java 7 Oracle Certified Java Associate Programmer

October 2017

Japanese Language for foreigners

January 2012

Programming in HTML5 with JavaScript and CSS3 70-483

March 2018 to Present

Exam 70-480: Programming in HTML5 with JavaScript and CSS3

Microsoft SQL Server 2012/2014 70-461

April 2018 to Present

C# Programming 70-483

March 2018 to Present

Microsoft Certified Professional in C# Programming

Exam 70-483: Programming in C#

.Net MVC 70-486

July 2018 to Present

.Net MVC certification

MSCA: Web Applications

Present

Azure Web Services

January 2019 to Present

Microsoft Certified Python Programmer

January 2019

Microsoft Certified Solutions Developer: App Builder

January 2019 to Present

AZ-900 Azure Fundamentals

June 2020 to Present
